Alaska Marijuana Control Board

Cover Sheet for Marijuana Establishment Applications

What is this form?

This cover sheet **must** be completed and submitted any time a document, payment, or other marijuana establishment application item is emailed, mailed, or hand-delivered to AMCO's main office.

Items that are submitted without this page will be returned in the manner in which they were received.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	EINSTEIN ENTERPRISES, INC.	**License Number:**	10082		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	EINSTEIN LABS				
Physical Address:	2939 Porcupine Dr., Suite B				
City:	Anchorage	**State:**	AK	**Zip Code:**	99501 - 3118
Designated Licensee:	Justin Roland				
Email Address:	einsteinlabsak@gmail.com				

Section 2 – Attached Items

List all documents, payments, and other items that are being submitted along with this page.

Attached Items:	MJ-15 Operating Plan Changes $250.00 Change Fee

Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

What is this form?

This operating plan change form is required for all marijuana establishment licensees seeking to change a licensed marijuana establishment's existing operating plan, under 3 AAC 306.100. With this form, a licensee may request changes to as much or as little as desired of Form MJ-01 and/or the corresponding operating plan supplemental for the establishment's license type.
The required $250 change fee may be made by credit card online (VISA, MasterCard, or Discover), or by check or money order.

Please download, complete, and submit with this form **only the pages** of Form MJ-01 and/or the corresponding operating plan supplemental that contain sections that you are requesting to change. All fields that are left blank will be considered unchanged from the existing operating plan. All fields that are completed and submitted with this form will be considered as changes to the existing operating plan and are subject to board approval. **Please do not submit any wholly unchanged pages of an operating plan.**

The form(s) that I am requesting board approval to change is:

- [x] **Form MJ-01:** Marijuana Establishment Operating Plan
- [ ] **Form MJ-03:** Retail Marijuana Store Operating Plan Supplemental
- [ ] **Form MJ-04:** Marijuana Cultivation Facility Operating Plan Supplemental
- [x] **Form MJ-05:** Marijuana Product Manufacturing Facility Operating Plan Supplemental
- [ ] **Form MJ-06:** Marijuana Testing Facility Operating Plan Supplemental

This form must be completed and submitted to AMCO's main office prior to changing existing operations. The licensed establishment's operations may not be altered unless and until the Marijuana Control Board has approved of the changes. Please note that licensees seeking to change operating plans for multiple licenses must submit a separate completed copy of this form for each license.

Brief Explanation of Changes to Operating Plan-MJ 15

- On form MJ-01 in the section on storage, management & disposal of waste we are requesting approval to add failed tested concentrates into the disposal and reuse process approved for expired or outdated concentrates.
- On form MJ-01 in the section of preparing, packaging, and securing marijuana for transport we are requesting a name change from "The Klear" to "Terpplucent".
- On form MJ-05 in the section on plan for expired or outdated marijuana wea re requesting approval to match MJ-01 by adding in failed tested concentrates into the disposal and reuse process approved for expired or outdated concentrates.
- On form MJ-05 we are asking to change the name "The Klear" to "Terpplucent" and provided updated pictures on the product page to reflect our product versus a general picture.
- On MJ-05 in the Leaf Chew product section we are asking to add in a child-resistant bottle for additional packaging options as well as adjusting our packages to contain one (1) serving up to ten (10) servings in one package. We also wanted to provide more clarity in stating out propylene glycol versus leaving it general under glycerin.
- On form MJ-05 in the E-Blunt section we are asking for approval on updated packaging options. Slim= requesting to add a glass top option as well as a brown cigar style wrapped option. Refill= requesting that the refill vial that comes with it be optional, adding a glass top refill option. Casino= requesting that the casino style packaging be approved in silver and a brown, cigar style wrapping.

Form MJ-01: Marijuana Establishment Operating Plan

(Additional Space as Needed):

Attachment Q Storage, Management, & Disposal of Waste Continued (5):

Wastewater

Einstein Labs will utilize the following plan for wastewater disposal due to generating waste water when creating products, cleaning kitchenware after creating edibles as well as cleaning items used in making lotions, salves and tinctures. Record of disposal will be logged with the date of disposal and the name and MJ Handler number of the agent responsible for disposal.

1. Einstein Labs will provide a copy upon request of the MSDS sheets for all chemicals that will be used in the production of our products.
2. Einstein Labs will test our drain to determine if there are chemicals in the drain and water that could not be in compliance and conform to federal, state and local requirements.
3. Wastewater that can not be spent down the drain will be pumped and transferred into commercial grade 20-55 gallon drums with sealable lids using all safety and sanitation methods listed in the solid waste section above. Wastewater will then be transferred to a wastewater facility as necessary.

Expired, Failed Test or Outdated Concentrate Disposal & Reuse

Marijuana and marijuana product will be checked weekly (visually looking at it as well as checking the dates in the inventory tracking system) by an authorized employee to assess for expired or outdated product. If outdated or expired concentrate products are found it will be separated from unexpired/outdated product, weighed and updated in the inventory tracking system.

Marijuana concentrates that are found to be expired, outdated or has failed testing will either be disposed of as outlined in the solid waste disposal plan or will be re-processed using a distillation method to create RSO (Rick Simpson Oil)/capsules. If the expired, outdated or ____ failed test product is being processed into RSO/capsules, it will be logged into the inventory tracking system and then processed throu gh a distillation process that will remove any contaminants and bring the concentrate back to a pure and clean cannabis oil. The oil will then be used to create RSO and/or capsules (Einstein Labs product) that will be tested and sold as a new product. After the distillation process the product is as pure as the originally processed concentrate before becoming expired or outdated and will pass all testing requirements as outlined in 3 AAC 306.550. All applicable notifications will be provided to AMCO for approval as applicable.

Attachment D Plan for Expired or Outdated Marijuana Continued:

Sample grinder below:

LEM Manual Meat Mixer/Grinder w/ 25 lb. Hopper (or comparable).

Once rendered unusable, marijuana and marijuana product will be securely stored in a locked bin located in the kitchen/refinement/packaging room inside the Product Manufacturing Facility, and all locks will comply with the highest standards of the UL standards. The disposed marijuana will not be stored outside the Product Manufacturing Facility at any time.

Unusable aste will be transferred to a solid waste facility or transfer station or incinerator and a record of the final destination will be maintained as part of the business record (3 AAC 306.470 (c)(2). Prior to being removed from the Product Manufacturing Facility, all marijuana waste will be inspected and the composition of the final disposal mixture will be recorded. Management will ensure that the final disposal mixture is composed of no more than fifty percent (50%) marijuana waste by volume.

All marijuana rendered unusable and disposed of will be tracked using the Metrc system (and BioTrack as applicable) and the following information will be recorded:

1. A description of and reason for the marijuana being disposed of, including the weight of the plant(s) or item(s);
2. The date of disposal;
3. Confirmation that the marijuana was rendered unusable before disposal;
4. The method of disposal; and
5. The name and permit number of the agent responsible for disposal.

Expired, Failed Test or Outdated Concentrate Disposal & Reuse

Marijuana and marijuana product will be checked weekly (visually looking at it as well as checking the dates in the inventory tracking system) by an authorized employee to assess for expired or outdated product. If outdated or expired concentrate products are found it will be separated from unexpired/outdated product, weighed and updated in the inventory tracking system.

Attachment D Plan for Expired or Outdated Marijuana Continued (2):

Marijuana concentrates that are found to be expired, has failed testing or outdated will either be disposed of as outlined in the solid waste disposal plan or will be re-processed using a distillation method to create RSO (Rick Simpson Oil)/capsules. If the expired or outdated product is being processed into RSO/capsules, it will be logged into the inventory tracking system and then processed through a distillation process that will remove any contaminants and bring the concentrate back to a pure and clean cannabis oil. The oil will then be used to create RSO/capsules (Einstein Labs product) that will be tested and sold as a new product. After the distillation process the product is as pure as the originally processed concentrate before becoming expired or outdated and will pass all testing requirements as outlined in 3 AAC 306.550.

Overall waste disposal system management is the responsibility of the Manufacturing Manager and any faulty materials or breakdowns will be promptly attended too. Authorized employees participating in the operation and procedure of waste disposal will be trained on all procedures, understand state, federal and local laws and regulation pertaining to waste disposal and report any discrepancies in procedures to the Manufacturing Manager and CEO to ensure proper
steps are taken including; a thorough investigation, cleanup efforts, re-training or other steps as required.

Ownership and Management will give at least three (3) days notice to the Marijuana Control Board before disposing of any marijuana product waste by logging the affected products into the marijuana inventory tracking system, Metrc (BioTrack as applicable). Records of all disposal information and waste collection will be maintained by Management, securely stored at the Product Manufacturing Facility and made available to the Board upon request.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Terpplucent
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Terpplucent is transparent and ranges from clear to clear with a light yellow tint that has a gooey and smooth consistency. Terpplucent is sticky and oily in nature and forms to the container it is in. Comes in a variety of strains with varying THC and CBD levels. Used for inhalation, vaping & making edibles.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Cannabis oil is extracted through a closed loop machine using live flower or trim with one of the following solvents; Butane, N-Butane, Iso-Butane (a combination of) or Ethanol. The solution is strained & purged to remove all lipid matter and solvents from the product to below regulated ranges pursuant to 3 AAC 306.645. The concentrated product is then distilled to create a clear product. Estimated expiration is one (1) year.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
