MJ-05 Section 4 Product #14

Product Name:	Toker Truffles
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 1"x 1" ball shaped, dark brown, smooth creamy texture.
Ingredients This box is not applicable to marijuana concentrates	• 1/4 cup Canna-Butter • 8-ounce package of cream cheese • 3 tablespoons instant coffee • 6 cups semi-sweet chocolate chips • 2 teaspoons water
Standard Production Procedure and Detailed Manufacturing Process:	1. The truffles will be produced using the canna-butter once all testing reports have been received. Then a batch will be made following these steps: a. Slowly melt four cups of the chocolate chips and mix in Canna-Butter. Avoid letting the mix bubble. b. Once the chocolate has melted, remove from heat and add in the water, coffee, and cream cheese. Mix together well. c. Chill the mixture in the fridge for about an hour until it is firm enough to roll into small balls, measuring about an inch. d. Place these on a sheet of wax paper and place in the freezer for an hour. e. In the microwave, melt the last two cups of chocolate chips. Drizzle over frozen truffles and let cool. f. Once cool, package; keep refrigerated. 2. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. 3. Once the sample is cleared through the testing facility, labels will be made and placed on the stored truffles batch and then moved to the retail space.

MJ-05 Section 4 Product #15

Product Name:	Toke-House Cookies
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 2"x 2" circular in shape, flat, golden brown with dark brown spots, soft cookie texture.
Ingredients This box is not applicable to marijuana concentrates	• 1 cup Canna-Butter • 2 cups semisweet chocolate chips • 1/4 cup white sugar • 1 teaspoon baking soda • 3/4 cup packed brown sugar • 1 teaspoon vanilla extract • 1 (3.5 ounce) package instant vanilla pudding mix • 2 1/4 cups all-purpose flour • 2 eggs
Standard Production Procedure and Detailed Manufacturing Process:	1. The cookies will be produced using the canna-butter once all testing reports have been received. Then a batch will be made following these steps: a. Set oven to 375 degrees. In a mixing bowl, mix in sugars and the cannabutter, mixing them together well. b. Add in eggs, pudding mix, and vanilla. Stir together until the mixture is creamy. c. In a separate bowl mix the flour and baking soda; gradually add in to the creamy mixture. Mix well. d. Add the the chocolate chips. e. Measure 1 teaspoonful of dough per cookie. f. Place the cookies onto an ungreased baking sheet. g. Bake the cookies in the preheated oven for about 11 minutes or until they are lightly browned. h. Allow the cookies to cool, add serving size line, and package. 2. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. 3. Once the sample is cleared through the testing facility, labels will be made and placed on the stored cookies batch and then moved to the retail space.

MJ-05 section 4 Product #16

Product Name:	Frozen Flower Fudge
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 1"x 1" square, dark brown, smooth creamy texture.
Ingredients This box is not applicable to marijuana concentrates	• 1 cup Canna-Butter • 1 cup smooth peanut butter • 1/4 tsp salt • 1tsp vanilla • 1 lb powdered sugar
Standard Production Procedure and Detailed Manufacturing Process:	1. The fudge will be produced using the canna-butter once all testing reports have been received. Then a batch will be made following these steps: a. Combine the butter and peanut butter in a 4-quart microwave-safe bowl and cover with plastic wrap. b. Microwave for 2 minutes on high. c. Stir and microwave on high for 2 more minutes. d. Add the vanilla and powdered sugar to the peanut butter mixture and stir to combine with a wooden spoon. The mixture will become hard to stir and lose its sheen. e. Spread into a buttered 13x9-inch pan lined with parchment paper. f. Fold the excess parchment paper so it covers the surface of the fudge and refrigerate until cool, about 2 hours. g. Cut into 1-inch pieces and package. 2. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. 3. Once the sample is cleared through the testing facility, labels will be made and placed on the stored fudge batch and then moved to the retail space.

Product Name:	Green Cookies
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 2"x 2" round, flat shape, greenish tint, soft, chewy texture.
Ingredients This box is not applicable to marijuana concentrates	• 1 ¾ Cup of CannaButter, melted • 1 ¾ Cup of flour • ½ Teaspoon of baking powder • ¼ Teaspoon of Baking soda • 3 Cup of Oatmeal • 2 large eggs • ¾ Teaspoon of salt • 1 Teaspoon of vanilla extract • 2 Tablespoon of vegetable oil • 1 Cup of sugar • 1 Cup of brown sugar • 1 ½ Teaspoon of cinnamon • 1 ½ Cup of raisins
Standard Production Procedure and Detailed Manufacturing Process:	- The cookies will be produced using the canna-butter once all testing reports have been received. Then a batch will be made following these steps: a. Pre-heat oven to 350 degrees. Line a cookie tray with wax paper or use a non-stick spray. b. In a bowl, combine flour, baking powder, baking soda, cinnamon, and oatmeal, mix well. c. In another bowl and beat eggs, salt, and vanilla. Add the canna-butter, oil, and both sugars. Mix until creamy and smooth. Then slowly pour in the flour mix and stir together. Now add in the raisins and mix once more. d. Roll the cookie batter into 1"x1" balls and put them on the cookie sheet. Bake for 12-15 minutes. e. Let cool, add serving size line, and package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated cookie batch and then moved to the retail space.

MJ-05 Section 4 Product #23

Product Name:	Sensi-Cups
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 1"x 1" round shaped, brown, soft, chewy texture.
Ingredients This box is not applicable to marijuana concentrates	• 1 cup creamy peanut butter • ½ cup powdered sugar • ¼ teaspoon pink Himalayan salt • 16 ounces Cannabis Chocolate: • ¼ cup Canna-Oil • 1 pound dark chocolate • 1 tablespoon lecithin • 1 tablespoon superfine sugar • 1 teaspoon Mexican vanilla extract • 1 teaspoon dark cocoa powder
Standard Production Procedure and Detailed Manufacturing Process:	- The cups will be produced using the canna-oil once all testing reports have been received. Then a batch will be made following these steps: j. Prepare Cannabis Chocolate: k. In a double boiler, whisk together the Canna-Oil, vanilla, sugar, lecithin, and cocoa powder until the sugar completely dissolves. l. Slowly add the dark chocolate, and gently stir until it has completely melted and has a silky shine. m. Then, fill molds halfway, and use a spoon to pull chocolate up the sides of the molds to coat them. n. Refrigerate the chocolate cups for about 5-10 minutes or until firm. o. In a stand mixer, blend the sugar, peanut butter, and salt until the mixture is firm (about 2 minutes). p. Add peanut butter to the chilled chocolate molds almost to the top, leaving room for the top chocolate layer. q. Chill them again for 5 minutes to firm the peanut butter. r. Melt more chocolate to pour atop each cup. s. Carefully cover the cups with parchment paper, and refrigerate them for 15-20 minutes. t. Once completely chilled; package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated cookie batch and then moved to the retail space.

MJ-05 Section 4 Product # 24

Product Name:	Weed Lime Cookies
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 2"x 2" round, flat shape, green in color, soft, chewy texture.
Ingredients This box is not applicable to marijuana concentrates	• ½ cup Canna-Oil • ¼ cup Cannabis Tincture • 1½ cups all-purpose flour • 1½ cups sugar • ½ cup confectioner's sugar (for decoration) • ¼ cup apple juice • 1 egg; 1 egg yolk • 2 tablespoons fresh squeezed Key lime juice • 1 tablespoon Key lime extract • 1 tablespoons lime zest • 1 teaspoon lemon emulsion • 1 teaspoon baking powder
Standard Production Procedure and Detailed Manufacturing Process:	- The cookies will be produced using the canna-oil once all testing reports have been received. Then a batch will be made following these steps: u. Preheat oven to 325°F. v. Heat the tincture in a sauté pan over medium-low heat. w. Add Key lime juice, apple juice, Key lime extract, ¼ cup/60 ml of sugar, and lemon emulsion. Heat and stir the mixture until the sugar has completely dissolved, and set it aside to cool. x. Mix the Cannabis Oil, sugar, egg, and yolk in a stand mixer for 1-2 minutes or until smooth in texture. y. Add the lime zest and the tincture/extract syrup, and mix for an additional 30-45 seconds. z. Whisk the flour, baking powder, and salt together in a separate bowl. aa. Slowly add the flour mix–1/3 of it at a time—to the wet mix. When all the flour has been added, mix for 1 minute. bb. Using a tablespoon, form dough balls spaced about 2 inches/5 cm apart on a cookie sheet, and bake them for 20 minutes. cc. Once completely chilled, add serving size line, and package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated cookie batch and then moved to the retail space.

MJ-05 Section 4 Product # 25

Product Name:	Canna-Carnival Nuts
Type:	Edible
Product Description Details must include the color, shape, and texture.	Variety shaped snack nuts, dark brown color, crunchy texture.
Ingredients This box is not applicable to marijuana concentrates	• ½ cup Canna-Oil • ¼ cup Cannabis Tincture • 4 cups powdered sugar • 1 cup roasted pistachios, shelled • 1 cup roasted almonds • 1 cup roasted cashews • ⅔ cup orange blossom honey • ½ cup sugar • ½ cup brown sugar • 3 tablespoons fresh ground cinnamon • 1½ tablespoons pure vanilla extract • ½ teaspoon kosher salt
Standard Production Procedure and Detailed Manufacturing Process:	1. The nuts will be produced using the canna-oil once all testing reports have been received. Then a batch will be made following these steps: dd. In an extra large sauté pan over medium-high heat, add all nuts and cook until a slight char begins to develop. ee. Add tincture, and cook for 3 minutes; then add oil, reduce heat to medium, and continue cooking for another 5 minutes, stirring continuously. ff. Add sugar, brown sugar, honey, salt, and 2 tablespoons/30 ml of cinnamon, and stir continuously while cooking until the sugars dissolve and create a caramel. gg. In an extra large steel salad bowl, mix the powdered sugar with the rest of the cinnamon; then put on the LoveGlove. hh. Swirling the bowl in a circular motion, gradually add the nuts, using a gloved hand to press the caramel nuts into the powdered sugar mix, continuing until all the nuts are covered. ii. Allow to cool; package. 5. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. 6. Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated nuts batch and then moved to the retail space.

MJ-05 Section 4 Product #27

Product Name:	Canna-Crinkle Cookies
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 2"x 2" round, flat shape, dark brown, soft, chewy texture.
Ingredients This box is not applicable to marijuana concentrates	• 3/4 cup Canna-Oil • 2 cups granulated sugar • 3/4 cup HERSHEY'S Cocoa or • 4 eggs • 2 teaspoons vanilla extract • 2-1/3 cups all-purpose flour • 2 teaspoons baking powder • 1/2 teaspoon salt • 1/3 cup powdered sugar for rolling
Standard Production Procedure and Detailed Manufacturing Process:	- The cookies will be produced using the canna-oil once all testing reports have been received. Then a batch will be made following these steps: a. Combine granulated sugar and oil in large bowl; add cocoa, beating until well blended. Beat in eggs and vanilla. Stir together flour, baking powder and salt; gradually add to cocoa mixture, beating well. b. Cover; refrigerate until dough is firm enough to handle, at least 6 hours. c. Heat oven to 350°F. Lightly grease cookie sheet or line with parchment paper. Shape dough into 1-inch balls; roll in powdered sugar to coat. Place about 2 inches apart on prepared cookie sheet. d. Bake 11 to 13 minutes or until almost no indentation remains when touched lightly and tops are crackled. Cool slightly. Remove from cookie sheet to wire rack and add serving size line. Cool completely. Package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated cookies batch and then moved to the retail space.
