Form MJ-05: Marijuana Product Manufacturing Facility Operating Plan Supplemental

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannacoconut Oil		
Product Type: Choose one.	Edible		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	9-12 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible and for use in gummy candies.		

Product Description: Details must include the color, shape, and texture.	Cannacoconut Oil /THC Infused coconut oil is a solid emulsion of fat globules, air and water. Depending on temperature it varies between liquid and solid.
Ingredients:	Cannabis and coconut oil.
Standard Production Procedure and Detailed Manufacturing Process:	Combine cannabis, coconut oil and water in herbal infuser. Turn on and infuse the cannabis into the coconut oil. Strain the cannabis from the coconut oil; be careful not to push the plant material through the strainer as it will allow material to go through. Separate the water from the coconut oil by putting the container in the refrigerator (or freezer for a few minutes). Once the coconut oil solidifies remove it from the container and discard the water and residual plant by-products. CBD from an approved Alaska Industrial Hemp source may be added during the infusion phase.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
