Shishmaref Strategic Management Plan

Community Participation Report: Phase I

Prepared by RIM First People

August 24, 2015

1. INTRODUCTION

The Shishmaref Strategic Management Plan (SMP) Community Participation and Input Report Phase I, describes the first phase of community participation and input. The information gathered and expressed in this report is for use in HDR's development of a Background Planning Report and eventually the Strategic Management Plan for Shishmaref.

2. COMMUNITY BACKGROUND SURVEY

Administered by the Shishmaref Community Coordination, the Community Background Survey introduced the Strategic Management Plan project to community members, assessed their knowledge of previous planning activities and helps the Project Team understand the needs and concerns of the community. A copy of the Community Background Survey can be found under Attachment A.

Date of Surveying: May 5th, 2015 – July 14th, 2015

Number of Respondents: 68

The following are the results of the Community Background Survey:

4. ELDER INTERVIEWS

In order to ensure the input of the community elders in the Strategic Management Plan process, the Shishmaref Community Coordinator interviewed a selection of Elders from the community. The format of the interviews was meant to prompt a conversation to be recorded or noted. An overview of the respondent's comments is provided as the information is not as easy to metrically record. A copy of Elder interview questions can be found in Attachment A.

Date of Surveying: May 5th, 2015 – July 14th, 2015

Number of Respondents: 8

Elder Interview Summary:
8 Elders were interviewed between the ages of 68 and 79 years old. Most of the elders interviewed were born and raised in Shishmaref. They remember a place with less people and more land, with lots of grass, hills, ponds, where people lived a hard working subsistence lifestyle. They remember it being peaceful, that the community raised the children and the children respected their elders. They report large changes in their weather – how late the ice comes and how the density has changed, how mild the storms and wave action once was and how more sea ice was available to them. Many of them fear that the village won't exist for their grandchildren's grandchildren to see or experience. They hope that their ancestors live a traditional lifestyle, are well educated and have respect for each other. One elder wrote, "I want them to be like their ancestors and be proud of who they are".

5. CLASSROOM EXERCISE

Because school was out during the community meeting, we were unable to complete the classroom exercise. A classroom exercise will be completed when school is back in session.

6. COMMUNITY GATHERING

In addition to introductions and a project overview, the Project Team gathering input to identify and prioritize the community's top issues and values. A copy of the Community Gathering Agenda, the meeting flyer, meeting graphics and Sign-In sheet can be found under Attachment A.

The 161 participants recorded on the sign in sheet include 67 children and 94 adults. Both children and adults were offered the opportunities to identify their top issues and values. Many of the Community Gathering participants completed the Community Background Survey.

Date of Meeting & Time: July 14th, 2015, 1pm

Meeting Location: Shishmaref Community Hall

Method of Advertizing: Meeting Flyer Postings and VHF

Number of Meeting Participants: 161

a. Community Issues:

In order to confirm the community's top issues, a portion of the meeting was devoted to establishing and prioritizing community issues. The Project Team presented a list of issues identified through research, the background planning report and community surveys. Meeting participants were asked to first break into small groups and identify ten additional issues. Once they identified additional issues, they reported them back to the whole group and this was recorded at the front of the room on the issues list. After all reporting was complete, the Project Team asked if there were any other issues to record and recorded those as well. With all issues identified, the Project Team asked participants to individually rank their top three most important issues on the list. Adults were given red dots and the youth were given orange dots to distinguish the votes.

FINDINGS: According to the independent voting at the Community Gathering, the top three issues identified by meeting participants were (1) the need for sewer and water, (2) the need for a recreation center for youth and a tie for third between (a) lack of housing to meet shortage needs, (b)the need to relocate and (c) the need for jobs and economic opportunity.

The following findings and data have been synthesized to eliminate duplication or group similar ideas together. Note that each participant was given the opportunity to select their three highest ranking issues, however the total votes shown in the tables below reflect that not all meeting participants voted.
