Alaska Marijuana Control Board

Operating Plan Supplemental
Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Side Show Food LLC	**License Number:**	13175		
License Type:	Marijuana Production License				
Doing Business As:	Fire Eater				
Premises Address:	36160 Spur Hwy, Suite A				
City:	Soldotna	**State:**	ALASKA	**ZIP:**	99669

Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	✓	
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	✓	

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	✓	
Closely resembles a familiar food or drink item including candy	✓	
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	✓	

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Food grade fats such as Butter or coconut oil, and food grade 99.99% alcohol

Operating Plan Supplemental
Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

Butter, Coconut oil

Take measured amount of cannabis material and place in either double boiler or slow cooker, cover with selected fat. Heat to between 180 to 230 deg and let set for 2 to 12 hr. Strain off solids, and pour fat into a tall narrow container. Wash the fat using warm water and stirring. place container into refrigerator and allow the fat to set up. In doing so the cannabinoids will bind to the fats and float, while the remaining plant material will settle in the bottom. Separate the fats and test for potency and use in production.

Alcohol

Place measured amount of cannabis into a seal-able, freezable, container and freeze to sub zero. Once frozen cover material with a food grade alcohol (grape alcohol is preferred). Over the span of 30 days, agitate mixture once a day and return to the freezer. After alloted time, strain off solids while keeping solution as cold as possible. Slow filter remaining liquid through paper filter while frozen to remove plant waxes. Test solution for potency and use in production

Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	High Dive: Pineapple Blueberry Soda
Type:	Edible

Product Description: Details must include the color, shape, and texture.	A light to medium purple colored liquid

Ingredients: This box is not applicable to marijuana concentrates	Water, Sugar, Pineapple Juice, Blueberry Juice, Cannabis Extract

Standard Production Procedure and Detailed Manufacturing Process:	Peel and puree fruit then run through a juicing press. Combine sugar and water over heat until boiling. Remove from heat add freshly pressed juice and steep. Pour the soda syrup solution into keg, add water, and carbonate, using a CO2 carbonation system. Using a closed loop bottling system, fill bottles with syrup mixture and add cannabis extract, cap and seal bottles, chill.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Color variations are expected due to the use of natural ingredients.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Acrobat: Pear Candy
Type:	Edible

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.

Red candy is an example of the individual candy packaging.

Package may contain 1 to 10 servings depending on market demand. And will be sized proportionally.

Sealed with tamper resistant shrink band

Sample Labels:
Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.

Pear Hard Candy

This space is reserved for Lot and product tracking numbers

Ingredients: Corn syrup (corn syrup, salt, vanilla), Sugar, Water, Pear Flavor (propylene glycol, alcohol, natural flavor), Green Food Color (water, propylene glycol, yellow #5, blue #1, propylparaben), Cannabis Extract

This product is manufactured in a facility that processes Soy, milk, wheat, tree nuts, peanuts, and eggs and may contain traces of all of the above

Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination, and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

If any product becomes expired or outdated that is not sold or transferred to another facility will be reported to the Alaska Enforcement division via email and in the state required tracking system (METRC). It will be held in a designated waste receptacles inside of a restricted access area for 3 days prior to being ground up and mixed with cardboard and paper products. All product that's considered waste will be mixed at the required 1:1 ratio with the cardboard and paper products before deeming it unusable. Final waste will be stored either inside a restricted access area in a designated MJ waste receptacle or a locking dumpster until picked up and disposed of by a local waste disposal service.
