The C.A.P. CO_2 Regulator/Emitter will allow you to maintain ideal CO_2 levels for optimum growth. It features an accurate, easy to adjust CO_2 flow meter, a pre-set regulator that never needs adjusting, and solenoid valve. Each unit also comes with the tubing needed to disperse the CO_2 evenly throughout your room by attaching the tubing to the back of an oscillating fan for even dispersion. If you are using this without a digital CO_2 controller, you will need to use a timer. The flow rate is adjustable from 0.5-15 cubic feet per hour.

Shipping Weight

What are the benefits of using supplemental CO2 in my garden?

CO2 is essential for photosynthesis to occur. Under the influence of supplemental CO2, plant metabolism is increased resulting in higher productivity rates. Growth, yield, and environmental tolerance is enhanced if used properly in a greenhouse or indoor garden.
