Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Arctic Ice Extracts , LLC		**MJ License #:**	32497	
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Arctic Ice Extracts				
Premises Address:	972 N Satisfied Drive, Suite B				
City:	Wasilla	**State:**	Alaska	**ZIP:**	99654

AMCO Received 12/18/2023

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All marijuana and marijuana products will be tracked in Metrc from their intake at the facility, to their use in a manufactured product or disposal, to the transfer to another licensed facility. All shipments of marijuana or marijuana product that arrive at the facility will be first inspected by the licensee or designated employee before being accepted or rejected. For consistency, the shipment contents will be weighed with inspected scales and reconciled with the transport manifest, shipment labels and packaging labels. Any shipments with discrepancies will be rejected. Shipments that pass facility inspection will be accepted, immediately entered into Metrc and added to the inventory log. At the end of each business day, the licensee, a designated employee or a manager will reconcile each transfer, to or from another licensed facility, with Metrc and the inventory on hand to ensure accurate counts and to resolve discrepancies immediately. Random sample(s) of each concentrate manufactured at Arctic Ice Extracts will be sent to a licensed testing lab and the remainder of the production lot will be segregated from all other products and currency until the testing results are received. Once the passing testing results are received, marijuana products will be packaged and labeled in compliance with all AMCO regulations. The packaged products will then be transported by the licensee, a designated employee or manager, or by a third-party transport company. All transporters will have valid marijuana handler permits. All transfers will be entered into Metrc, which will generate a trip manifest that will be sent with each shipment as well as stored as an official business record.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Arctic Ice Extracts will not be using chemicals in the facility. All concentrates will be solvent-less.

Equipment:

Harvest Right - Commercial Scientific Freeze Dryer
Washing Vessels
Low Temperature Heat Press
Hoshizaki - Ice Machine 500lb Version
Joint Roller
Boldt Bags - 44 Gallon Filtration Bag Set (8 Bag)
PurePressure - Longs Peak Rosin Press & Accessories
PurePressure - Axis Trichome Separator Package (1 Vessel)
PurePressure - Commercial Hash Washing Filtration Package
Short Path Distillation unit (Centrifuge, Low-temperature Coolant Circulation Pump, Stainless steel tank, ethanol pump)
Rotary Vacuum
Freezer
Fridge
Vacuum oven

AMCO Received 12/18/2023

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Arctic Ice Extracts anticipates producing the following marijuana plant and product waste: (1) contaminated or infected marijuana or marijuana products, (2) marijuana or marijuana products (concentrates) deemed by the licensee or a manager as unfit for sale or consumption for any reason, (3) marijuana product that fails lab testing, (4) marijuana plant waste created during the extraction process, (5) marijuana or marijuana concentrates that become expired (if applicable), (6) other marijuana or marijuana concentrate waste as determined by AMCO. Once marijuana or marijuana concentrates are deemed as waste, the waste will be separated from all other marijuana and marijuana concentrates and securely stored in locked bins on the licensed premises. AMCO will be electronically notified of the intent to render the marijuana unusable, at least three days before doing so, on a form prescribed by the board. All waste will be logged in Metrc and noted in the facility Waste Log. All solid marijuana plant waste and marijuana concentrate waste will be ground and mixed with other solid compostable or non-compostable waste such as paper waste, plastic waste, cardboard waste, food waste, yard waste, vegetable grease, oil or soil until the mixture is no more than 50% marijuana waste by volume. Liquid marijuana waste, such as concentrates, will be mixed with at least equal parts of non-marijuana waste, and stored away from all other marijuana and marijuana products inside the facility in a locked waste container. The unusable waste will be placed in a secured waste storage container, until it is transported to a landfill via a designated employee or a third-party contracted waste transporter. The Waste Log information will be securely stored as an official business record and will be made available upon request to AMCO.

AMCO Received 12/18/2023

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.

Answer "Yes" or "No" to the following question: Yes No

5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)? ☐ ☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

The licensee, designated employee or manager will be responsible for collecting a random sample(s) from each production lot to be sent to a licensed testing facility. The responsible party will sign a statement certifying that the sample was randomly selected. A copy of the signed statement will accompany the sample to the testing facility and another copy will be maintained on-site as an official business record. The sample will be transported to the testing facility by the licensee, manager, employee, or third-party transport company. All transporters will have valid marijuana handler permits. The remainder of the production lot will be quarantined in secure containers, separate from all other marijuana and marijuana concentrates/products, until the passing testing results are received. During the quarantine period, all products will be securely stored on-site and kept cool and dry to prevent contamination or loss of efficacy. Testing facility results will be stored as an official business record and will be made available to AMCO upon request. All products that fail to pass testing will be rendered unusable, in compliance with all regulations.

AMCO Received 12/18/2023

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Dry Sift		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Dry Sift has a grainy, sand-like consistency, with a free-form shape. Dry Sift ranges in color from white to yellow, brown, and gold.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Dry Sift is created naturally when it falls off from plant matter. Loose, dry buds and trim will be sifted on a fine mesh screen and the siftings will be collected in a bowl, pan, or trim tray underneath. Dry Sift will be properly packaged and stored until testing and sale or use in Arctic Ice Extracts' concentrate products.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/18/2023

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Dry Sift
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Dry Sift, in amounts of not more than seven (7) grams, will be placed into small glass, plastic or silicone containers and then packaged into resealable mylar bags, blister packs, or opaque cardboard boxes with a tamper seal or child-resistant design. All final packaging will be child resistant. THC will range from 25-99%. The actual amount of total THC will be listed on the label per testing results. Products packaged in windowed mylar bags or blister packs will be placed in opaque exit packaging by the retailer prior to the customer exiting the retail store.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	Produced By: Arctic Ice Extracts License Number: 32497 Product Name: Dry Sift Strain: Batch/Lot Number: Gross Weight: Net MJ Weight: OZ(g) Best By Date: Packaging Date: Tested By: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number: Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Full Spectrum Bubble Hash		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Full Spectrum Bubble Hash is sandy or gooey in consistency, with a free-form shape. Full Spectrum Bubble Hash ranges in color from clear to yellow, brown and gold.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	To create Full Spectrum Bubble Hash cannabis concentrate, an ice water bath extraction method is used. Cannabis flower/trim is frozen and then agitated, with the use of micron-density bags to separate the components needed for production from the plant matter. Trichomes from all density micron bags are collected. The final product, Full Spectrum Bubble Hash, is properly packaged and stored until testing and sale. CBD from an approved Alaska Industrial Hemp Source may be added during Trichomes collection phase.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/18/2023

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Full Spectrum Bubble Hash
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Full Spectrum Bubble Hash, in amounts of not more than seven (7) grams, will be placed into small glass, plastic or silicone containers and then packaged into resealable, child-resistant, mylar bags, an opaque cardboard box with a tamper-evident seal, or an opaque child resistant cardboard box. THC will range from 25-99%. The actual amount of total THC/CBD will be listed on the label per testing results. Products packaged in windowed mylar bags or blister packages will be placed in opaque exit packaging by the retailer prior to the customer exiting the retail store. Sweet Gold may also be used in-house to create Arctic Ice Extracts products or sold wholesale to other licensed facilities
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met. Product Name:	Cannagar		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Cannagar will be cylindrical in shape, with its exterior wrapped in cannabis leaves, which will give it a dark green or dark brown appearance. The core of the cigar will be made with cannabis flower or trim. The leaves will be adhered to the core with SHO (solventless hash oil or rosin drops, approved Arctic Ice Extracts products).
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Firmly pack cannabis flower or trim into a cigar mold and insert a skewer through the center of the mold. Allow core to cure for several hours. After core is formed, wrap in cannabis leaves, "gluing" the leaves on with a small amount of SHO (solventless hash oil) or rosin drops (approved Arctic Ice Extracts products). Set cigars aside to cure for one month. When dry, weigh and package cigars. The final product, Cannagar, will be placed into proper storage until prepared for testing and shipping. Actual concentrate used in production will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Infused Joints		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.			

Product Description: Details must include the color, shape, and texture.	Infused Joints will have the appearance and shape of a cannabis joint, but with 3/4 of the joint dipped in (SHO) Solventless Hash Oil, Full Spectrum Bubble Hash or Rosin Drops (approved Arctic Ice Extracts products), may or may not contain bubble hash inside the joint, and coated with keif (another approved Arctic Ice Extracts product). The interior of the joint will be filled with cannabis flower or trim. The joint will be tan or brown in color.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Infusted Joints will be either rolled by hand or with the use of a pre-roll machine to produce cannabis joints. Bubble hash may be combined with flower/trim. Cannabis flower or trim is placed in the machine and rolled, removed, then 3/4 of the pre-roll is dipped in (SHO) Solventless Hash Oil, Full Spectrum Bubble hash or Rosin Drops. Next, the dipped portion of the pre-roll is rolled in kief, set on racks to dry. When dry, weigh and package joints. The final product, Infused Joints, will be placed into proper storage until prepared for testing and shipping. Actual concentrates used in production will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Rosin Drops		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Rosin Drops has a sticky, thick liquid consistency, with a free-form shape. Rosin Drops ranges in color from yellow to brown and gold.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Full Spectrum Bubble Hash (an approved Arctic Ice Extracts product) is pressed at a low temperature to create a "Bubble Hash Rosin", then heated to decarboxylate, turning the concentrate to the desired oil-like consistency. Medium-chain triglycerides (MTC Oil) is then added and blended together. CBD from an approved Alaska Industrial Hemp Source may be added during final production phase. Once Rosin Drops are ready, a sample will be sent for testing and the remainder of the batch will be packaged and segregated until test results are obtained.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Hash Rosin Badder, Hash Rosin Wet Badder		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Hash Rosin Badder has a creamy texture, similar to cake frosting, with a free-form shape, while Hash Rosin Wet Badder will appear smooth and glistening. Hash Rosin Badder, Hash Rosin Wet Badder ranges in color from yellow to brown or gold.) is sandy or gooey in consistency, with a free-form shape.

Ingredients:	N/A

Standard Production Procedure and Detailed Manufacturing Process:	To create Hash Rosin Badder, Wet Badder cannabis concentrate, Hash Rosin Badder, will be extracted from Bubble Hash Rosin in a jar and 'whipping it up' using zig-zag patterns while applying low heat until desired consistency is achieved. Product appearance will vary based on the terpene profile of the plant (liquidy consistency - Wet Badder, dryer consistency -Rosin Badder). Once rosin takes on a desirable color, chill in fridge with a loose lid for about 1 hr., then tighten lid for at least 24 hrs. The final product, Hash Rosin Badder, is then properly packaged and stored until testing and sale. For wet badder, leave rosin out at room temp for a few hrs to allow thin terpene layer to rise, smooth, and glisten. Then refrigerate after to maintain "wet" texture.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Raw Terpenes		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Raw Terpenes has a translucent amber, tan or gold color, with a sticky, thick liquid consistency.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	This cannabis concentrate Raw Terpenes, will be extracted from Bubble Hash Rosin (An approved Arctic Ice Extracts product) by creating Bubble Hash Rosin at a low temperature. Once complete, place and seal in a jar, leaving the concentrate in a warm environment for 3 - 10 days. This causes the terpenes to naturally separate. The final product, Raw Terpenes, is then properly packaged and stored until testing and sale or used in-house for concentrates such as "Diamonds and Sauce"
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Hash Rosin Jam		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Hash Rosin Jam has a semi-solid appearance and texture, with small solid portions mixed into a liquid, similar to jam or apple sauce. Hash Rosin Jam ranges in color from yellow to tan, brown, green or gold.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	This cannabis concentrate, Hash Rosin Jam, will be extracted from Bubble Hash Rosin (an approved Arctic Ice Extracts product) by placing Bubble Hash Rosin in a jar and curing it at a moderate temperature. Wait for the Rosin to 'muffin up', which usually takes about 1 hour, then reduce heat for 6 -15 hours until desired consistency is achieved. The final product, Hash Rosin Jam, is then properly packaged and stored until testing and sale. CBD from an approved Alaska Industrial hemp source may be added.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Diamonds & Sauce		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Diamonds & Sauce has two consistencies. The "Diamonds" are hard, crystalline structures within the "Sauce" which has a sticky, liquid consistency. **Diamonds & Sauce** has a translucent yellow, brown or gold color.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	This cannabis concentrate Diamonds & Sauce, will be extracted from Bubble Hash Rosin (An approved Arctic Ice Extracts product) by creating Bubble Hash Rosin, and then pressing the hash again at a higher temperature (250 +). This step 'cleans' up the debris in the hash. After waiting, squeeze the resulting THCA crystals from the catch bag, which will harden quickly, forming the diamond portion. Then, add the sauce portion, which will be the Arctic Ice Extracts product "Raw Terpenes". The final product, Diamonds & Sauce, is then properly packaged and stored until testing and sale.

Product Name:	THCA Isolate		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	THCA isolate is a white to yellow fine powder, soft to the touch and takes the shape of its container.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ground marijuana material is loaded manually into a micron bag in between a piece of parchment paper inside a heat press to extract some solventless rosin. Then wrap the screen in a piece of parchment that is 4x the size of your original rosin measurements. Next, place everything that is folded into an extra piece of parchment paper that will catch any excess runoff of terpenes and sauce. Then set the heat press to the pressure desired (250 Material PSI), and the temperature desired (110 degrees for 300 seconds). Finally increase the temperature gradually while applying the same pressure to make the solventless THCA Isolate finished product.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Smoothies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 Months Ref/1 Year Frozen
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Smoothies are a blended mixture of fruits and other ingredients, color depends on ingredients/flavors (Wildberry/Purple, Strawberry Banana/Pink, Peach/Peach, Mango/Orange, Pina Colada/White)that takes the shape if its container, usually a thick texture.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	Fruit Puree (Flavor depending), Organic Coconut Oil, Avocado Oil, Flax Seed Oil, CBD Isolate (from an approved Alaskan industrial hemp source that carries a valid product endorsement), Organic MCT (medium chain triglyceride) Oil, Arctic Ice Extracts concentrate such as; Rosin Oil, Distillate, or another approved Arctic Ice Extracts product.
Flavors: List all current and potential future flavors:	Wildberry, Strawberry Banana, Peach, Mango, Pina Colada
Standard Production Procedure and Detailed Manufacturing Process:	Mix marijuana concentrate with oils until emulsified, mix with puree, then package and refrigerate or freeze until final test results are received.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/18/2023

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Smoothies
Product Type:	Other Marijuana Product
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Smoothies will be packaged in an opaque child resistant 8oz pouch with a resealable breakaway top with lines of demarcation indicating serving size(s) on the side of the package. 1 single serving of Smoothies = 10 mg of THC TCH:CBD Ratio = 1:1 10 servings per package totaling 100 mg of THC per pouch/package Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met. Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pain Free Roll-on		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Topical		

Product Description: Details must include the color, shape, and texture.	Pain Free Roll-on is a topical thick liquid that is applied directly to the skin. Color varies from blue white to a light yellow or light green (depending on pain gel used in production), creamy or oily to the touch and takes the shape of its container.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	MCT Oil (Medium Chain Triglyceride), Pain Freeze Cream/gel, CBD Isolates (from an approved Alaskan industrial hemp source that carries a valid product endorsement), Reverse Osmosis Water, THC Concentrate such as: Rosin, Distillate or an approved Arctic Ice Extracts concentrate. Actual concentrate used in production will be clearly indicated on the final product label.
Flavors: List all current and potential future flavors:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	All ingredients will be thoroughly mixed until emulsified. Once emulsified, the final product will be packaged in roll-on applicator bottle and then stored until final test results are obtained.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/18/2023

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pain Free Roll-on
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Pain Free Roll-on will come in either an opaque 3oz or 4oz roll-on applicator bottle with screw on lid and tamper-evident seal. THC will range from 100mg to 1000mg per package. Actual THC content per ml will be clearly indicated on the final product label.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	 
AMCO Received 12/18/2023

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Distillate Oil		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible/Topical/In-house/Wholesale		

Product Description: Details must include the color, shape, and texture.	Distillate Oil is viscous in texture, with a free-form shape that fits to its container. Distillate Oil ranges in color from clear to light yellow and dark amber.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	N/A
Flavors: List all current and potential future flavors:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ethanol is frozen overnight in a freezer. Cannabis leaf/trim is then put into a 220 micron bag and put into an extraction vessel inside of the freezer. Ethanol is added to the cannabis, soaked and agitated. Ethanol is separated from the biomass, the solution is collected and the biomass-iswashed again. the lastwash ofthe ethanol *is* collected and frozen ovemigh1. The solution is then dewaxed and pushed through a filtration ·setup with nitrogen or CO2. The solution is collected and filtered again for purity. The solution is then put into a rotary evaporator to recollect the ethanol. After ethanol is recollected it's decarboxylated to remove volatiles. The solution is then put into short path distillation first pass, then a second for purity. the final product is homogenized with Terpenes on a hot plate, then packaged for cartridges. Distillate for edibles will be collected for testing after the first or second pass ofdistillation, used as is or mixed with food grade oil. CBD (from an approved Alaskan industrial hemp source that carries a valid product endorsement may be added at a 1:1 ratio)
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/18/2023

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Arctic Ice Rosin Gummies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	12 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Arctic Ice Rosin Gummies will be shaped like a marijuana leaf. The colors will be flavor depending and will be muted, so they will not attract children, texture will be gummy and chewy.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	Rosin (an Arctic Ice Extracts approved product), Sunflower Oil, Coconut Oil, Gelatin, "Jello" packs.
Flavors: List all current and potential future flavors:	Plain (no flavor) Raspberry, Black Raspberry, Cherry Lemonade, Cotton Candy, Melon Fusion, Passion Fruit, Pina Colada, Pineapple, Grapefruit, Fruit Punch, Orange, Blue Raspberry, Black Cherry, Island Pineapple, Root Beer, Sparkling Berry, Sparkling Berry Mandarin Orange, Tropical Fruit, Watermelon
Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be decarbed by placing it in a heat proof glass container and heating it to the desired temperature for approximately 30 minutes, stirring every 10 minutes until the desired texture is achieved. Combine decarbed rosin with oils, and place the mixture in a water bath at the desired temperature for 2 hours. Remove from container and place in molds until cool, then packaged and stored until final test results are received.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
