---

Documents requested for correction letter.

MJ-01 employee badge now has a label where the photo will go

MJ-02 page 1 now has the correct license number listed and initialed.

The attachment #12 is now enhanced to show individual area dimensions and square footage under canopy. It was, and is, 498 sq ft.

All attachments were supplied per directions, Dimensions, Perimeter,, Restricted area and Canopy.

A single document would have unreadable due too much information in too small a space.

A separate attachment (13b) has been created in an attempt to show location of the surveillance computer room. A third dimension was added to show it is 9 feet off the ground on the first floor. There are stairs going up to the 2nd floor from the transition area at the doorway of the computer room.

No document supplied for MJ-04, page 3, second box. Cannot be summarized or abbreviated because all the information is pertinent. When this information was supplied on a prior application it was not acceptable because the auto font made the print too small, and a request was made to supply an attachment the was legible.

Thank You,

Jim Gossman
