**Alaska Marijuana Control Board**

## Operating Plan Supplemental

# Form MJ-05: Marijuana Product Manufacturing Facility

### What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

### What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

**This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.**

## Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

# Form MJ-05: Marijuana Product Manufacturing Facility

## Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

| The marijuana product manufacturing facility will not: | Agree | Disagree |
|---|---|---|
| **Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation** | ☑ | ☐ |
| **Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises** | ☑ | ☐ |

| The marijuana product manufacturing facility will not manufacture or sell any product that: | Agree | Disagree |
|---|---|---|
| **Is an adulterated food or drink** | ☑ | ☐ |
| **Closely resembles a familiar food or drink item including candy** | ☑ | ☐ |
| **Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children** | ☑ | ☐ |

## Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

**Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:**

R.C. Tinderbox, LLC will employ the following methods and techniques to create and process marijuana concentrate and other marijuana by-products and extractions: (1) water-based marijuana concentrate will be produced by extracting the cannabinoids from marijuana by using a combination of water and ice; (2) marijuana concentrate will be produced using the shop press with heated plates to heat and press marijuana extract; (3) alcohol/ethanol solvent extraction uses round glass flasks, 200 proof alcohol, and close loop machine. The facility will use heat, shaker boxes with screens, rosin presses, steam distillation, lab grade glassware, scales, filter bags, etha water with agitation to separate plant material from tricomes, and heat and pressure extraction to create kief, hashish, bubble hash; (3) water extraction bags utilizing distilled water and agitation; (4) a dry sift tumbler powered by an electric motor.

Alaska Marijuana Control Board

## Operating Plan Supplemental

# Form MJ-05: Marijuana Product Manufacturing Facility

**Describe the processes to be used to create marijuana concentrates:**

R.C. Tinderbox, LLC will create a variety of marijuana concentrates through the use of water and ice, heat and pressure with metal plates and parchment paper, sifting of bud flower o shake off and remove tricomes, and ethanol solvent-based extractions. The facility will use a professional grade equipment and ensure proper ventilation. All equipment that is involved in the extraction used in compliance with the manufacturer's stated use and installation instructions. The facility will use heat, screens, presses, steam distillation, and ice water to create concentrates and by-products for infusions. Each vessel used will be maintained and operated in compliance with the manufacturer's directives, and regularly inspected and serviced to maintain its integrity and function. All employees and agents operating, handling, inspecting, and cleaning the systems and vessels will be fully trained on how to use and maintain the system, and will have direct access to all applicable instructional and safety documents at all times. Marijuana or Marijuana Trim will be purchased from a licensed cultivator. Once the marijuana/trim is inspected for quality it shall be used to create concentrate - in compliance with 3AAC 306.555, 3 AAC 306.735, & 3 AAC306.545, the follow process will take place for the following types of concentrates:

-The process for creating Heat Press Concentrate type concentrate shall include the following steps: plant material will be placed on parchment paper and placed in a heat press. The heat and the pressure will squeeze the plant matter, which will press the resin glands out of the plant material. This method does not require any solvents.

-The process for creating bubble hash (water and ice method) type concentrate shall include the following steps: Marijuana/Trim will be placed into bags and then frozen - once frozen the bag will be placed in ice and shaken vigorously. The vigorous shaking and ice helps cannabinoids to be freed from the plant material. Once completed, the resin will be freed from the plant and can be spooned out of the bag and packaged for sale.

-The process for creating Kief (Kief Coin Product & Dry Sift Kief) Concentrate type concentrate shall include the following steps: This is a two step process - first, the marijuana/trim is plced on a screen and then shaken until the resin glands from the plant fall through and are captured by a container below the screen. Second step is the resin glands (also known as kief) are then placed in a coin shape mold and pressed together to create the Kief Coin. For Dry Sift Kief you simply leave out step two.

-The process for creating Ethanol/Alcohol Extract Concentrate type concentrate shall include the following steps: flower placed in a mason jar with 195-200 proof alcohol and is then locked in a fire proof cabinet for 6 hours. After the contents have soaked in the alcohol for 6 hours the contents are poured into a glass flask and attached to a close loop machine where the flask is rotated in warm water for an undetermined amount of time to evaporate the alcohol from the cannabis. After evaporation process the FECO will be separated out and packaged into syringes for a smokable product sold to retailers for direct consumption OR in 16oz mason jars on a wholesale basis to be mixed by edible companies with food fats to create edibles.

## Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

| | |
|---|---|
| **Product Name:** | Rosin |
| **Type:** | Marijuana Concentrate |

| | |
|---|---|
| **Product Description:** Details must include the color, shape, and texture. | Rosin texture consists of a sappy, translucent, semi pliable product. It can be light yellow to light green/dark amber depending on the strain used to create the product. The product will be consumed via smoking or vaping. |

| | |
|---|---|
| **Ingredients:** This box is not applicable to marijuana concentrates | N/A |

| | |
|---|---|
| **Standard Production Procedure and Detailed Manufacturing Process:** | The process for creating Heat Press Concentrate type concentrate shall include the following steps: plant material will be placed on parchment paper and placed in a heat press. The heat and the pressure will squeeze the plant matter, which will press the resin glands out of the plant material. This method does not require any solvents. |

| | |
|---|---|
| **Depiction:** Provide a photograph, drawing, or graphic representation of the expected appearance of the final product. |  |

## Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

| | |
|---|---|
| **Product Name:** | Rosin |
| **Type:** | Concentrate |

| | |
|---|---|
| **Packaging Description:** Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred. | Rosin will be wrapped in parchment paper and then placed in a paper envelope. It will be sold individually packaged to retail stores for direct sale to consumers in 0.5 gram units and 1.0 gram units. There will not be any indication of serving size because this is not an edible. Packaging will have all required warnings and neither the internal nor the external packaging will display any kind of printed images that might entice individuals under twenty one (21) years of age. All packaging materials will be obtained from a reputable vendor, as selected by ownership, and inspected for quality prior to acceptance into the facility. Once packed, all materials will be again inspected by an agent of the facility to ensure that all containers and wrapping materials properly seal their contents and protect from contamination. Please see attached Exhibit A for graphic representation of packaging. |

| | |
|---|---|
| **Sample Labels:** Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out. | Please see attached Exhibit B for sample labeling, logo and required information and display of warnings. |

| | |
|---|---|
| **Product Name:** | R.C. Kief Coin |
| **Type:** | Marijuana Concentrate |

| | |
|---|---|
| **Product Description:** Details must include the color, shape, and texture. | Dry Sift Kief is a loose powdery substance with a color that ranges from blond to green, depending on the strain of marijuana used. It is powdery to the touch, has the texture and shape of powder. To create the Kief Coin the loose kief is pressed into a coin shape, about the size of a quarter and about five times the thickness. A small piece is broken off and smoked or vaped by itself or with MJ flower. |

| | |
|---|---|
| **Ingredients:** This box is not applicable to marijuana concentrates | N/A |

| | |
|---|---|
| **Standard Production Procedure and Detailed Manufacturing Process:** | The process for creating Kief Coin concentrate consists of the marijuana/trim being placed on a screen and then shaken until the resin glands from the plant fall through and are captured by a container below the screen and then placed in a coin shape mold and pressed into a coin shape. |

| | |
|---|---|
| **Depiction:** Provide a photograph, drawing, or graphic representation of the expected appearance of the final product. | |
