This guide is intended to overview Facility requirements. All facility workers are responsible for compliance, with these requirements. This will be one of many guides which will help maintain the health of Green Escape. Questions and suggestions are welcome.

Green Escape shall restrict access to any part of the licensed premises where marijuana or a marijuana product is grown, processed, tested, stored, or stocked. each entrance to a restricted access area will be marked by a sign that says "Restricted access area. Visitors must be escorted." .Green Escape shall limit the number of visitors to not more than five visitors for each licensee, employee, or agent of the licensee who is actively engaged in supervising those visitors. (c) In a restricted access· area, a licensee, employee, or agent of the marijuana establishment shall wear a current identification badge (Marijuana Handler Permit) bearing the person's photograph and Green Escape Logo. A person under 21 years of age may not enter a restricted access area. Any visitor to the restricted access area must (1) show identification A valid form of photographic identification includes: (1) an unexpired, unaltered passport; (2) an unexpired, unaltered driver's license, instruction permit, or identification card of a state or territory of the United States, the District of Columbia, or a province or territory of Canada; (3) an identification card issued by a federal or state agency authorized to issue a driver's license or identification card as required in 3 AAC 306.350 to prove that person is 21 years of age or older; All visitors will obtain a visitor identification badge (which will be a copy of the person's approved identification, placed inside a clear plastic sleve with Green Escape Logo, and worn on a lanyard (in plain view) before entering the restricted access area; and (3) be escorted at all times by a licensee, employee, or agent Green Escape facility doors will be locked via deadbolt. The main door is in an Arctic Entry way, which will be under camera and allow for personal contact without jeopardizing facility security. The key (commercial grade lock: numeric or physical) will only be made available to the owner, and his designee (which includes: Law Enforcement, MCB employees, and Emergency Services). Doors will remain locked and a bell installed to allow for signaling. Cameras (with night vision capabilities) will be installed to capture visual imagery in real time. The imagery will include the facility perimeter with a range of at least forty feet. All imagery will be electronically stored for at least three years. A security system will be installed to notify of security breaches and other hazards. It will have an alarm and Police notification ability. All individuals who are approved for facility access must agree to keep doors closed and locked (unless emergency, or approval from owner or designee), and to deny entrance to all not approved as described above (includes reporting concerns to the owner or MCB authority). Staff will be instructed to ask any unauthorized person to leave. If compliance is negative the the Police and owner are to be notified. All cultivation activities will occur indoors. All employees / volunteers are required to wear their Marijuana Handler Permit (in a clear plastic sleeve with the logo sticker) on a lanyard (in clear view).

XXXX

Green Escape facility doors will be locked via deadbolt. The main door is in an Arctic Entry way, which will be under camera and allow for personal contact without jeopardizing facility security. The key will (numeric or physical) only made available to the owner, and his designee (which includes: Law Enforcement, MCB employees, and Emergency Services). Doors will remain locked and a bell installed to allow for signaling. Cameras (with night vision capabilities) will be installed to capture visual imagery in real time. The imagery will include the facility perimeter (to include each door) with a range of at least forty feet. All imagery will be electronically stored for at least three years. A security system will be installed (at least at each door/no facility windows, and throughout the facility) to notify of security breaches, and other hazards. It will have an alarm and Police notification ability. All individuals who are approved for facility access must agree to keep doors closed and locked (unless emergency, or approval from owner or designee), and to deny entrance to all not approved as described above (includes reporting concerns to the owner / Law Enforcement or MCB authority). No trespassing signs will be posted and visible from the facility perimeter. Cameras, doors, sensors, detectors, and lights ; will be routinely checked. All employees / volunteers are required to wear their Marijuana Handler Permit (in a clear plastic sleeve with the logo sticker) on a lanyard (in clear view). Areas will be well lit.

XXXX

date order (after scanning into a database), in a binder (marked visitor). The binder will be stored by the owner. Paperwork will be kept for three years. All employees / volunteers are required to wear their Marijuana Handler Permit (in a clear plastic sleeve with the logo sticker) on a lanyard (in clear view).

XXXX

If the alert is real then staff will determine /arrange for personal safety. When safe, staff will ensure notifications were positive and appropriate. Any non-appropriate notifications will be immediately canceled (ie: alarm glitches for no reason, staff immediately cancels notifications to First Responders). Staff then rectifies the issue informally, or by cooperating with First Responders / Owner. Repair persons will be treated as visitors, and visitors protocol used. The occurrence details will be entered into the log book (including date, time, and what happened).

Instructions (to include contacts) will be posted at the desk; within the facility. The Log book will be kept at the desk too. Desk area will be well lit, and appropriate supplied (ie: log books, pens, etc,,).

XXXX

Video cameras (night vision) will be situated such that all aspects of the interior (including door area)and exterior (plus forty feet) can be clearly monitored, and recorded. All video will be of an approved (MCB format list) format. Cameras will be elevated enough to avoid easy access. Cameras will be low enough to allow for identification of that which was captured. The security system will be supported by an emergency power generator, and password (owner possessed) protected. The system will be weatherproof and subject to routine inspection (weekly by the owner or as needed). System function will be noted in the security log, daily. All entry portals will have individual outside cameras, too. Those outside cameras will capture the face of persons attempting entry. All cameras will have zoom and (some) rotational capabilities. All surveillance / security systems will only be addressed by the owner or his designate. All media will be recorded in a fashion that does not allow alteration. Systems will be calibrated by the owner (or designate) as needed (determined by daily inspection). Cameras will have night vision capabilities. NO CAMERA WILL BE PLACED IN THE BATHROOM.

XXXX

stranger is prevalent) and shown where prohibited areas are (secure desk drawers/cabinet). All employees will be provided badge training (what to do, how to wear, renewal), to include making and recording visitor badges. All employees will be oriented about the facility infrastructure and tools. Employees should be CPR trained, prior to use. Employees will be shown the need for sanitary maintenance and how to properly clean (using safe materials). Proper waste disposal is included (storage, use of chipper, mixing (with cardboard / paper etc..) to render unusable. Employees will be trained in the marijuana transportation procedure. Green Escape's limited need for employees (other than the owner) allows for this MJ-01 (and other MJ documents) to be used as training material. It will be discussed with all employees.

XXXX

to a retailer, after lab approval. All tags will have the minimum of : Name of strain, Date of harvest, date of transfer, where transferred and why, weight of product, Cultivation Facility name / license number / address, delivered by (and date), Tags on marijuana going to a licensed retailer will also include the Lab information and the approved warning about the hazards of marijuana use. All tags will meet the standard set by the Board.

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

There will be no signs posted on the outside of the facility, with the business name. Except, one on the front door (18" x 18" & in color). That will have the Logo and business name. The only posted signs will be to warn of the secure site, that the location is under camera, and no trespassing. The owner values his privacy.

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

Green Escape plans to print it's logo on T-shirts for volunteers. This will be done out of incentive, and thanks for their service. The T-shirts will not be for sale, and limited in supply. They will be in adult sizes only. They may also be gifted to the staff of cooperative Marijuana Retail Facilities; as a thank you. Green Escape's marijuana packaging tags will also include the: Logo and company name (with address and license number); and other appropriate information (in compliance with Board instructions / policy)

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

Green Escape seeks to secure a "Limited Marijuana Cultivation Facility" License. Green Escape will cultivate about 150 plants, through "Deep Water Culture" hydroponics. Total cultivation space usage will be under 500sq-ft. Cultivation will occur indoors.

3 AAC 306.405. Standard marijuana cultivation facility: privileges and prohibited acts (a) A licensed standard marijuana cultivation facility is authorized to (1) propagate, cultivate, harvest, prepare, cure, package, store, and label marijuana;

Green Escape will cultivate about 150 (individually labeled for identification) plants using Deep Water Hydroponics. The plants will be observed at various intervals, daily. Unhealthy plants (to include male) will be removed. All activities will be recorded via written or electronic method, and stored appropriately. The cultivation will occur indoors, with anticipated biannual harvests. The harvesting will occur as each individual flower matures. This will allow for maximum pre-harvest growth. Harvested flowers (buds) will be dried on a rack, at a temperature range of 60 – 70 degrees Fahrenheit. The drying area humidity will be between 47 and 53 percent. The dried buds will be trimmed and cured in a clean room, separate from the growing area. Buds will be placed in glass "mason jars" at a relative humidity of 59 to 67 percent. Repetitive daily inspections for mold (to include disease and insects) and maintenance will be conducted, remedied; and recorded. Samples will be sent to the Lab, and results recorded in database, log, and on package labels (as required by law). Buds will be packaged by weight (as requested by the retail vendor),

RECEIVED
FEB 21 2018
ALCOHOL MARIJUANA CONTROL OFFICE
STATE OF ALASKA

labeled, and sealed. Packaged Buds will be stored in the curing room; until transfer to the respective retail vendor.

(2) sell marijuana only to a licensed retail marijuana store, to another licensed marijuana cultivation facility, or to a licensed marijuana product manufacturing facility;

Green Escape will sell its product to stores and facilities appropriately licensed by the State of Alaska. Green Escape will not make its' product directly available to the general public.

(3) provide samples to a licensed marijuana testing facility for testing; Green Escape will provide samples of its' product in a manner prescribed by the laboratory, and Law. Green Escape will document the custody chain, which will include: date, time, transfer from, transfer to, amount transferred, identification information (ie: strain, trgng# etc...), and signatures. Green Escape will receive Lab results and prepare them for printing on labels. Green Escape will destroy all plants not approved by the Lab (using approved waste protocols) and adjust its' operations to ensure non-repetition of the issue. Green Escape will store all lab data for future referencing.

(4) store inventory on the licensed premises; any stored inventory must be secured in a restricted access area and accounted for in the marijuana cultivation facility's marijuana inventory tracking system as required under 3 AAC 306.730;

The marijuana cultivation facility shall assign a tracking number to each plant over eight inches tall. When harvested, bud and flowers, clones or cuttings, or leaves and trim may be combined in harvest batches of distinct strains, not exceeding five pounds. Each harvest batch must be given an inventory tracking number. Clones or cuttings must be limited to 50 or fewer plants and identified by a batch tracking number. (b) A marijuana cultivation facility shall record each sale and transport of each batch in its marijuana inventory tracking system, and shall generate a valid transport manifest to accompany each transported batch. (c) A marijuana cultivation facility shall record in its marijuana inventory tracking system all marijuana used to provide a sample authorized under 3 AAC 306.460 for the purpose of negotiating sales, including (1) the amount of each sample; (2) the retail marijuana store or marijuana product manufacturing facility that received the sample; and (3) the disposal of any expired or outdated promotional sample returned to the marijuana cultivation facility

Green Escape will store inventory in the locked curing room, and limit access to the area. Cured inventory will be separately stored in a designated area of the cure room (and labeled accordingly). Access can be gained by obtaining a key from the on-duty manager. The manager will record all entrance and exit from the curing room; to include: names, date, time, reason, items removed, weight, items returned, weight, tracking numbers / names, and signatures. Stored inventory will be accounted for in the Marijuana Inventory Tracking System, approved by the Board / Law.

(5) transport marijuana in compliance with 3 AAC 306.750;

RECEIVED
FEB 21 2018
ALCOHOL MARIJUANA CONTROL OFFICE
STATE OF ALASKA

Green Escape will transport it's product via secure method; using trained staff. Communication will be maintained with said staff and issues addressed immediately. Receivers of product will be identified as appropriate using methods accepted by the Board. All aspects of the Law will be adhered to. Activities will be appropriate documented. Please see form MJ01 Section 8.1 (of this application) for more detailed procedural information.

(6) conduct in-house testing for the marijuana cultivation facility's own use;

Green Escape will conduct in house testing to determine: sanitary levels, air exchange, air quality, insects, other infestations, moisture levels, temperature, nutrient levels, PH, water levels, security and alarm system functioning, computer back-ups, and the overall maintenance and safety of the facility. Activity will be appropriately documented, and saved.

(7) provide marijuana samples to a licensed retail marijuana store or marijuana product manufacturing facility for the purpose of negotiating a sale.

Green Escape will only sell to Facilities approved by the State of Alaska. Samples can be provided only after the receiver is deemed appropriate by Alaska Law (and after lab sampling, labeling, weight, and recording).Green Escape will not sell or provide samples to; the general public.

Green Escape will NOT:

(1) sell, distribute, or transfer marijuana or a marijuana product to a consumer, with or without compensation;

(2) allow any person, including a licensee, employee, or agent, to consume marijuana or a marijuana product on the licensed premises or within 20 feet of the exterior of any building or outdoor cultivation facility on the licensed premises;

(3) treat or otherwise adulterate marijuana with any organic or nonorganic chemical or other compound to alter the color, appearance, weight, or odor of the marijuana;

(4) except as permitted under a marijuana product manufacturing facility license, extract marijuana concentrate, using any process described in 3 AAC 306.555, at the licensed premises;

(5) sell marijuana that is not packaged and labeled in compliance with 3 AAC 306.470 and 3 AAC 306.475.

Green Escape seeks no other license than the Limited Cultivation Facility License, at this time. Plants will be germinated from seed and tracked . Staff will use tyvek suits, booties, and UV light to control cross contamination. Protective gloves are to be worn at all times.

Green Escape may provide a free sample of marijuana to a retail marijuana store if packaged in a sample jar containing not more than three and one-half grams of marijuana and protected by a plastic or metal mesh screen to allow customers to smell the product before purchase. (b) A marijuana cultivation facility may provide a free sample of marijuana to a retail marijuana store

or marijuana product manufacturing facility as follows: (1) a sample provided for the purpose of negotiating a sale may be not more than one ounce; (2) a marijuana cultivation facility may not provide any one licensed retail marijuana store or marijuana product manufacturing facility with more than one ounce of marijuana per month free-of charge for the purpose of negotiating a sale.

XXXX

used as a work station, (for processing marijuana) and house the video monitors. The desk area will have locked drawers and cabinet for secure information. The desk area will be under camera.

The facility will be well lit. Exits will be marked and a fire escape plan and extinguisher at each exit. Exit lights will have battery backup. All doors will be commercial grade and fireproof. Hazardous materials will be stored according to MSDS instruction and labeled accordingly. The facility will be painted in a fashion that does not raise attention (pastel/neutral colors); and benefits the plants (facility painted white on inside).

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

The facility will have no windows (or windowed doors). All doors will be commercial grade, fireproof, and under camera. The main door will be under camera and entrance controlled (arctic entryway). Roof panels will be opaque at minimum. All digital media will not be made available to the public (to include password protection), and no pictures will be allowed. Marijuana will be packaged in opaque properly labeled containers.

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

Green Escape will use deep water hydroponics. Seeds will be started in rockwool. Clean clay pebbles will also be used to encourage root spreading. Advanced Nutrients will be the brand of plant food used (organic varieties preferred). It will be dissolved in clean water. Nutrients will be purged from the plant two weeks prior to harvest. Ph balanced water, or Advanced Nutrients purge solution will be utilized.

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

Green Escape will utilize Deep Water Hydroponics. Nutrients will be organic, and staff properly trained in safe handling, spills, and disposals. A spill kit consisting of: warning signs, bottled water, gloves, goggles, disposable garb, container with lid, first aid kit, and other appropriate items; will be made readily available. Growing Medium will be monitored for PH, nutrients, oxygen, carbon dioxide, temperature, and water level. Adjustments will be as needed.

(C) fertilizers, chemicals, gases, and delivery systems, including carbon dioxide, management, to be used;

Green Escape will store all chemicals according to MSDS sheet guidelines (in a locked desk drawer). Storage will be kept to a minimum, since there is ready market purchase access. Organic Plant Nutrients, oxygen, and carbon dioxide will be introduced through the hydroponic fluid system (ie; oxygen and CO2 stones). This minimizes collateral contaminations, and allows for recycling of nutrient materials. Nutrient fluids will be utilized for a full growing cycle. A wastewater vendor will be contracted to haul off the Nutrient waste; and dispose of it professionally.

(D) the irrigation and waste water systems to be used;

RECEIVED
FEB 21 2018
ALCOHOL MARIJUANA CONTROL OFFICE
STATE OF ALASKA

Green Escape's deep water hydroponics system is self-contained, regarding irrigation. A licensed waste water vendor will be contracted to haul and dispose of nutrient waste. Green Escape will have connection to an approved waste water system for sewage (ie: toilet flushing, shower etc..).

(E) waste disposal arrangements;

Green Escape will dispose of solid waste per landfill requirements.

A private vendor will be contracted to dispose of solid (non-plant) waste (on a regular schedule). If no such vendor exists, then solid waste will be stored in closed (animal proof containers, and taken to the landfill, weekly. Green Escape will shred and composte organic (plant) matter, in an appropriate fashion. Employees will be required to wear gloves and other appropriate protective equipment.

XXXX

plastic waste, oil, or other wastes approved by the board when the mixed material may be delivered to a permitted solid waste facility, incinerator, or other facility with approval of any applicable local government entity.

XXXX

marijuana testing facility to perform the testing. The marijuana testing facility shall collect the test samples. Green Escape shall cooperate to facilitate the collection of samples.

XXXX

marijuana in the package, (A) not including weight of the shipping container; and (B) using a standard of measure compatible with the marijuana cultivation facility's marijuana inventory tracking system; and 1167 3 AAC 306.480 ALASKA ADMINfSTRATIVE CODE 3 AAC 306.480 (4) a complete list of all pesticides, fungicides, and herbicides used in cultivation of the marijuana. (e) If a marijuana cultivation facility transports wholesale marijuana to another marijuana establishment for sale at retail or for use in manufacturing a marijuana product, a label must be affixed to the shipping container showing that a licensed marijuana testing facility has tested each harvest batch in the shipment as provided in 3 AAC 306.645. The label must report the test results, including (1) a cannabinoid potency profile expressed as a range of percentages that extends from the lowest percentage to highest percentage of concentration for each cannabinoid listed from every test conducted on that strain of marijuana from the same marijuana cultivation facility within the last three months; (2) a statement listing the results of microbial testing required under 3 AAC 306.645(b)(2); (3) a statement listing the results of residual solvent testing required under 3 AAC 306.645(b)(3), if applicable; and (4) a statement listing any contaminants for which the product was tested in addition to contaminants for which 3 AAC 306.645(b) requires testing; any additional tested contaminants include (A) molds, mildew, and filth; (B) herbicides, pesticides, and fungicides; and (C) harmful chemicals. (f) If a marijuana cultivation facility ships wholesale marijuana from a harvest batch that has not been tested for each contaminant listed in (e)(4) of this section, the label for that batch must include a statement identifying each contaminant listed in (e)(4) of this section for which that harvest batch has not been tested.

XXXX

adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding. Product Lot #

Tracking number here (bar code)

Note:

Labels will be affixed for non-removal. They will be placed in unobstructed view (on the package etc..). A logo sticker may also be placed on the packaging, and will neither obscure or diminish the label's viewability.

XXXX

weight of marijuana or marijuana product received _____(date and signature of receiver). I also attest the marijuana was processed and stored according to Board / statutory direction_____(date and signature of the receiver). NO shipment of marijuana will be accepted unless accompanied by the MCB approved transport manifest). All transports and receptions will be coordinated by the Facility Owner or his designate. This document is in addition to any other tasks required by the Board / Alaska Law.

RE: Green Escape Marijuana Cultivation Facility

Dear John,

Upon my return from vacation the beginning of this week, Joel Cooper, our Stewardship Director, brought to my attention your July 5, 2017 letter response to an earlier letter of Kachemak Heritage Land Trust (KHLT), dated June 30, 2017, concerning your proposed Green Escape Marijuana Cultivation Facility. We appreciate the additional information you provided in this letter as to the nature and limited potential impacts of this proposed home-based business activity, as it allowed us to re-evaluate your proposed "Green Escape" project under the purpose and terms of the conservation easement and to conclude that your proposed activity *is permissible* under the reserved rights of the conservation easement provided that it is undertaken in the manner described in this letter.

When you conveyed your conservation easement to KHLT in 2005, you indicated your intent "that [your] Property will remain predominantly in its natural condition, subject to single family residential uses on the upland portion of the Property." As a result, Section 3(c) of the conservation easement prohibited commercial uses on the Property, as follows:

> 3. PROHIBITED USES. **Subject to the express development rights contained in Section 4, any use or activity on the Property inconsistent with the purpose of this Easement is prohibited. Without limiting the generality of the foregoing, the following activities and uses are expressly prohibited:**
>
> **(c) Industrial or commercial use of the Property, including, but not limited to, commercial logging, feedlots, dog kennels, mining, advertising, gravel extraction, campgrounds, motels, hotels, restaurants, vendors, and any other enterprise likely to materially intensify congestion, noise and/or traffic on the Property;**

However, upon further review, KHLT does not believe that this prohibition was intended to prevent "home-based" businesses that are fully contained within ancillary residential structures located on the building envelope on the Property, provided that these limited development rights reserved under Section 4 of the conservation easement "are to be conducted in a manner that does not impair the conservation values of the Property." As expressed in the consent decree under which the conservation easement was granted, KHLT must ensure that the land within the permanent wetland conservation area of the Property remains in its natural condition in perpetuity, and that any use of the Property that will impair or interfere with its conservation and water quality values are prevented.

RECEIVED
FEB 21 2018
ALCOHOL MARIJUANA CONTROL OFFICE
STATE OF ALASKA

Based upon your May 16, 2017 business plan and your follow up July 5, 2017 letter, we now understand that your proposed activity will include a residence, and an ancillary residential structure in which the "Green Escape" project will occur, and that the "Green Escape" project will include the following environmentally protective measures:

- The "Green Escape" project will be an indoor self-contained operation occupying a space of less than 500 square feet;
- The "Green Escape" project will not involve on-site sales of product to the general public;
- The "Green Escape" project will store all chemical indoors;
- The "Green Escape" project will store all cleaning materials and trash in an enclosed structure;
- The "Green Escape" project will dispose of all nutrient waste water and solid waste off-site (although organic plant matter may be shredded and composted on-site);
- The "Green Escape" project will use carbon filters to scrub the air as it is circulated from the different facility rooms; and
- The "Green Escape" project will be conducted in compliance with applicable law, including the conditions of its "Limited Marijuana Cultivation Facility" license granted by the State of Alaska.

KHLT grants its approval of the construction of your residence and ancillary residential structure, and your "Green Escape" home-based business in the ancillary residential structure, on the condition that you receive all required permit(s) and licenses, that the structures are constructed and maintained within the 3.402-acre building envelope on the upland portion of the Property as shown in Exhibit A to the conservation easement, and that the "Green Escape" project is conducted at all times in conformance to the above protective measures. Under these conditions, we believe that your project is consistent with the purpose and terms of the conservation easement and will not impair the conservation values of the Property. However, KHLT's approval does not extend to any activity that is not constructed and conducted in conformance to the above requirements, and KHLT retains all of its enforcement rights under the conservation easement if your activity is not constructed and conducted in conformance to the above requirements.

Thank you again for providing us your follow up letter of July 5, 2017. We are sorry for any confusion caused by our June 30, 2017 letter (which we retract) and we look forward to working with you as you proceed with your proposed activity. Let us know if you have any questions about the content of this letter.

Sincerely,

Marie McCarty
Executive Director

Cc: Joel Cooper, Stewardship Director
Sam Means, Board President
