MEMORANDUM

TO:	Chair Mlynarik and Members of the Board	DATE:	July 12, 2017
FROM:	Erika McConnell, Director	RE:	Hollyweed 907 #11304, Product Manufacturing Facility

Hollyweed 907 submitted a product manufacturing facility application that was calendared for board action on May 15, 2017. During consideration of the various products proposed, the Board approved the license with delegation and two products (with delegation), requiring that the applicant produce an acceptable label: "Natural Fat Extract – Butter" and "Alcohol/Vegetable Glycerin Tincture."

The Board tabled consideration of the remaining seven products, raising concerns regarding serving demarcations on the cookies and brownies, ingredient lists missing from the labels, and resealable bottles.

The applicant provided revised application material for four products: "Brownie Bites," "Chocolate Chip Cookie Bites," "Hot Cocoa," and "Milk Cookie Bites."

No additional information was provided for three products: "CO2 Concentrate," "Bubble Hash," or "Fruit Lemonade." The Board indicated on May 15 that the CO2 Concentrate syringe packaging for dabbing would be a different product from the CO2 Concentrate vape pen packaging. Additionally the Board discussed how individual servings would be marked for drinks and noted that the bottles would need to be glass (or otherwise translucent). The applicant will need to verify if they are still requesting approval of these three products.
