To whom it may concern,
I would very much object to a Marijuana Store license, or a facility license being issued to the property at 36380 Murray Land, Soldotna. A notice was posted in the paper about possible business called Fat Tops. For various reasons, I believe this would be a bad decision for the community and that specific area.

Life and Death decision

I believe that type of business would bring the wrong type of traffic to the area and adversely affect that particular neighborhood. Besides being strongly opposed to sales and marijuana use in my neighborhood; that particular intersection is very dangerous. The proposed property, sitting on the corner of the Sterling highway and Murray Lane, has a crest in the highway that is a very dangerous area, to turn off the highway. I have almost been plowed into, and have had several close calls, sitting on the highway, waiting to turn into Murray Lane. Many other friends have shared similar experiences on that same turn off, from the highway.

This would be an extremely poor choice for additional traffic /drivers, potentially under the influence of marijuana.

Please decline the licensing permit to this store/ facility!
