Alaska Marijuana Control Board

Cover Sheet for Marijuana Establishment Applications

What is this form?

This cover sheet **must** be completed and submitted any time a document, payment, or other marijuana establishment application item is emailed, mailed, or hand-delivered to AMCO's main office.

Items that are submitted without this page will be returned in the manner in which they were received.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	SFA LLC	**License Number:**	13697		
License Type:	Limited Marijuana Cultivation Facility				
Doing Business As:	SPARKLE FARMS ALASKA				
Physical Address:	218 Kelly Drive				
City:	Ketchikan	**State:**	AK	**Zip Code:**	99901
Designated Licensee:	Christopher Wilhelm				
Email Address:	ketchikanwilhelm@yahoo.com				

Section 2 – Attached Items

List all documents, payments, and other items that are being submitted along with this page.

Attached Items:	
11	Recipe submissions for bakery applications #13697
1	this cover sheet

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	SFA LLC	**License Number:**	13697		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Sparkle Farms Alaska				
Premises Address:	218 Kelly Drive

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	✓	
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	✓	

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	✓	
Closely resembles a familiar food or drink item including candy	✓	
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	✓	

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Our marijuana will be rendered into oil and used proportionally in cooking and baking to yield the target of 5mg/serving for the recipes that require butter. The oils we use will be food grade natural fats such as vegetable oil, olive oil, coconut oil, nut or seed oil, honey, and butter.

The products that contain no oil will have the cannabinoids delivered by tincture using high proof alcohol or glycerin.

Equipment used will include the oven, stovetop, crockpot, and strainers.

Phone: 907.269.0350

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

For natural fats extraction, the marijuana will first be decarboxylated by heating in the oven at 220* for 90 min. The decarboxylated marijuana will be cooked with oil and water for 30 min and strained to remove the plant material. The resulting liquid will be refrigerated until cool, then cut into blocks. This cannabutter will be kept refrigerated until required for a recipe.

For alcohol tincture, the marijuana will first be decarboxylated by heating in the oven at 220* for 90 min. The decarboxylated marijuana will be combined with a high proof alcohol, such as Everclear, in 1 liter containers, agitated, and retained in a cool place for 5 days. The resulting liquid will be strained to remove the plant material and collected in the 1 liter containers for storage until required for a recipe.

For glycerin extraction, the marijuana will first be decarboxylated by heating in the oven at 220* for 90 min. The decarboxylated marijuana will be cooked with food grade glycerin on a low heat setting for 3 days. The resulting liquid will be strained to remove the plant material, collected in 1 liter containers and stored refrigerated up to 60 days until required for a recipe.

For infused honey, the marijuana will first be decarboxylated by heating in the oven at 220* for 90 min. The decarboxylated marijuana will be cooked with honey on a stove top or crockpot for 5 hours. The resulting product will be strained to remove the plant material and stored in containers until required for a recipe.

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

If it becomes necessary for an unused portion of a butter extraction to be discarded, it will be refrigerated and reused in another recipe.

However, if a kitchen problem arises such as a burned batch of cookies, or a contaminated recipe, or if for any reason the Baker feels it necessary to discard any bakery materials, these shall be discarded into the compost pile adjacent to the bakery. It will be buried deep and covered completely to assist in the process of decomposition. Under no circumstances will the discarded material be allowed to leave the premises. This is true for any Product in any stage of production, whether finished or otherwise.

In the event an unsold Product passes its useful life after packaging and is expired, it will be de-packaged by staff and collected in a container. This material will be mashed, broken, and mixed with vegetable garbage material such as lettuce, squash, corn, and similar material. It will be mixed and added to the compost pile where it will be buried deep to aid in decomposition.

Under no circumstances will any expired or unused cannabis product or marijuana material be allowed to leave the Bakery without undergoing this process to render it unusable, it must go into the compost pile.

Section 7 – Testing

The area where in-house testing will occur must be identified on the premises diagram, per 3 AAC 306.520(2).	Yes	No
Will the marijuana product manufacturing facility perform in-house testing (as defined in 3 AAC 306.990(b)(20))?	☒	☐

Applicants should review 3 AAC 306.550 and be able to answer "Agree" to the item below.

The marijuana cultivation facility applicant has:	Agree	Disagree
Read and understands and agrees to the required laboratory testing set forth in 3 AAC 306.550	☒	☐

I declare under penalty of perjury that I have examined this form, including all accompanying schedules and statements, and to the best of my knowledge and belief find it to be true, correct, and complete.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Cannabutter
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Light green/yellow to dark green, with a smooth texture. Cannabutter is stored in a food grade container so it will retain the shape of the container.

Ingredients: This box is not applicable to marijuana concentrates	

Standard Production Procedure and Detailed Manufacturing Process:	Decarboxylate ground cannabis trim or flower in the oven by baking for 45 minutes at 220 degrees. In a pan or crockpot bring to boil 2 cup of water per pound of butter to be used. Add the dairy butter. When the butter is melted add the cannabis and simmer for approximately 3 hours. Line a metal strainer with cheesecloth. Pour the resulting cannabutter through the cheesecloth and squeeze out all the infused cannabutter. Cool in the refrigerator until the cannabutter solidifies. Separate the cannabutter from any remaining water. Store the cannabutter in the refrigerator in a food grade plastic container.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Suzanne Vegan Chocolate Chip Cookies
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Light brown with specs of light and dark brown and bits of dried fruit in orange, blue, red or brown colors. Flat, round cookie shape. Soft and chewy texture.

Ingredients: This box is not applicable to marijuana concentrates	Oatmeal, Vegan Chocolate Chips (Cane Sugar, Unsweetened Chocolate, Non-Dairy Cocoa Butter), Walnuts, Dried Cranberries, Unsweetened Applesauce (Apples, Water, Ascorbic Acid), Coconut Palm Sugar, Water, Canna-Coconut Oil, Flax Seed, Maple Syrup, Vanilla, Spices, Sunflower Lecithin, Baking Soda, Salt, Baking Powder.

Standard Production Procedure and Detailed Manufacturing Process:	Combine the flax seed and water and let soak for 5 minutes. Beat the canna-coconut oil, applesauce, coconut palm sugar, maple syrup and vanilla together. Add the flax seed-water mixture and stir until well combined. Grind the oatmeal into flour and combine the oatmeal flour with the sunflower lecithin, baking soda, salt, baking powder and spices. Gradually add the dry ingredients into the wet and stir until well incorporated. Stir in the dried fruit, nuts and chocolate chips until evenly distributed. Roll the dough into 1 inch balls and bake for 10 minutes at 350 degrees. Cool and store at room temperature in an airtight container.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Salty Sockeye Caramels
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Soft and chewy texture. Light brown color. One inch long cylindrical shape.

Ingredients: This box is not applicable to marijuana concentrates	Evaporated Milk (Milk, Dipotassium Phosphate, Carrageenan, Vitamin D3), Sugar, Corn Syrup, Heavy Whipping Cream, Cannabutter, Salt, Vanilla, Salt Flakes.

Standard Production Procedure and Detailed Manufacturing Process:	Combine the sugar, evaporated milk, and heavy cream in a saucepan. Bring to a boil. Add the corn syrup and mix well. Cook over medium heat until the temperature reaches 230 degrees. Add the cannabutter and vanilla and continue to cook until it reaches 257 degrees. Remove from heat and stir in the salt. Pour onto a greased baking sheet and cool for 30 minutes. Sprinkle with salt flakes. Continue to cool until firm, at least 2 hours. Cut into measured pieces and wrap each piece in a cellophane wrapper. Store at room temperature.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
