I would like to offer public testimony at the November 14/15 Board meeting. The two topics I would like to offer input are

1. Recommend changing the ability to define Total THC as the addition of THCA and THC. I recommend putting both numbers on packaging or using the industry accepted formula of 0.877 x THCA + THC.

2. Considering having edible makers provide an initial testing of several units on a product to ensure they are able to meet their target, then testing one serving for each batch rather than having product manufacturers test the number of units in a retail package for every new batch.
