Hello,

We received your corrected documents.

More corrections/documents needed:

MJ-01 page 4, third box; your answer to this question sort of implies that you will the cameras will only be recording when the business is closed and upon breach of security. Video surveillance is required 24/7, please correct this portion reflecting your understanding of the 24/7 video surveillance.

MJ-01 page 5, first box (diversion); please explain in this box how you will prevent diversion of marijuana and marijuana products from employees.

MJ-04 page 2, first box; the only thing we can tell you regarding your premises and phase 1 and phase 2 is that the board will review what is presented to them and will deny or approve the application based on that information. If your current premises include “phase 2” and the board approves your license that way, you will need to have phase 1 and phase 2 completed as it shows in your diagram upon our enforcement’s initial inspection. If phase 2 is not going to take place until a year later the license would not be issued until what the board approved is complete.

We can’t “shelved” the old application for later date. Alterations to the functional floor plan or reduction or expansion to the licensed premises

requires forms and fees.

This said, please amend MJ-02 accordingly. On the “facility drawing” diagram please outline in a different color what you want the board to consider to be your licensed premises. Please label in writing your diagram unless you are able to put your legend on the same diagram.

On your “site drawing” the “red” line is no visible.

Thank you

State of Alaska
