Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Pre-rolls		
Product Type:	Marijuana Product - intended for inhalation		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A

Product Description: Details must include the color, shape, and texture.	Pre-rolls will be cone shaped and off-white in color. Smooth hemp paper will be used for the cones.
Ingredients: This box is not applicable to marijuana concentrates.	Pre-rolls will contain ground cannabis flowers and leaves.
Standard Production Procedure and Detailed Manufacturing Process:	A measured quantity of cannabis will be used to mechanically fill pre-rolled hemp paper cones in a cone filling machine. The machine will use vibration to fill the cones with the mixture. Cones will then be removed from the machine, their ends manually twisted shut and packaged.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Pre-rolls
Product Type:	Marijuana Product - intended for inhalation

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	The pre-rolls will be approximately 2 1/2 to 5 inches long and contain approximately 10-40% THC by weight. The actual THC content will be listed on the label per the testing results. Pre-rolls will be sold loose to retailers or packaged in either cardboard, plastic tubes, or metal tins and then into opaque, child-resistant and resealable mylar bags. Paper liners and cellophane wrapping may also be used in packaging. Pre-rolls will be packaged either singly or in groups.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin		
Product Type:	Marijauna product - intented for inhalation		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	8 months

Product Description: Details must include the color, shape, and texture.	Rosin will be honey colored and semi-transparent. The texture is either smooth to the touch or slightly sticky. Rosin consistency will vary somewhat depending on the batch but generally resembles mostly, but not fully, dried spruce sap. Rosin will appear in flat, uneven globs.
Ingredients: This box is not applicable to marijuana concentrates.	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be produced via heat and pressure using a hydraulic press with heated metal pressing plates. Dried or frozen cannabis plant material or hash will be placed into synthetic, heat resistant, fabric mesh bags. The bags will then be placed between a folded sheet of parchment paper and then onto the press. The combination of heat and pressure will move cannabis oils (rosin) out of the nylon bags and onto the parchment paper where it will be collected. Rosin may be manually pressed flat after collection.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Bubble Hash		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/ wholesale		

Product Description: Details must include the color, shape, and texture.	Ice water hash will appear pale-golden to reddish-brown to greenish-grey. Texture will vary from a soft fine powder, to solid yet piable chunks. Most hash will be fully opaque however the highest grade hash may at times suggest a degree of translucence. Ice water hash will be sold in a powdered form, pressed into "cakes", or left in the "clumpy" state as it appears when first dried. Variations in color, shapes, and texture will occur based on season, variety, age, and grade.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	N/A
Flavors: List all current and potential future flavors:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Dried or frozen cannabis will be submerged in barrels filled with ice and water and lined with synthetic mesh bags. After a period of manual agitation, left over cannabis will be removed and wasted according to the facility waste plan. the mesh bags will then be removed individually from the solution, filtering the hash from the waterHash will then be collected from the bags and dried in an electric freeze dryer. once dry, hash will be decarbocylated by heating to around 220 degrees F for 30-60 minutes in a scientific grade oven to convert THCA to THC. hash will then either be left as is, manually powdered using a stainless steel grater, or pressed into cakes either by hand of with a hydraulic press.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
