MEMORANDUM

TO:	Chair Springer and Members of the Board	DATE:	August 15, 2018
FROM:	Erika McConnell, Director	RE:	Glacier Extracts #10828

Glacier Extracts, a marijuana product manufacturing facility, is requesting approval of amendments to its operating plan (approved products). Attached is MJ-15 Operating Plan Change application, and current operating plan. Detail on changes is provided by licensee on page 2 of MJ-15.

I would like to highlight two issues for the board's attention:

1. Koda Bar

At the April 2018 meeting, the board specifically required, as part of the delegation, that the Koda Bar be stamped with "THC." Most of the items that were proposed to have a "THC" imprint, of which removal is being requested, were approved at that meeting.

Please note that the board may be considering the addition of a universal THC symbol to many products.

2. Optional Ingredients

The licensee proposes optional ingredients for eight products. As discussed earlier, the board has approved a variety of flavor options in a single product. Is an "optional ingredient" acceptable?
