Re: Marijuana Concentrate Manufacturing Facility license #29653

Dear applicant,

AMCO has reviewed the documents submitted for the proposed marijuana establishment license referenced above. This letter is notice under 3 AAC 306.025(e)(2) that your application is incomplete and additional items are needed to complete the application. The additional items that need correction or resubmittal are listed below—please be sure to read the entire letter. **Please note that if the corrections and/or additional documents submitted in response to this letter are not found to be complete, your application will be returned to you in accordance with 3 AAC 306.025(e)(1), and you will need to file a new application and pay a new fee should you wish to continue pursuing licensure.**

- **MJ-02 Premises Diagram – same thing I asked with application 29651.**
  - The image below is from your diagram. This production area DOES NOT mean 'growing', correct? It's more of a processing area for the cultivation facility? Or maybe I'm not understanding. Because your cultivation/growing allowed space is already taken up by your flower rooms and your nursery/clone room.

- **MJ-05 Concentrates Manufacturing Supplemental**
    - In the image below from you MJ-05, you initialed that you will have in-house testing area but the box right above says no. Please correct this section on the form.

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	CJ

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

- **Products - I am listing first the products that are complete, and then the products I have questions on.**
    - **Bubble Hash; Cannagar; Dry Sift; ETOH Oil; Flower Rosin; Full Melt; Hash Rosin; Kief Rosin; Kief; Live Rosin Carts; Live Rosin; Rosin Carts; Royal Moonrocks (basic, terpy or boujie)–** all these are complete.

    - **Double Trouble Hash Joint; Double Trouble Rosin Joint; Infused Blunt (heavy hitter, terp smacker, or party blunt); Infused Joints (basic, terpy, or boujie):** the common theme in these products is that each product will have different processes of making them depending on the concentrate you use. I understand all of that and your production description is clear. Your packaging description, however, is not clear to me. When you propose in each product that joints or blunts are going to be packaged in bulk (for direct sale to consumer), are you saying that the bulk package could contain any combination of each iteration of the product? I do not know if I am explaining myself right. So, the Infused Blunt bulk package could contain all three iterations of the blunt? And I am not saying that a combination would be allowed, I just do not understand it.

- **Applicant's Residency – same thing I mentioned with application 29651**
    - Christopher, will you be filing for the PFD this year? And if you are, is it possible that you can file for it now and let me know when you do. If you are not applying for it, I also need to know. I know Aaron is working on filing for it. Please do not send personal identifying information via email, I do not need it.

It is very important that you submit the above corrections and/or documents in a timely manner so that AMCO staff has adequate time to review the corrections and/or additional documents which must be found to be complete within 90 days of the date of this letter. That deadline is May 11, 2022.

Respectfully,

Jane P. Sawyer, Regulations Specialist

Re: Response to Incomplete Letter for Alaska Garden Solutions, LLC DBA Stoned Cold Cannabis License #29653

AMCO Team:

Thank you for your correspondence dated February 10, 2022. Please find the following attachments and/or statements to address your incomplete items:

- MJ-02 Premises Diagram
  - Diagrams 1, 2 & 5 – "Production" area on the diagram does not mean "growing". The production area's intent is for cleaning, trimming, packaging and rolling joints etc.
- MJ-05 Manufacturing Supplemental Products
  - Section 5.3 – the initials we placed in error and have been corrected (see attached)
  - Double Trouble Hash Joint – Bulk sales will only contain Double Trouble Hash Joints – The production concentrate will be either Bubble Hash <u>or</u> Dry Sift which will be indicated on the final product label, there is no combination of style option for this product.
  - Infused Joints (Basic, Terpy or Boujie style) – The production section states "Infused Joints (Basic, Terpy <u>or</u>, Boujie style" bulk sales …". Bulk sale packages will only contain one style of Infused Joints.
  - Infused Blunt (heavy hitter, terp smacker,or party blunt) – The production section has been updated to clarify that bulk sale packages will contain heavy hitter, terp smacker <u>or</u> party blunts. Bulk sale packages will only contain one style of Infused Blunts. (product pages attached)
  - Double Trouble Hash Joint – Bulk sales will only contain Double Trouble Hash Joints. The production concentrate will be either bubble hash <u>or</u> dry sift which will be indicated on the final product label, there is no combination of style option for this product.
  - Double Trouble Rosin Joint – Bulk sales will only contain Double Trouble Hash Joints. The production concentrate will be either Live Rosin <u>or</u> Hash Rosin which
