Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

What is this form?

An operating plan is required for all marijuana establishment license applications. Applicants should review **Title 17.38** of **Alaska Statutes** and **Chapter 306** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those statutes and regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020(c).

What must be covered in an operating plan?

Applicants must identify how the proposed premises will comply with applicable statutes and regulations regarding the following:

- Security
- Inventory tracking of all marijuana and marijuana product on the premises
- Employee qualification and training
- Waste disposal
- Transportation and delivery of marijuana and marijuana products
- Signage and advertising
- Control plan for persons under the age of 21

Applicants must also complete the corresponding operating plan supplemental forms (**Form MJ-03, Form MJ-04, Form MJ-05,** or **Form MJ-06)** to meet the additional operating plan requirements for each license type.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Form MJ-01: Marijuana Establishment Operating Plan

Section 2 – Security

Review the requirements under 3 AAC 306.710 – 3 AAC 306.720 and 3 AAC 306.755, and identify how the proposed premises will meet the listed requirements.

Describe how the proposed premises will comply with each of the following:

Restricted Access Areas (3 AAC 306.710):

Describe how you will prevent unescorted members of the public from entering restricted access areas:

The structure is a single room kitchen with bathroom. There are no windows and there is only one entry door. External signage will instruct visitors that the area is secure and not accessible without escort. Cameras will reveal any accidental public visitors. Motion activated exterior lights are installed near the entryway. These are sensitive to the onset of darkness and illuminate the area of interest. An overhead streetlight nearby spreads excellent light over the property. The camera system uses infrared to detect the presence of any trespasser and renders them clearly visible to the camera. This is "night vision" that captures excellent video even in complete darkness.

The door will remain locked, even during business hours.

Describe your processes for admitting visitors into and escorting them through restricted access areas:

Any visitor will be required to sign in and wear a "Visitor" name tag on a lanyard. Visitors must be accompanied by a SFA employee at all times and under no circumstances will any visitor be left alone at any time while on the licensed premises.

The Visitor to Employee ratio will never exceed 2:1. There will never be more than six Visitors in the Licensed area. So if there are 2 Visitors, for example, at least one Employee will be present. If there are 3 Visitors, at least 2 Employees will be present. If there are 5 Visitors, at least 3 Employees will be present.

Form MJ-01: Marijuana Establishment Operating Plan

Describe your recordkeeping of visitors who are escorted into restricted access areas:

A mandatory sign-in log will be presented for completion to all visitors. The log will be filed monthly and a new sign-in sheet presented.

The sign-in sheet, titled "Restricted Access Entry Log", has the following fields which shall be completed by each visitor: Visitor Name, Affiliation, Date, Time In, Time Out, Reason for Access, Signature, Restricted area being accessed, and Name of Employee Escort.

Provide a copy of a sample identification badge to be displayed by each licensee, employee, or agent while on the premises:

Any licensee, employee, or agent will be required to present a Marijuana Handlers Credential as issued by the Alcohol and Marijuana Control Office of the State of Alaska. It will be mandatory for this license or a reasonable facsimile thereof to be carried on their person or kept on file whenever that person is on the premises.

Form MJ-01: Marijuana Establishment Operating Plan

Security Alarm Systems and Lock Standards (3 AAC 306.715):

Exterior lighting is required to facilitate surveillance. Describe how the exterior lighting will meet this requirement:

A brilliant light exists above the door, and there is a similar light for the parking area. These lights are powerful LED lights that illuminate the entire parking area and entry area. The LED lights are triggered by a light-sensitive switch that turns them on whenever it's dark. Next to the door are motion-sensitive lights for additional, clear, lighted visibility.

An alarm system is required for all license types. Describe the security alarm system for the proposed premises:

Sparkle Farms uses a security system complete with fully programmable main unit and sensors and an auto-dial function which can call up to 6 designated phone numbers in case of a security breach. Auto-dial telephone numbers to be called are the SFA owner, manager, and Alaska State Trooper office which is one half mile up the street. A door contact detects any forceful break-in.

Passive motion sensors detect any suspicious movement or activity. A loud, 110dB alarm alerts neighbors and deters potential invaders.

Game cameras are mounted at various locations on-site for additional camera coverage.

The alarm system must be activated on all exterior doors and windows when the licensed premises is closed for business. Describe how the security alarm system meets this requirement:

The alarm is fitted to the exterior door to the kitchen. If the door is opened and the alarm has not been disabled, the system automatically dials preset numbers including the SFA owner, manager, and the Alaska State Trooper . The alarm system will be enabled at the conclusion of every shift and will be operational until the arrival of the next shift on the next working day.

Phone: 907.269.0350

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

Describe your policies and procedures for preventing diversion of marijuana or marijuana product:

No products will be diverted. Our fundamental goal is to legally generate revenue with marijuana products. It is in our best interests to allow sales only to licensed marijuana establishments. Diversion of marijuana and such products would not be allowed by company policy. Batches of comestibles will be recorded in detail using MS Word spreadsheets and GoogleDocs.

At the first discrepancy, any employee will be interviewed and the violation reviewed. If the employee satisfactorily passes review they may continue working. On second violation a review will be conducted and if there is reason to believe theft or diversion of marijuana product has occurred, the employee will be terminated.

Describe your policies and procedures for preventing loitering:

The kitchen is about 100' removed from the road and signs at the property entrance clearly indicate that trespassers are undesired. Whereas no person can loiter inside the kitchen without signing the log and becoming an official visitor, there can be no loitering on the licensed premise adjacent to the building. Any Person overstaying their visitation shall be asked to leave.

Describe your policies and procedures regarding the use of any additional security device, such as a motion detector, pressure switch, and duress, panic, or hold-up alarm to enhance security of the proposed premises:

Our interior and exterior security cameras record in both daylight and darkness. The camera system allows for 40 days of review which includes graphics to indicate motion sensitivity. This allows any effort to review activity at any time to be a simple exercise.

The door to the kitchen is the only point of egress. It will remain locked at all times, even during business hours.

In the event our kitchen is held up, employees are instructed to dial 911 for assistance. Once the authorities have been notified, the Owner and manager will be reported about the violation, and appropriate steps taken.

Phone: 907.269.0350

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

Describe your policies and procedures regarding the actions to be taken by a licensee, employee, or agent when any automatic or electronic notification system alerts a local law enforcement agency of an unauthorized breach of security:

Immediately upon first alert, the SFA owner and manager will be notified. Owner and manager are required to inspect the breach of security and respond with a company form. Subsequent to the inspection of breach, any details which are revealed will be shared with law enforcement authorities. At the conclusion a file will be created which will indicate and detail the issues leading to the breach of security. A company meeting will review the event for patterns and devise a way to prevent future incidents.

Video Surveillance (3 AAC 306.720):

All licensed marijuana establishments must meet minimum standards for surveillance equipment. Applicants should be able to answer "Yes" to all items below.

Video surveillance and camera recording system covers the following areas of the premises:	Yes	No
Each restricted access area and each entrance to a restricted access area	✔	☐
Both the interior and exterior of each entrance to the facility	✔	☐
Each point of sale area	✔	☐

Each video surveillance recording:	Yes	No
Is preserved for a minimum of 40 days, in a format that can be easily accessed for viewing	✔	☐
Clearly and accurately displays the time and date	✔	☐
Is archived in a format that does not permit alteration of the recorded image, so that the images can readily be authenticated	✔	☐

Form MJ-01: Marijuana Establishment Operating Plan

Describe how the video cameras will be placed to produce a clear view adequate to identify any individual inside the licensed premises, or within 20 feet of each entrance to the licensed premises:

Our cameras are mounted on the outside of the kitchen building with a greater than 20' view of the approach to the kitchen door. A camera is positioned just above the only entryway and out of reach to record details of visitors. Other cameras cover the general vicinity including the parking area and driveway/approaching road. Several cameras look across the interior of the kitchen and provide both lighted and unlighted video recording of any activity within the building.

Describe the locked and secure area where video surveillance recording equipment and records will be housed and stored and how you will ensure the area is accessible only to authorized personnel, law enforcement, or an agent of the board:

The video surveillance recording equipment and records will be housed in the adjacent locked "nursery" building of the farm. The door to the nursery is secured with a commercial lock and deadbolt system. Signs on the exterior of the structure indicate that no person is allowed inside without authorized staff being present.

Location of Surveillance Equipment and Video Surveillance Records:	Yes	No
Surveillance room or area is clearly defined on the premises diagram	✔	
Surveillance recording equipment and video surveillance records are housed in a designated, locked, and secure area or in a lock box, cabinet, closet or other secure area	✔	
Surveillance recording equipment access is limited to a marijuana establishment licensee or authorized employee, and to law enforcement personnel including an agent of the board	✔	
Video surveillance records are stored off-site	✔

Business Records (3 AAC 306.755):

All licensed marijuana establishments must maintain, in a format that is readily understood by a reasonably prudent business person, certain business records. Applicants should be able to answer "Yes" to all items below.

Business Records Maintained and Kept on the Licensed Premises:	Yes	No
All books and records necessary to fully account for each business transaction conducted under its license for the current year and three preceding calendar years; records for the last six months are maintained on the marijuana establishment's licensed premises; older records may be archived on or off-premises	✔	☐
A current employee list setting out the full name and marijuana handler permit number of each licensee, employee, and agent who works at the marijuana establishment	✔	☐
The business contact information for vendors that maintain video surveillance systems and security alarm systems for the licensed premises	✔	☐
Records related to advertising and marketing	✔	☐
A current diagram of the licensed premises including each restricted access area	✔	☐
A log recording the name, and date and time of entry of each visitor permitted into a restricted access area	✔	☐
All records normally retained for tax purposes	✔	☐
Accurate and comprehensive inventory tracking records that account for all marijuana inventory activity from seed or immature plant stage until the retail marijuana or retail marijuana product is sold to a consumer, to another marijuana establishment, or destroyed	✔	☐
Transportation records for marijuana and marijuana product as required under 3 AAC 306.750(f)	✔	☐

A marijuana establishment is required to exercise due diligence in preserving and maintaining all required records. Describe how you will prevent records and data, including electronically maintained records, from being lost or destroyed:

We use GoogleDocs and MS Word spreadsheets to maintain our inventory and sales records. These records are recorded using on-site terminals but all data is loaded daily to the cloud for secure storage. The storage location is kept protected by a password access system. Using the password, production traffic can be accessed from any terminal or a cell phone.

Form MJ-01: Marijuana Establishment Operating Plan

Section 3 – Inventory Tracking of All Marijuana and Marijuana Product

Review the requirements under 3 AAC 306.730, and identify how the proposed establishment will meet the listed requirements.

All licensed marijuana establishments must use a marijuana inventory tracking system capable of sharing information with the system the board implements to ensure all marijuana cultivated and sold in the state, and each marijuana product processed and sold in the state, is identified and tracked from the time the marijuana propagated from seed or cutting, through transfer to another licensed marijuana establishment, or use in manufacturing a product, to a completed sale of marijuana or marijuana product, or disposal of the harvest batch of marijuana or production lot of marijuana product.

Applicants should be able to answer "Yes" to all items below.

Marijuana Tracking and Weighing:	Yes	No
A marijuana inventory tracking system, capable of sharing information with the system the board implements to ensure tracking for the reasons listed above, will be used	✔	☐
All marijuana delivered to a marijuana establishment will be weighed on a scale certified in compliance with 3 AAC 306.745	✔	☐

Describe the marijuana tracking system that you plan to use and how you will ensure that it is capable of sharing information with the system the board implements:

Our licensed marijuana farm uses the METRC system to track marijuana from seed to sale. The farm is located at the same physical address as the manufacturing facility.

Once a sale has transpired, the raw product will be weighed and tagged for transfer date and batch or package identification number.

Each product will be entered into a company "Received" spreadsheet, a database that identifies the strain, volume, price, confirmation of taxes paid, and the date of delivery. The spreadsheet also assigns a strain number to each product.

The "Received" spreadsheet interfaces with a related database "Processing", which records the progress of the marijuana as it is processed into an edible. It records the strain number, amount, date, and product description for which the marijuana has been utilized.

The finished edible marijuana product will bear the same strain number on the shipping boxes and shipping manifest so that each strain is tracked from entry until its sale and departure.

The "Retail" spreadsheet interfaces with the "Processing" database. "Retail" records the destination for any given batch of edible products. It records the date, License name, License number, address, amount of purchased edibles, name of receiving Agent, dollar value, and any other similar pertinent information related to the sale.

Form MJ-01: Marijuana Establishment Operating Plan

Section 4 – Employee Qualification and Training

Review the requirements under 3 AAC 306.700, and identify how the proposed establishment will meet the listed requirements.

A marijuana establishment and each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or a marijuana product, or who checks the identification of a consumer or visitor, shall obtain a marijuana handler permit from the board before being licensed or beginning employment at a marijuana establishment.

Applicants should be able to answer "Yes" to all items below.

Marijuana Hander Permit:	Yes	No
Each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or marijuana product, or who checks the identification of a consumer or visitor, shall obtain a marijuana handler permit from the board before being licensed or beginning employment at the marijuana establishment	✔	☐
Each licensee, employee, or agent who is required to have a marijuana handler permit shall keep that person's marijuana handler permit card in that person's immediate possession (or a valid copy on file on the premises of a retail marijuana store, marijuana cultivation facility, or marijuana product manufacturing facility) when on the licensed premises	✔	☐
Each licensee, employee, or agent who is required to have a marijuana handler permit shall ensure that that person's marijuana handler permit card is valid and has not expired	✔	☐

Describe how your establishment will meet the requirements for employee qualifications and training:

We employ the state required Marijuana Handlers Card system, which is an excellent initial training course. Any employee will be required to provide a copy of his handlers card to be kept on site. These cards are displayed by employees on a lanyard while at work, and must be presented for inspection upon request at any time.

Inspections will be conducted periodically and reminders issued if a handlers card is nearing its expiration date.

Upon hire, any employee will be presented with the company policies regarding security, food safety, and when emergency response action is required.

Section 5 – Waste Disposal

Review the requirements under 3 AAC 306.740, and identify how the proposed establishment will meet the listed requirements.

Applicants should be able to answer "Yes" to the statement below.

Marijuana Waste Disposal:	Yes	No
The marijuana establishment shall give the board at least 3 days notice in the marijuana inventory tracking system required under 3 AAC 306.730 before making the waste unusable and disposing of it	☑	☐

Describe how you will store, manage, and dispose of any solid or liquid waste, including wastewater generated during marijuana cultivation, production, process, testing, or retail sales, in compliance with applicable federal, state, and local laws and regulations:

The marijuana farm is located at the same address as the manufacturing facility. A compost pile is convenient to the kitchen, and can accept any solid waste material generated in the manufacturing process. Unusable marijuana portions or any otherwise useless product refuse will be mixed with compost, coffee grounds, etc and then removed to the compost pile and decomposed.

All drains in the kitchen leave the building below ground and enter an on-site septic system.

Waste marijuana product rendered as part of the manufacturing process will be deposited inside the bakery in a lidded waste receptacle. This will be emptied weekly or as needed.

Describe what material or materials you will mix with the ground marijuana waste to make it unusable:

Unused marijuana material will be mixed with other kitchen waste, coffee grounds, fruit and vegetable surplus, shredded paper and similar material and ground together and buried in the compost pile through manual insertion.

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

Marijuana waste must be rendered unusable for any purpose for which it was grown or produced before it leaves the marijuana establishment. Describe the process or processes that you will use to make the marijuana plant waste unusable:

Marijuana plant waste will be chopped into an unusable size, mixed with other kitchen waste, coffee grounds, etc and buried in the compost pile. It is a natural decomposition conducted over time with similar vegetable materials. Nobody will want to smoke it or otherwise consume it once it's been in the compost pile.

Marijuana waste that has been generated in the manufacturing process will be retrieved from the kitchen collection receptacle and discarded in the compost pile on a weekly basis, or as needed. The byproduct waste generated in the cooking process will resemble saturated digested plant material, such as steamed spinach. The active ingredients will have been removed in the process of making the concentrate. Once deposited in the compost pile it will return to the earth.

Section 6 – Transportation and Delivery of Marijuana and Marijuana Products

Review the requirements under 3 AAC 306.750, and identify how the proposed establishment will meet the listed requirements.

Applicants should be able to answer "Yes" to all items below.

Marijuana Transportation:	Yes	No
The marijuana establishment from which a shipment of marijuana or marijuana product originates will ensure that any individual transporting marijuana shall have a marijuana handler permit required under 3 AAC 306.700	✔	☐
The marijuana establishment that originates the transport of any marijuana or marijuana product will use the marijuana inventory tracking system to record the type, amount, and weight of marijuana or marijuana product being transported, the name of the transporter, the time of departure and expected delivery, and the make, model, and license plate number of the transporting vehicle	✔	☐
The marijuana establishment that originates the transport of any marijuana or marijuana product will ensure that a complete printed transport manifest on a form prescribed by the board must be kept with the marijuana or marijuana product at all times during transport	✔	☐
During transport, any marijuana or marijuana product will be in a sealed package or container in a locked, safe, and secure storage compartment in the vehicle transporting the marijuana or marijuana product, and the sealed package will not be opened during transport	✔	☐
Any vehicle transporting marijuana or marijuana product will travel directly from the shipping marijuana establishment to the receiving marijuana establishment, and will not make any unnecessary stops in between except to deliver or pick up marijuana or marijuana product at any other licensed marijuana establishment	✔	☐
When the marijuana establishment receives marijuana or marijuana product from another licensed marijuana establishment, the recipient of the shipment will use the marijuana inventory tracking system to report the type, amount, and weight of marijuana or marijuana product received	✔	☐
The marijuana establishment will refuse to accept any shipment of marijuana or marijuana product that is not accompanied by the transport manifest	✔	☐

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

Describe how marijuana or marijuana product will be prepared, packaged, and secured for shipment:

The finished products of bakery items are each individually retained for freshness and security in individual wrappers and containers. These wrappers are sealed display packages made of plastic and paper. They are sealed for freshness and displayed in a cardboard package with a transparent window. These individual packages are placed in a larger packing box and sealed with 2" tear resistant packing tape.

Our inventory tracking system will ensure each marijuana product processed is tracked from Receiving through Production, transfer and sale to Retail to another licensed marijuana establishment. Each packaged marijuana product will be identified by a tracking label and a number generated by our marijuana inventory tracking system.

Boxes are detailed with a sticker including the company name and logo, batch number, date of manufacture, expiration date (where necessary), and the item number with the number of boxes in the shipment. For example, it might say simply 4/7, meaning box #4 out of 7 boxes in the shipment.

The destination establishment is displayed on the label also, including street address and NOA person. (Attn Mary Jane Smith, e.g.)

The boxes are placed in a locking tote for transportation. A manifest accompanies each shipment.

Describe the type of locked, safe, and secure storage compartments that will be used in any vehicles transporting marijuana or marijuana product:

When any vehicle is used to transport marijuana products by SFA LLC, the marijuana will be in a locked tote in the trunk. A manifest that describes the items in the tote will be carried by the driver on the front seat of the vehicle. The tote is heavy-duty reinforced plastic with a padlock on the side opposite the hinges. It will be locked when leaving the facility and not unlocked until it reaches its destination.

Section 7 – Signage and Advertising

Describe any signs that you intend to post on your establishment with your business name, including quantity and dimensions:

We will have no signs to advertise or locate our manufacturing establishment. The only signs will be on the gate at the property entrance and are already there. They say "No Trespassing" and "Cameras in Use".

We do not wish to draw attention to our location and activities. By not hanging a sign we hope to reduce the general public interest in our operations.

If you are not applying for a retail marijuana store license, you do not need to complete the rest of Section 7, including Page 17.

Restriction on advertising of marijuana and marijuana products (3 AAC 306.360):

All licensed retail marijuana stores must meet minimum standards for signage and advertising.

Applicants should be able to answer "Agree" to all items below.

No advertisement for marijuana or marijuana product will contain any statement or illustration that:	Agree	Disagree
Is false or misleading	✔	☐
Promotes excessive consumption	✔	☐
Represents that the use of marijuana has curative or therapeutic effects	✔	☐
Depicts a person under the age of 21 consuming marijuana	✔	☐
Includes an object or character, including a toy, a cartoon character, or any other depiction designed to appeal to a child or other person under the age of 21, that promotes consumption of marijuana	✔	☐

Form MJ-01: Marijuana Establishment Operating Plan

Section 8 – Control Plan for Persons Under the Age of 21

Describe how the marijuana establishment will prevent persons under the age of 21 from gaining access to any portion of the licensed premises and marijuana items:

When we put out signs to war trespassers and enforce the "no loitering" policy at Sparkle Farms, we can also ascertain the age of any visitor tot he Farm. Although the remote nature of the farm makes an accidental visit unlikely, if a visiting Person should present ID that indicates they are underage they will be asked to leave that portion of the premises immediately. An escort will take them away and discharge them from the facility.

In the event a person under the age of 21 is found covertly entering that portion of the licensed premise which is restricted, or is found in possession of marijuana items originating at the licensed facility, or is caught in the act of removing property from Sparkle Farms, the troopers will be contacted and they will enforce the law.

I declare under penalty of perjury that I have examined this form, including all accompanying schedules and statements, and to the best of my knowledge and belief find it to be true, correct, and complete.

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

(Additional Space as Needed):

Landlord Amendment:

SFA LLC exists at a legal location in the Ketchikan Gateway Borough. The Borough has approved the property for both the Limited Cultivation and for the Product Manufacturing activities.

The Property Owners agree to and commit to the furtherance of the manufacturing license as Manufacturing Licensee. No contract exists between the Property Owners and the Licensees, as they are the same persons, Mr and Mrs Wilhelm a husband and wife of 27 years.

As landlord, the Property Owners agree to neither remove nor take possession of marijuana or marijuana product, and will contact the AMCO for guidance in the event of any property dispute. However, the Owners will be the Licensees and as such any dispute is unlikely.

In order to be clear, here it should be stated that the bakery establishment which this application applies for consists of a single building. The building exists on a property owned wholly by the Licensees of SFA, LLC, dba as Sparkle Farms Alaska, a licensed Limited Cultivation Facility #10922 at the same address and location.

This building will house the Product Manufacturing activities proposed with this license application.
