Staff,

Yes, that is the point. Dir. Franklin identified that the first premises diagram included potentially more than 500 sq. feet under cultivation.
The issue is whether the 500 feet includes all aspects of growing, in all the stages of growth.

I have revised the diagram to limit the "under cultivation" area to under 500 feet, which will require altering the area significantly, which the new diagram reflects.

Regards,

Hello,

Just to verify. Are you trying to amend your diagram to show that you only intend to have under 500 square feet of cultivation?

Please verify this as I will need to type you up an incomplete letter that will show everything that needs to be addressed on your application, including the diagram.

Thank you

Please review this revised Premises diagram. This follows the determination by Dir. Franklin the first drawing exceeded the space allowed under a limited cultivation license.
