Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

What is this form?

An operating plan is required for all marijuana establishment license applications. Applicants should review Title 17.38 of Alaska Statutes and Chapter 306 of the Alaska Administrative Code. This form will be used to document how an applicant intends to meet the requirements of those statutes and regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020(c).

What must be covered in an operating plan?

Applicants must identify how the proposed premises will comply with applicable statutes and regulations regarding the following:

- Control plan for persons under the age of 21
- Security
- Business records
- Inventory tracking of all marijuana and marijuana product on the premises
- Employee qualification and training
- Health and safety standards
- Transportation and delivery of marijuana and marijuana products
- Signage and advertising

Applicants must also complete the corresponding operating plan supplemental forms (**Form MJ-03, Form MJ-04, Form MJ-05,** or **Form MJ-06**) to meet the additional operating plan requirements for each license type.

Section 1 – Establishment & Contact Information

Enter information for the business seeking to be licensed, as identified on the license application.

AMCO Received 8/31/2018

Section 2 – Control Plan for Persons Under the Age of 21

2.1. Describe how the marijuana establishment will prevent persons under the age of 21 from gaining access to any portion of the licensed premises and marijuana items:

Scorpion Grass will have policies and training in place to prevent individuals under 21 from entering any part of the licensed premises. The entire premises will be designated as a restricted access area with signage posted on and around the building stating "Restricted Access Area: Visitors Must Be Escorted" as well as signs stating, "No One Under 21 Year of Age Allowed" and "Video and Audio Surveillance in Progress". Video surveillance cameras will be visible throughout the facility as well as around the exterior perimeter of the building to continuously monitor the premises and to deter unauthorized and underage individuals from attempting to access the premises.
There will be one main entrance for employees and an emergency exit. Both of which will remain locked at all times and will require a key code to unlock the door. Key codes will be personalized for each employee to allow the licensees and management team to track access and entry. The door will also be equipped with a door sensor, connected to the security alarm system, that will be triggered if an attempted intrusion occurs. If triggered, both an audible alarm as well as an electronic notification to the third party off-site monitoring center as well as to the licensees and general manager's mobile phones will be sent.
Any visitors to the facility, with the exception of law enforcement, AMCO Enforcement or other duly authorized individuals, must be pre-arranged with a licensee or member of the management team. Visitors will be required to produce a valid, government issued, photo ID proving they are at least 21 years of age before being allowed to enter the premises. Any individual that does not produce said ID will be informed to exit the property immediately and that law enforcement will be contacted for back up if they do not comply promptly.

Section 3 – Security

Restricted Access Areas (3 AAC 306.710):

3.1. Describe how you will prevent unescorted members of the public from entering restricted access areas:

The manufacturing facility is located on the second floor of the building and will be designated as a restricted access area in it's entirety with signage posted on and around the building stating "Restricted Access Area: Visitors Must Be Escorted" as well as signs stating, "Video and Audio Surveillance in Progress". Video surveillance cameras will be visible throughout the facility as well as around the exterior perimeter of the building to continuously monitor the premises and to deter unauthorized individuals from attempting to access the premises.
There will be one main entrance (located on the first floor of the building) for employees and an emergency exit. Both of which will remain locked at all times and will require a key code to unlock. The main entrance is further secured by a locked, gated fence with access controlled via remote. The licensees and general manager will control who has access to the remotes that will unlock the gate and allow access to the main entrance. Key codes will be personalized for each employee to allow the licensees and management team to track access and entry. The door will also be equipped with a door sensor, connected to the security alarm system, that will be triggered if an attempted intrusion occurs. If triggered, both an audible alarm as well as an electronic notification to the third party off-site monitoring center as well as to James and Lisa's mobile phones will be sent.
All employees will be required to clearly display on their person an employee ID badge bearing their photograph at all times while on the licensed premises. Employees will also be required to either keep their marijuana handler permit on their person during working hours or filed on-site. All visitors will be required to sign in to the visitor log and clearly display on their person a visitor badge at all times while on the premises. This will help everyone to easily identify individuals that have been authorized to access the premises.

3.2. Describe your recordkeeping and processes for admitting visitors into and escorting them through restricted access areas:

With the exception of law enforcement, AMCO Enforcement or other duly authorized agent, all visitors will be required to pre-arrange their visit with a licensee or member of the Scorpion Grass management team. Visitors will be instructed to arrive at the retail store main entrance where they will be escorted to the employee main entrance by a Scorpion Grass employee. A designated employee or licensee will meet the individual at the employee entrance door and will immediately ask to see their valid, government issued, photo identification regardless of how familiar the employee or licensee is with the potential visitor. Once the age and identity of the individual has been confirmed as being at least 21 years of age and a pre-arranged visitor or duly authorized agent, they will be allowed to enter the building and sign into the visitor log. The visitor log will record the individual's full name, organization if applicable, date, time in and out of the facility and reason for the visit. Each visitor (with the exception of law enforcement, AMCO Enforcement or other duly authorized agent such as from the Mat-Su Borough or Health Dept) will be issued a visitor badge and will be instructed to clearly display it on their person at all times while on the licensed premises and return the badge upon exit. At this time, the employee or licensee will brief the visitor on the company's policy's regarding hygiene, safety, regulatory compliance and any other pertinent information the visitor should be aware of while inside the manufacturing facility. A designated employee or licensee will escort and actively supervise the visitor(s) during the entire visit. At no time will there be more than 5 visitors per supervising employee or licensee on the premises. Once the visit has concluded, all visitors will be required to exit the premises and return their visitor badges.
The visitor log will be filed in the locked cabinet within the secured, shared office located on the second floor of the building and will be backed up electronically to the company's computer hard drive (the office is shared between the co-owned (same licensees and entity) and co-located cultivation, retail and manufacturing facilities as shown on the premises diagram). The visitor log will be made available to AMCO Enforcement or other agent of the MCB upon request.

Received by AMCO 2.26.18

3.3. Provide samples of licensee-produced identification badges that will be displayed by each licensee, employee, or agent while on the premises, and of visitor identification badges that will be worn by all visitors while in restricted access areas:

Security Alarm Systems and Lock Standards (3 AAC 306.715):

3.4. Exterior lighting is required to facilitate surveillance. Describe how the exterior lighting will meet this requirement:

Scorpion Grass will ensure that adequate exterior lighting is installed throughout the property and will be sufficient to facilitate video surveillance. Four to six commercial, LED lights with extremely bright bulbs will be used in all exterior light fixtures as well as motion detection sensors. The licensees and/or management team will ensure light fixtures are installed in such a way to keep the exterior of the premises, signs and doors well lit and to allow surveillance cameras to clearly record individuals that are within twenty (20) feet from any entry point. Exterior lighting, as well as video surveillance recordings and cameras will be inspected frequently by the licensees and/or the management team to ensure that each light is functioning and there is sufficient lighting for surveillance. Additional lighting will be installed as/if needed.

Received by AMCO 2.26.18

3.5. An alarm system is required for all license types that must be activated on all exterior doors and windows when the licensed premises is closed for business. Describe the security alarm system for the proposed premises, explain how it will meet all regulatory requirements, and outline your policies and procedures regarding the actions to be taken by a licensee, employee, or agent when the alarm system alerts of an unauthorized breach:

Scorpion Grass will contract with a third party security company to install the alarm system, maintain the equipment, periodically test the devices and continuously monitor the facility at an off-site security monitoring center. The alarm system will be set up to monitor for intrusions with motion detectors in all areas of the building, active during closed hours, as well as door sensors on every exterior door (there are no doors leading to the manufacturing facility as it is on the second floor, this refers to the main entrance and emergency exit doors) and glass break sensors on each exterior window (the building will only have windows to the retail store and the office). If triggered, an automatic, electronic alert will be sent to the security monitoring center as well as to James and Lisa's cell phones and/or the general manager. This will also trigger an audible alarm to help deter potential intruders. Live security footage will also be accessible to the licensees and/or the general manager via their cellular phones so they may keep an eye on the facility even when they are away.
The alarm system will be active at all times that the facility is closed. The last employee or licensee to leave the facility each night will activate the alarm system and the first employee or licensee to arrive in the morning will deactivate the system.
In the event that the alarm system sends an electronic alert to local law enforcement to notify them of an unauthorized breach, the management team will evacuate the building (if it's safe to do and necessary) to a pre-determined safe location. A designated employee will take a head count of employees and any visitors that may have been on the premises to ensure everyone is accounted for. Management will await instruction from law enforcement and comply with all directives. Once it is safe to do so, employees will return to the facility and inspect for property damage, theft, take inventory and submit all necessary and requested documentation to law enforcement officials and to AMCO enforcement. Additionally, any event that occurs on the licensed premises that involves local law enforcement will be promptly reported to AMCO Enforcement via email.

3.6. Describe your policies and procedures for preventing diversion of marijuana or marijuana product, including by employees:

The video surveillance system will continuously monitor storage, product manufacturing areas, and packaging areas. Employees will perform mandatory inventory counts each week and document the reports as official business records. Additionally, the management team will perform routine internal audits by reconciling the inventory on hand with the recorded data in METRC to ensure they match. Scorpion Grass will not tolerate any theft or diversion, and all employees will complete mandatory training in recognizing such activity. Scorpion Grass understands that diversion is a two-way street and is equally profitable diverting product out of the legal system as it is diverting product from the illegal system into the legal market. In the event that theft or diversion is suspected, all employees will be trained to alert management immediately. In the event that an employee is caught stealing marijuana or marijuana products, OR infusing the facility with non-regulated black-market product, Scorpion Grass will notify local law enforcement and AMCO enforcement immediately, comply with all directives, and provide all necessary information and records for the investigation. James, Lisa and the general manager will take the necessary steps to ensure that illegal conduct by an employee does not compromise the facility's license and legitimate business operations. Once a theft is reported, the general manager will update the product records in the tracking system, as needed, to maintain an accurate and comprehensive accounting for all marijuana products and inventory. Lisa, James and the general manager will comply with all inquiries and investigations lodged by AMCO as a result. Documentation related to marijuana theft will be maintained as a business record for five (5) years and made available to AMCO upon request. Video recordings will be stored for at least forty (40) days. Cameras will provide a full view of the manufacturing areas, entryway, safes, money counting areas, and product packaging areas. Security monitors and video recording equipment will be located in the shared office on the second floor of the building with access limited to James, Lisa and the general manager.

3.7. Describe your policies and procedures for preventing loitering:

Signage stating "No Loitering" and that the premises is under video surveillance will be prominently posted around the facility. Designated Scorpion Grass personnel will be trained to perform routine, but unscheduled patrols of the premises to check for individuals with no official business on the property. Individuals found to be loitering on the premises will be met with a verbal request to exit the premises per the no loitering policy and if they do not comply law enforcement will be contacted for back up. Additionally, the employee main entrance will be secured by a locked gated fence to help prevent unauthorized access and/or loiterers.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

3.8. I certify that if any additional security devices are used, such as a motion detector, pressure switch, and duress, panic, or hold-up alarm, to enhance security of the licensed premises, I will have written policies and procedures describing their use. JH

Received by AMCO 2.26.18

Video Surveillance (3 AAC 306.720):

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

3.9. The video surveillance and camera recording system for the licensed premises covers each restricted access area, and both the interior and exterior of each entrance to the facility. L.H

3.10. Each video surveillance recording: is preserved for a minimum of 40 days, in a format that can be easily accessed for viewing (consistent with the Alcohol & Marijuana Control Office's approved format list); clearly and accurately displays the time and date; and is archived in a format that does not permit alteration of the recorded image. L.H

3.11. The surveillance room or area is clearly defined on the Form MJ-02: Premises Diagram that is submitted with this application. L.H

3.12. Surveillance recording equipment and video surveillance records are housed in a designated, locked, and secure area or in a lock box, cabinet, closet or other secure area where access is limited to the licensee(s), an authorized employee, and law enforcement personnel (including an agent of the Marijuana Control Board). L.H

3.13. Describe how the video cameras will be placed to produce a clear view adequate to identify any individual inside the licensed premises, or within 20 feet of each entrance to the licensed premises:

Surveillance cameras will be positioned along the building with ample lighting, and checked regularly to prevent obstructions and to get the best facial image of anyone within twenty (20) feet of all access points (the only access points are located on the first floor of the building) . Video surveillance cameras will be placed strategically to record all areas of the facility inside and outside, at a variety of angles. All doors and marijuana storage areas will have video coverage to clearly identify the faces of those present. Cameras at the external corners of the facility will record activity on each side of the building. The parking lot will have video coverage to identify vehicles. A failure notification system will be installed to provide audible and visual notification of any failure in the surveillance system so that it can be immediately resolved. During a power outage all video cameras and recording equipment will be run on emergency power with a battery backup system to ensure that they can continue to operate for at least one (1) hour.

3.14. Describe the locked and secure area where video surveillance recording equipment and original copies of surveillance records will be housed and stored, and how you will ensure the area is accessible only to authorized personnel, law enforcement, or an agent of the Marijuana Control Board. If you will be using an offsite monitoring service and offsite storage of video surveillance records, your response must include how the offsite facility will meet these security requirements:

All surveillance recording equipment and footage will be stored in the shared office, located on the second floor, with backups on site. The office will be accessible only by Lisa, James and the company's general manager, and any authorized AMCO agents or law enforcement. The office will have an advanced, reinforced security door, locked at all times. The door will be equipped with an employee personalized code entry system, and a spring-loaded hinge. Lisa, James and the general manager will have remote access to surveillance recordings to monitor operations virtually. The security system will be password protected to prevent any data tampering, and recorded data will be stored for a minimum of forty (40) days as an official business record. All surveillance footage will be accessible for upload to a separate hard drive in the event that it must be stored longer for criminal, civil, or administrative investigations. All recordings will be time and date stamped, and archived in a format that prevents alteration of the recorded image. Recordings and surveillance data will be available to AMCO, AMCO Enforcement and local law enforcement upon request.

Received by AMCO 2.26.18

Section 4 – Business Records

Review the requirements under 3 AAC 306.755. All licensed marijuana establishments must maintain, in a format that is readily understood by a reasonably prudent business person, certain business records.

4.1. I certify that the following business records will be maintained and kept on the licensed premises: Initials

a. **all books and records necessary to fully account for each business transaction conducted under my license for the current year and three preceding calendar years** *(records for the last six months must be maintained on the licensed premises; older records may be archived on or off-premises)*; L.H

b. **a current employee list setting out the full name and marijuana handler permit number of each licensee, employee, and agent who works at the marijuana establishment;** L.H

c. **the business contact information for vendors that maintain video surveillance systems and security alarm systems for the licensed premises;** L.H

d. **records related to advertising and marketing;** L.H

e. **a current diagram of the licensed premises, including each restricted access area;** L.H

f. **a log recording the name, and date and time of entry of each visitor permitted into a restricted access area;** L.H

g. **all records normally retained for tax purposes;** L.H

h. **accurate and comprehensive inventory tracking records that account for all marijuana inventory activity from seed or immature plant stage until the retail marijuana or retail marijuana product is sold to a consumer, to another marijuana establishment, or destroyed;** L.H

i. **transportation records for marijuana and marijuana product, as required by 3 AAC 306.750(f); and** L.H

j. **registration and inspection reports of scales registered under the Weights and Measures Act, as required by 3 AAC 306.745.** L.H

4.2. A marijuana establishment is required to exercise due diligence in preserving and maintaining all required records. Describe how you will prevent records and data, including electronically maintained records, from being lost or destroyed:

All Scorpion Grass facility records will be managed by James and Lisa and as the business grows the two may designate an employee to help assist with management of the records, who will be trained in standard retention policies prior to beginning work to ensure that all business records are stored and maintained in a standardized, consistent, and organized fashion. All business records, including operational and regulatory documents, recordings, surveillance, financial books, inventory and employment records, logs, manifests, and communications, will be stored in the office and backed up on an off-site server to protect against loss and destruction. Records within the facility will be stored for six (6) months in the secured locked cabinet located within the licensed premises, as identified on the license premises diagram, older records will be stored in the shared office. Only James and Lisa will have access (absent direct request from AMCO or law enforcement to inspect office physically). All records will be made available to AMCO upon request.

AMCO Received 9/10/2018

Section 5 – Inventory Tracking of All Marijuana and Marijuana Product

Review the requirements under 3 AAC 306.730. All licensed marijuana establishments must use a marijuana inventory tracking system capable of sharing information with Metrc to ensure all marijuana cultivated and sold in the state, and each marijuana product processed and sold in the state, is identified and tracked from the time the marijuana is propagated from seed or cutting, through transfer to another licensed marijuana establishment, or use in manufacturing a marijuana product, to a completed sale of marijuana or marijuana product, or disposal of the harvest batch of marijuana or production lot of marijuana product.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

5.1. My marijuana establishment will be using Metrc, and if any other tracking software is used, it will be capable of sharing information with Metrc. L.H

5.2. All marijuana delivered to a marijuana establishment will be weighed on a scale registered in compliance with 3 AAC 306.745. L.H

5.3. My marijuana establishment will use registered scales in compliance with AS 45.75.080 (Weights and Measures Act), as required by 3 AAC 306.745. L.H

Section 6 – Employee Qualification and Training

Review the requirements under 3 AAC 306.700. A marijuana establishment and each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or a marijuana product, or who checks the identification of a consumer or visitor, must obtain a marijuana handler permit from the board before being licensed or beginning employment at a marijuana establishment.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

6.1. Each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or marijuana product, or who checks the identification of a consumer or visitor, shall obtain a marijuana handler permit from the board before being licensed or beginning employment at the marijuana establishment. L.H

6.2. Each licensee, employee, or agent who is required to have a marijuana handler permit shall keep that person's marijuana handler permit card in that person's immediate possession (or a valid copy on file on the licensed premises) when on the licensed premises. L.H

6.3. Each licensee, employee, or agent who is required to have a marijuana handler permit shall ensure that that person's marijuana handler permit card is valid and has not expired. L.H

6.4. Describe any in-house training that will be provided to employees and agents (apart from a marijuana handler course):

Qualified candidates will be hired on a probationary period during which time they will receive training and evaluation specific to their position. Training will include marijuana industry topics; safety precautions and procedures; legal issues; and state, local, and federal regulations. Training will take place throughout the year, as well as when topics arise that need further explanation. James, Lisa and the general manager will personally present or arrange training and education to employees. Within the probationary period, all new employees will be required to meet with the general manager to learn the company's business approach and to adopt the standard of service. Educational packets will be provided to each manufacturing employee to be read and reviewed. The educational packets will discuss relevant cannabinoids in the marijuana plant as well as in each product produced by Scorpion Grass, marijuana benefits and risks, and general Alaska marijuana law. Packets will also include safety procedures that specifically address the facility's security measures and controls for the prevention of diversion, theft, and loss of marijuana such as emergency response procedures and state and federal statutes regarding confidentiality. As proper safety and security procedures are of the utmost importance to James and Lisa, the most up-to-date reading materials will be available to employees at all times. Management will conduct quarterly staff meetings with the purpose of updating all employees on new state and local regulations, assuring that each employee is performing within company procedure, assessing any procedural changes that are needed, and addressing any comments or concerns from the staff. Prior to beginning work, employees will be expected to understand: (1) Alaska laws, regulations, and codes governing the marijuana industry and marijuana establishments; (2) all of the permitting requirements to act as a marijuana handler (including obtaining a Marijuana Handler permit from AMCO Enforcement after completing a state approved course prior to commencing employment) and to work in a marijuana establishment; (3) Scorpion Grass standards, operational protocol, and best practices with regard to all phases of manufacturing and the sale of marijuana; (4) general safety procedures and security protocol; (5) how to think defensively if threatening situations occur, and how to recognize the signs of impairment, drug abuse, and instability in co-workers; (6) in-depth information about our particular products; (7) in-depth information on the requirements of each room, task, and system; (8) the general federal, state, and local employment regulations by which Scorpion Grass is governed; and (9) manufacturing-specific education. To ensure full coverage for each position, all employees will be cross-trained on the requirements of each job. Scorpion Grass will encourage staff to attend seminars, conferences, and workshops, and Management will maintain a library of resources on marijuana topics, available to employees at all times. The state and local marijuana regulations and laws will be posted in the facility for reference. All new hires will be required to meet with the general manager to go over employment documents, specific tasks, educational materials, facility features, security and position-specific training.

Received by AMCO 2.26.18

Section 7 – Health and Safety Standards

Review the requirements under 3 AAC 306.735.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

7.1. I understand that a marijuana establishment is subject to inspection by the local fire department, building inspector, or code enforcement officer to confirm that health or safety concerns are not present. K.H

7.2. I have policies regarding health and safety standards (including: ensuring a person with an illness or infection does not come into contact with marijuana or marijuana product; good hygienic practices; cleaning and maintenance of equipment and the premises; pest deterrence; chemical storage; sanitation principles; and proper handling of marijuana and marijuana product) and will take all reasonable measures and precautions to ensure that they are met or exceeded. K.H

7.3. I have policies to ensure that any marijuana or marijuana product that has been stored beyond its usable life, or was stored improperly, is not salvaged and returned to the marketplace. K.H

7.4. I have policies to ensure that in the event information about the age or storage conditions of marijuana or marijuana product is unreliable, the marijuana or marijuana product will be handled in accordance with 3 AAC 306.735(d). K.H

Answer "Yes" or "No" to each of the following questions:

	Yes	No
7.5. Adequate and readily accessible toilet facilities that are maintained and in good repair and sanitary condition are clearly indicated on my Form MJ-02: Premises Diagram.	☑	☐
7.6. Convenient handwashing facilities with running water at a suitable temperature are clearly indicated on my Form MJ-02: Premises Diagram.	☑	☐

7.7. If you answered "No" to either 7.5 or 7.6 above, describe how toilet and/or handwashing facilities are made accessible, as required by 3 AAC 306.735(b)(2):

Section 8 – Transportation and Delivery of Marijuana and Marijuana Products

Review the requirements under 3 AAC 306.750.

8.1. Describe how marijuana or marijuana product will be prepared, packaged, and secured for shipment. Include a description of the type of locked, safe, and secure storage compartments to be used in vehicles transporting marijuana or marijuana product:

For all transports of marijuana products, Scorpion Grass will create a Metrc generated Trip Manifest. All Trip Manifests will be sent with the products, and an additional copy will be stored and filed on the premises as official business records. The Manifest documents will clearly have the strain name, type of product, batch number, weight, name of the transporter and handlers ID, time of departure and expected delivery, and the make, model, and license plate of the transporting vehicle. All marijuana product will be in a sealed package or container not exceeding five (5) pounds and then stored in a locked storage compartment within the transport vehicle. The transport vehicle will travel directly between destinations without making any unnecessary stops and at no time during transit will marijuana products be directly visible. All marijuana product packaging will have a label stating that a licensed testing facility has tested each batch in the shipment. All packaging materials that will be sold to marijuana establishments for sale to consumers will be child-proof and unappealing to children. All packaging done at the facility will be performed in a specific 24-hour surveillance monitored area and will then be packaged in a uniform manner with labels secure and clearly displayed. Packaged marijuana products will be stored in a secured area until ready for transport, and will be inspected, accepted or rejected, and recorded in an official log. The company will check all packages to make sure that they will keep all marijuana products from contamination and will check to make sure that the packages will not impart any toxic or deleterious substance to marijuana products. Scorpion Grass will use certified scales in compliance with the Alaska Weights and Measures Act, and will maintain registration and inspection reports at the facility. Reports will be available upon request to AMCO. The transport vehicle will be unmarked and inconspicuous with a secure storage compartment inside or in the bed of a truck to hold all marijuana products during transit. The container will be a large industrial box formed of steel or a like material, mounted inside the vehicle or bed of a truck. The manager will ensure that the marijuana products are locked in the storage compartment and not visible from the outside, prior to approving departure. All employees will be trained that under no circumstances shall a sealed package containing marijuana be opened during transport, unless otherwise directed by a local law enforcement agent.

Received by AMCO 2.26.18

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

8.2. The marijuana establishment from which a shipment of marijuana or marijuana product originates will ensure that any individual transporting marijuana shall have a marijuana handler permit required under 3 AAC 306.700. L.H

8.3. The marijuana establishment that originates the transport of any marijuana or marijuana product will use the marijuana inventory tracking system to record the type, amount, and weight of marijuana or marijuana product being transported, the name of the transporter, the time of departure and expected delivery, and the make, model, and license plate number of the transporting vehicle. L.H

8.4. The marijuana establishment that originates the transport of any marijuana or marijuana product will ensure that a complete printed transport manifest on a form prescribed by the board must be kept with the marijuana or marijuana product at all times during transport. L.H

8.5. During transport, any marijuana or marijuana product will be in a sealed package or container in a locked, safe, and secure storage compartment in the vehicle transporting the marijuana or marijuana product, and the sealed package will not be opened during transport. L.H

8.6. Any vehicle transporting marijuana or marijuana product will travel directly from the shipping marijuana establishment to the receiving marijuana establishment, and will not make any unnecessary stops in between except to deliver or pick up marijuana or marijuana product at any other licensed marijuana establishment. L.H

8.7. When the marijuana establishment receives marijuana or marijuana product from another licensed marijuana establishment, the recipient of the shipment will use the marijuana inventory tracking system to report the type, amount, and weight of marijuana or marijuana product received. L.H

8.8. The marijuana establishment will refuse to accept any shipment of marijuana or marijuana product that is not accompanied by the transport manifest. L.H

Section 9 – Signage and Advertising

9.1. Describe any signs that you intend to post on your establishment with your business name, including quantity, dimensions, graphics, and location on your establishment (photos or drawings may be attached):

Scorpion Grass will not post any signs with the business name on them for the manufacturing facility.

Received by AMCO 2.26.18

9.2. Describe any advertising you intend to distribute of your establishment. Include medium types and business logos (photos or drawings may be attached):

Scorpion Grass' advertising and marketing is still in development; however, the company plans to utilize the following medium types when distributing advertisements:

- Newspaper ads
- radio ads
- social media to feature specific strains and products
- magazine ads

Advertisements will include the following logo, the retail store hours and location, and will include each warning statement verbatim as they are listed in the regulations.

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
