To whom it may concern,

My name is Travis D. McCullough and I live at 48746 Jones Rd. I have three children and have lived at my residence for over ten years. There are many neighbors around me that have children as well. We have had problems in the past with Meth labs and drugs being distributed and manufactured in our area. Because of that the safety of my family has come into question more than once. Thanks to the State Troopers many of those problems have been removed. I know the residents have children of their own that they may not mind influencing with a drug that has killed many people, but I have worked tirelessly to train and mold my children into the best men and women they can be. Having a drug grown in my backyard will do nothing but hinder that process, and continue to put them in danger.

In my ten years living at my residence I have worked to increase the value of my property and those surrounding it. Having a marijuana growing facility by my house will inevitably drop the property value, or make it so that it will be difficult to resale.

When a drug is manufactured, grown, or distributed certain problems usually arise that can and do affect others. Marijuana is a drug that has a long history of abuse and problems. The State Troopers have been fighting the effects of this drug across the state for years and can attest to its destructive power. I have already had drugs in our neighborhood make my family unsafe because of the actions of both the ones producing, and the ones purchasing. There is no need for drug cultivation in our neighborhood.

I am requesting that the license for Marijuana production License Number 10086 for Terra House LLC at 48714 Jones Rd be denied because of the location in a personal residence located in a neighborhood, the possible safety concerns to my family, the potential property loss, and demographics surrounding the proposed production facility.

A Concerned Citizen,

Travis D. McCullough
