Alaska Marijuana Control Board

Operating Plan Supplemental
Form MJ-04: Marijuana Cultivation Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana cultivation facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 4** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.420(2).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Cultivation plan
- Odor control
- Testing procedure and protocols
- Security

This form must be submitted to AMCO's main office before any marijuana cultivation facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Wild Flower Holdings, LLC	**License Number:**	10605		
License Type:	Standard Marijuana Cultivation Facility				
Doing Business As:	Wild Flowers				
Premises Address:	2229 Spenard Road Anchorage Alaska 99503				
City:		**State:**	ALASKA	**ZIP:**	

550 W 7th Avenue, Suite 1600

Phone: 907.269.0350

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-04: Marijuana Cultivation Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.405 – 3 AAC 306.410 and be able to answer "Agree" to all items below.

The marijuana cultivation facility will not:	Agree	Disagree
Sell, distribute, or transfer any marijuana or marijuana product to a consumer, with or without compensation	☒	☐
Allow any person, including a licensee, employee, or agent, to consume marijuana or marijuana product on its licenses premises or within 20 feet of the exterior of any building or outdoor cultivation facility	☒	☐
Treat or otherwise adulterate marijuna with any organic or nonorganic chemical or compound to alter the color, appearance, weight, or odor of the marijuana	☒	☐

Section 3 – Cultivation Plan

Review the requirements under 3 AAC 306.420, and identify how the proposed premises will meet the listed requirements.

Describe the size of the space(s) the marijuana cultivation facility intends to be under cultivation, including dimensions and overall square footage. Provide your calculations below:

See attached Floor Plan. Initially, the proposed location will utilize approx. 600 SF of Cultivation Space. See security and floor plan for check-in requirements to authorized staff to access to cultivation area.

Operating Plan Supplemental

Form MJ-04: Marijuana Cultivation Facility

Describe the marijuana cultivation facility's growing medium(s) to be used:

Grow medium shall be soil.

Describe the marijuana cultivation facility's fertilizers, chemicals, gases, and delivery systems, including carbon dioxide management, to be used:

Advanced Nutrients are used for Fertilizer (see attached). No Chemicals or gases. Grow is 100% Organic. See attached.

Describe the marijuana cultivation facility's irrigation and waste water systems to be used:

Plants will be hand watered. Water is recycled. There is no water waste.

Operating Plan Supplemental

Form MJ-04: Marijuana Cultivation Facility

Describe the marijuana cultivation facility's waste disposal arrangements:

Wildflowers will store, manage and dispose of any solid or liquid waste, including wastewater and other waste determined by the Board in compliance with applicable federal, state and local laws and regulations as outlined in 3 ,sAC 306.740(a). Wewill ensure that health and safety standards are met during the waste disposal process by ensuring that personal protective equipment (PPE) is used and reasonable precautions are taken while storing, managing and disposing of solid or liquid waste as outlined in 3 AAC 306.740. Waste is defined as marijuana plant waste, including roots, stalks, leaves, and stems that have not been processed with a solvent, solid marijuana sample plant waste in the possession of a marijuana testing facility and other waste as determined by the Marijuana Control Board.
See Attachment D for Continued Information

Section 4 – Odor Control

Review the requirements under 3 AAC 306.430, and identify how the proposed premises will meet the listed requirement.

Describe the odor control method(s) to be used and how the marijuana cultivation facility will ensure that any marijuana at the facility does not emit an odor that is detectable by the public from outside the facility:

Wildflowers will abide by a strict no odor policy that will ensure no odor is detectible by the public from outside the facility as required by 3 AAC 306.420(a)(2)(F). And 3 AAC 306.430(c)(2). Odor control methods will consist of a number of methods meant to eliminate odors by utilizing methods like sealed containers and air sanitizers throughout the building and when transporting marijuana to/from the premises. Containers will be checked regularly and containers that are no longer odor-proof will be replaced promptly.
Odor control systems will be checked and filters/canisters/lights changed monthly. A record will be kept on filter/light changes and maintenance required and will be kept in the business record. Authorized employees will initial the record when completing any maintenance and regular check to ensure it is completed and signed off on. The Cultivation Manager will ensure all maintenance and checks are conducted per the policy and procedure and determine overall odor control needs of the facility.

(Additional Space as Needed):

Attachment D

Waste Disposal Arrangements Continued:

We anticipate having no active waste but in the event there is waste, the following waste by-products from our cultivation activity would include: 1 . Waste from marijuana flowers, trim, and solid plant materials; 2 . Wastewater generated during cultivation and processing; 3 . Marijuana that is identified as infected or fails to meet quality testing; and 4 . Marijuana plant waste, including roots, stalks, leaves, and stems. While handling marijuana waste and wastewater, employees will be trained in proper disposal methods and wear PPE's including nitrate gloves, eye glasses, clean clothing and other requirements as needed. Employees are required to follow health standards as outlined in 3 AAC 306.735 including maintaining a clean working environment, maintaining personal hygiene, avoiding contaminating areas, and ensuring waste disposal equipment is adequately maintained.

Solid Waste

The cultivation facility will have waste bins within the vegetation, flowering and harvesting rooms in order to be used throughout the workday for solid waste (as defined above). Each bin will be labeled as Solid Plant Waste" and will be secured with a latched lid that will ensure proper storage and sanitation. Bins will use a red theme with red liners, bags and markings to show a clear association with the waste disposal process. Each bin will be emptied as needed during heavy waste times (i.e. harvesting plants) and on a no more than a 3 to 5 day rotation basis during all non-heavy waste times. Room bin will be emptied into larger storage waste bins with the same label located in the secured cultivation hallway.

Form MJ-04: Marijuana Cultivation Facility

(Additional Space as Needed):

Attachment D
Waste Disposal Arrangements Continued (2):
During transfer into the larger into storage bins, solid waste will be weighed using an industrial scale as outlined below and in compliance with 3 AAC 306.745 and logged into the electronic inventory tracking system which will provide the required three (3) day notice to the Board in preparation for rendering it unusable and disposing of it (3 AAC 306.745(b)(1)). Utilizing Uline Deluxe Platform Scale 660 lb. x .1 lb. capacity (or comparable)
After the required three (3) day waiting period and the Board has approved for disposal, waste material will be combined with a compostable or non-compostable product. Marijuana solid waste will be weighed on the industrial scale, ground up using a commercial grinder and mixed with at least an equal amount of one of the materials listed below.
Compostable Material:
Sawdust Non-Compostable Material:
Paper Product Cardboard Waste
Plastic Waste

Form MJ-04: Marijuana Cultivation Facility

(Additional Space as Needed):

Attachment D

Waste Disposal Arrangements Continued (3):
Once the marijuana is ground up and combined with a material listed above making it unusable, it will be placed in closed, red waste bags and removed promptly from the premises. Sample grinder below: AFMG-24 Mixer Grinder w/150 lb. Hopper (or comparable)
Unusable solid waste will be taken or collected by a solid waste facility or transfer station or ;incinerator and a record of the final destination will be maintained as part of the business record (3 AAC 306.470(c)(2). Testing samples returned to the cultivation facility after required testing will be disposed of in the same manner as listed above.
In the case of a waste disposal emergency such as pests, molds, accidents or other comparable situations, the solid plant waste will be separated from all other waste and stored in a separate bins until a Marijuana Control Board staff and/or Director authorizes an immediate disposal as outlined in 3 AAC 306.740(c)(1). Procedures followed on waste disposal will be for the emergency disposal situation and sanitary measures will take place as applicable
Ownership and Management will give at least three (3) days notice to the MC Board before disposing of any marijuana waste by logging the affected products in the marijuana inventory tracking system, Metrc.
Prior to being removed from the Cultivation Facility, all marijuana waste will be inspected and the composition of the final disposal mixture will be recorded. Management will ensure that the final disposal mixture is composed of no more than fifty percent (50%) marijuana waste by volume.

Operating Plan Supplemental

Form MJ-04: Marijuana Cultivation Facility

(Additional Space as Needed):

Attachment D
Waste Disposal Arrangements Continued (4):

This grinding method will be used on as as needed basis and/or before the Cultivation Facility closes. Once rendered unusable, marijuana will be securely stored in locked dumpsters located inside a secure area inside the Cultivation Facility, and all locks will comply with the highest standards of the UL standards. Only authorized personnel will have access to the areas where the dumpsters are kept. The disposed marijuana will not be stored outside the Cultivation Facility at any time.

To ensure tracking and prevent against 'diversion' activity, Management will be present at the time of waste collection and delivery, will collect the name and signature of the waste truck driver, and will record the date, time, and the type of marijuana waste being collected or delivered.

Management will maintain a log on the status of all marijuana waste, tracking the type of waste, the date of disposal, the date it was rendered unusable, composition of the disposal mixture, the date that it was picked up by a waste collection company, and the final destination of the waste material. Records of all disposal information and waste collection will be maintained by Management, securely stored at the Cultivation Facility, and made available to the MC Board upon request.

All marijuana rendered unusable and disposed of will be tracked using the Metrc system, upon identifying any plant, batch of plants, or any quantity of marijuana for disposal, the plant(s) or
item will immediately be marked in the Metrc system for disposal. Upon rendering the plant(s) or item unusable, the following information will be recorded in the Metrc system:

1. A description of and reason for the marijuana being disposed of, including, if applicable, the number of failed or other unusable marijuana plants and the weight of the plant(s) or item(s); 2. The date of disposal;
3. Confirmation that the marijuana was rendered unusable before disposal;
4. The method of disposal; and
5. The name and permit number of the agent responsible for disposal.

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.455 and 3 AAC 306.465, and identify how the proposed premises will meet the listed requirements.

Applicants should be able to answer "Agree" to the item below.

I understand and agree that:	Agree	Disagree
The board will or the director shall from time to time require the marijuana cultivation facility to provide samples of the growing medium, soil amendments, fertilizers, crop production aids, pesticides, or water for random compliance checks	X	

Describe the testing procedure and protocols the marijuana cultivation facility will follow:

Marijuana and marijuana!products will be tested for potency including contaminants and labeled with results as defined by Statute including 306.605(a).

Section 6 – Security

Review the requirements under 3 AAC 306.430 and 3 AAC 306.470 – 3 AAC 306.475, and identify how the proposed premises will meet the listed requirements.

Applicants should be able to answer "Agree" to the two items below.

The marijuana cultivation facility applicant has:	Agree	Disagree
Read and understands and agrees to the packaging of marijuana requirements under 3 AAC 306.470	X	
Read and understands and agrees to the labeling of marijuana requirements under 3 AAC 306.475	X	

Restricted Access Area (3 AAC 306.430):

	Yes	No
Will the marijuana cultivation facility include outdoor production?	X	

If "Yes", describe the outdoor structure(s) or the expanse of open or clear ground fully enclosed by a physical barrier:

No

PRODUCT OVERVIEW

Model # ECO10 | Internet # 203681049

This energy-saving air purifier provides a clear and crisp indoor environment, using up to 95% less energy compared to other air cleaners in its class. Equipped with an ultra-efficient electronically commutated (EC) fan motor, the Blueair ECO10 offers higher energy efficiency with a lot less noise than conventional motors. Like other Blueair air purifiers, the, Blueair ECO10 has patented HEPASilent technology and whisper-silent operation.

- The Blueair ECO10 has a CADR-per watt ratio of 19.6, the highest energy-efficiency rating ever recorded by the U.S. Environmental Protection Agency's ENERGY STAR program. This is nearly 28% better than the next best room air cleaner
- Removes impurities from the air - Certified efficiency 99.97% for particles such as dust, pollen, bacteria, virus, pet dander, mold spores and other airborne particles
- HEPASilent technology-Traps particles with mechanical and electrostatic filtration, creating an open airflow system that remains quiet while cleaning
- 3-stage progressive filter-Our unique filter design resists clogging and allows filtration at peak performance with high efficiency and longer lasting airflow

- CADR Rated - Meets strict efficiency guidelines ensuring a high volume of clean, filtered air is delivered
- Protective steel housing - Made of galvanized steel for a strong, durable design
- Filter replacement indicator - Alerts you when the filter needs to be replaced every 6 months
- 5 air changes per hour in a room of 220 sq. ft.
- SurroundAir vent system-Delivers up to 140 CFM air exchange without drafts
- Winner of multiple design awards ensuring the Blueair 203 looks great with your decor

SPECIFICATIONS

DIMENSIONS

Maximum coverage area (sq. ft.)	220	Product Height (in.)	26
Product Depth (in.)	13	Product Width (in.)	20

DETAILS

Air Purifier Type	Tower	Product Weight (lb.)	40 lb
Air Treatment Product Type	Air Purifier	Remote Control	No
Automatic shutoff	No	Removes bacteria	Yes
CADR (Clean Air Delivery Rate)	140	Removes dust	Yes
Color	White	Removes mold	Yes
Color Family	Whites	Removes odors	No
Control Type	Manual	Removes particulates	Yes
Effectiveness (%)	99.97	Removes pollen	Yes
Electrostatic	Yes	Removes viruses	Yes
Filter/bulb monitor	Yes	Returnable	90-Day
Filtered or Filterless	Filtered	Timer	No
Number of Fan Speeds	2	UVC lamp	No
Number of cleaning stages	5	Voltage (volts)	120
Portable	No	Wall Mountable	No
Primary Filter Type	HEPA - Type		

WARRANTY / CERTIFICATIONS

Certifications and Listings	AHAM Certified,ETL Listed	Manufacturer Warranty	5 year limited
ENERGY STAR Certified	Yes
