Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

What is this form?

This operating plan change form is required for all marijuana establishment licensees seeking to change a licensed marijuana establishment's existing operating plan, as required by 3 AAC 306.100. With this form, a licensee may request changes to as much or as little as desired of Form MJ-01 and/or the corresponding operating plan supplemental for the establishment's license type. **The required $250 change fee may be made by check, cashier's check, or money order.**

Please download, complete, and submit with this form **only the pages** of Form MJ-01 and/or the corresponding operating plan supplemental that contain sections that you are requesting to change. All fields that are left blank will be considered unchanged from the existing operating plan. All fields that are completed and submitted with this form will be considered as changes to the existing operating plan and are subject to board approval. **Please do not submit any wholly unchanged pages of an operating plan.**

The form(s) that I am requesting board approval to change is:

- [ ] **Form MJ-01:** Marijuana Establishment Operating Plan
- [ ] **Form MJ-03:** Retail Marijuana Store Operating Plan Supplemental
- [ ] **Form MJ-04:** Marijuana Cultivation Facility Operating Plan Supplemental
- [x] **Form MJ-05:** Marijuana Product Manufacturing Facility Operating Plan Supplemental
- [ ] **Form MJ-06:** Marijuana Testing Facility Operating Plan Supplemental

This form must be completed and submitted to AMCO's main office prior to changing existing operations. The licensed establishment's operations may not be altered unless and until the director has given temporary approval or the Marijuana Control Board (MCB) has given final approval of the changes. Please note that licensees seeking to change operating plans for multiple licenses must submit a separate completed copy of this form for each license.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Lady Gray, LLC	**MJ License #:**	12254		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Lady Gray Gourmet Medibles				
Premises Address:	36322 Pine Street, Suite 1				
City:	Soldotna	**State:**	Alaska	**ZIP:**	99669

Approved at April 2018 meeting

Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

Section 2 – Summary of Changes

Provide a summary of the changes for which you are requesting approval.

We're adding a half cookie serving size to Orange Chocolate Cookies in addition to the originally approved full cookie serving size. Each half cookie serving will still contain 5mg THC. Cookies will be cut in half so consumers have a clear indication of serving size.

The packaging description of Sunny Day Granola is being revised so that each serving is individually packaged into a zippered pouch within the larger exit package instead of the multiple servings packaged into one mylar bag to be measured by the consumer.

Section 3 – Declarations

Read each statement below, and then sign your initials in the corresponding box to the right: Initials

The proposed changes conform to all applicable public health, fire, and safety laws. [JG]

I understand that any temporary approval granted by the director is pending a final decision by the MCB; therefore, any investment I make, based upon temporary approval, is at my own risk. [JG]

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Orange!Chocolate!Chip Cookies		
Product Type:	Marijuana Edible Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3 months in freezer

Product Description: Details must include the color, shape, and texture.	Chunky, round drop cookies with orange zest, milk chocolate chips throughout and light brown in color with dark brown chocolate chips.
Ingredients: This box is not applicable to marijuana concentrates.	INGREDIENTS: CANNABIS COCONUT OIL (ORGANIC COCONUT OIL, MARIJUANA, SUNFLOWER LECITHIN), ENRICHED BLEACHED FLOUR (WHEAT FLOUR, MALTED BARLEY FLOUR, NIACIN, IRON, THIAMINE, RIBOFLAVIN, FOLIC ACID), SUGAR, BROWN SUGAR, ORGANIC EGGS, ORANGE LIQUEUR, ORANGE ZEST, LESS THAN 2% OF: MILK CHOCOLATE (SUGAR, UNSWEETENED CHOCOLATE, WHOLE MILK POWDER, COCOA BUTTER, SOY LECITHIN (EMULSIFIER), VANILLA), BAKING SODA, SEA SALT
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be blended together with an electric mixer until creamy and then scooped and baked. When cool, they will be packaged with appropriate labeling and then frozen.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Cleanly Cut Cookie

Received by AMCO 3.18.18

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Orange!Chocolate!Chip Cookies
Product Type:	Marijuana Edible Product

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Cookies will be packaged in two size options (4 or 10 servings per package) and in a mylar exit bag that is child resistant, resealable, and freezer/food safe. The labeling will be printed on waterproof labels to retain integrity in the freezer. It meets ASTM D3475 (American Society for Testing and Material Child Resistant) standards. Two serving size package options will be available: 1/2 cookie servings and 1 whole cookie servings. Each serving will not exceed 5mg THC whether the serving is half of a cookie or a whole cookie.

For half cookie serving packages:
4 - half cookies at 5mg THC each = 20mg THC total per package

10 - half cookies at 5mg THC each = 50mg THC total per package

1/2 cookie (5mg THC) = 1 serving
Cookies will be cut in half as shown on previous page.

For whole cookie serving packages:
4 - cookies at 5mg THC each = 20mg THC total per package

10 - cookies at 5mg THC each = 50mg THC total per package

1 whole cookie (5mg THC) = 1 serving

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

*See next page for label

Handcrafted in Small Batches with Love

Soldotna, Alaska WWW . LADYGRAYMEDIBLES . COM License #12254

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly - Stay put or get a ride.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sunny Day Granola		
Product Type:	Marijuana Edible Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 months in freezer

Product Description: Details must include the color, shape, and texture.	Loose granola mix including oats, nuts, coconut flakes and chocolate chips.
Ingredients: This box is not applicable to marijuana concentrates.	Oats, organic chocolate chips (organic sugar, organic coca mass, organic cocoa butter, organic vanilla), organic unsweetened coconut flakes, cannabis coconut oil (organic coconut oil, marijuana, sunflower lecithin), pecans, honey, maple syrup, walnuts, hemp hearts, sea salt, vanilla extract, cinnamon
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be mixed together by hand in large mixing bowls and then baked in a commercial oven and cooled. Individual packaging will take place after complete cooling and granola will be weighed with kitchen scales for accuracy, then into appropriate bags with labels.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	✓	☐
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	✓	☐

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	✓	☐
Closely resembles a familiar food or drink item including candy	✓	☐
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	✓	☐

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

We will utilize a solvent-less rosin presser (hydraulic) with high pressure and low temperature for extraction to create rosin.

We will infuse organic coconut oil and organic butter with marijuana in a variety of ways: crock pots, on the stove, or a magical butter machine (which regulates heat and time/temp combinations specifically for infusing).

We will create two types of tinctures by infusing alcohol or vegetable glycerin either on the stove or in the magical butter machine.

Keif: During trimming kief will be collected using screens with traps under all trimming activities. Alternatively, marijuana flower can also be frozen and then spun at high speeds in a Pollinator or similar machine, that collects the kief as the frozen flower is spun.

Phone: 907.269.0350

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

The Rosin Press: Marijuana material is placed in a filter bag, then in parchment paper and pressed with the Rosin Press according to directions supplied by manufacturer. Temperature and pressure is adjusted according to the type of material (flower versus trim). Rosin is then carefully scraped from parchment paper and is a finished product. Leftover chips will be saved to infuse butters or oils.

Coconut Oil and Butter: If using the magical butter machine, material will be put into the machine according to manufacturer directions and the corresponding button will be selected for optimal results (i.e. 1, 2, 4 or 8 hours). If using the stove top method oil or butter will be placed in glass jars with plant material, then placed in a large pot of water and then temperature/time will be monitored for optimal results. If using a crock pot, a similar method to the stove will be used, utilizing product in glass jars surrounded by hot water.

Tinctures will be made with either a no heat long steep technique (plant material and alcohol/vegetable glycerin in a jar, left to infuse without heat for 2 weeks - 6 months), a heat steep technique (plant material and alcohol/vegetable glycerin brought up to 165 degrees for short amount of time, in a double boiler set up in glass jars and then in a waterbath), or in the magical butter machine according to manufacturer directions.

Keif: During trimming kief will be collected using screens with traps under all trimming activities. Alternatively, marijuana flower can also be frozen and then spun at high speeds in a Pollinator or similar machine, that collects the kief as the frozen flower is spun.

LADY GRAY

GOURMET MEDIBLES

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly - Stay put or get a ride.

INGREDIENTS: ENRICHED UNBLEACHED FLOUR (WHEAT FLOUR, MALTED BARLEY FLOUR, NIACIN, IRON, THIAMINE, RIBOFLAVIN, FOLIC ACID), SUGAR, CANNABIS BUTTER (ORGANIC SALTED BUTTER, MARIJUANA, SUNFLOWER LECITHIN), EGGS, BLUEBERRIES, UNBLEACHED WHITE WHOLE WHEAT FLOUR, LESS THAN 2% OF: CANNABIS BUTTER (ORGANIC SALTED BUTTER, MARIJUANA, SUNFLOWER LECITHIN), SOUR CREAM (CULTURED CREAM, ENZYMES), PECANS, SEA SALT, BAKING SODA, VANILLA EXTRACT, CINNAMON

WWW.LADYGRAYMEDIBLES.COM

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly -
Stay put or get a ride.

Product Name:	Elation
Type:	Marijuana Product

Product Description: Details must include the color, shape, and texture.	Coconut oil based infused massage oil, yellowish green to brown in color.

Ingredients: This box is not applicable to marijuana concentrates	Cannabis Coconut Oil, Jasmine Absolute, Grapeseed Oil, 100% Ylang Ylang Extra Oil

Standard Production Procedure and Detailed Manufacturing Process:	Infused coconut oil (by methods as outlined on page 2 and 3) will be tested for potency then properly mixed with essential oils to yield 50 mg THC per 10ml bottle. Each 10ml glass bottle with spray nozzle will be sterilized prior to filling.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Frozen Orange Milk Chocolate Cookie Dough
Type:	Marijuana Product

Product Description: Details must include the color, shape, and texture.	Brown, chunky, round, drop cookie dough with orange zest, milk chocolate chips throughout to be baked at home by consumer.

Ingredients: This box is not applicable to marijuana concentrates	CANNABIS BUTTER (ORGANIC SALTED BUTTER, MARIJUANA, SUNFLOWER LECITHIN), ENRICHED UNBLEACHED FLOUR (WHEAT FLOUR, MALTED BARLEY FLOUR, NIACIN, IRON, THIAMINE, RIBOFLAVIN, FOLIC ACID), SUGAR, BROWN SUGAR, EGGS, ORANGE LIQUEUR, ORANGE ZEST, MILK CHOCOLATE (SUGAR, UNSWEETENED CHOCOLATE, WHOLE MILK POWDER, COCOA BUTTER, SOY LECITHIN (EMULSIFIER), VANILLA), BAKING SODA, SEA SALT

Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be mixed together and mixed like classic cookie recipe in an electric mixing bowl, but with calculations made according to what will yield 5mg TCH per cookie. It will then be scooped, weighed and put onto parchment paper, into the freezer for a quick freeze. Cookie dough balls will then be packaged into labeled freezer/food safe exit bags.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly - Stay put or get a ride.

STORE UNEATEN MEDIBLES BACK IN THIS BAG AFTER BAKING:

Help prevent accidental ingestion - this bag is child resistant and resealable.

Product Name:	Fireball Tincture
Type:	Marijuana Product

Product Description: Details must include the color, shape, and texture.	Liquid consistency, alcohol based with cinnamon added for flavor and smell. Color can range from greenish yellow to light brown.

Ingredients: This box is not applicable to marijuana concentrates	Ethyl Alcohol, cannabis, cinnamon extract

Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be mixed together and either put into the magical butter machine for the recommended time or left using the cold steep method for 2 weeks to 6 months. Once deemed ready, the mixture will be strained with a fine mesh bag to separate the solids from the liquid.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

INGREDIENTS: ORGANIC FAIR TRADE COCOA, ORGANIC FAIR TRADE COCOA BUTTER, HONEY, ROASTED ALMONDS, CANNABIS COCONUT OIL (ORGANIC COCONUT OIL, MARIJUANA, SUNFLOWER LECITHIN), LESS THAN 2% OF: SEA SALT, VANILLA EXTRACT

WWW.LADYGRAYMEDIBLES.COM

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly -
Stay put or get a ride.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Mocha Walnut Muffins
Type:	Marijuana Product

Product Description: Details must include the color, shape, and texture.	Moist, spongy mini muffin with chocolate coffee flavor and a crunchy sweet walnut topping. Light to dark brown with nuts on top.

Ingredients: This box is not applicable to marijuana concentrates	WHOLE MILK, ENRICHED UNBLEACHED FLOUR , BROWN SUGAR, CANNABIS BUTTER (ORGANIC SALTED BUTTER, MARIJUANA, SUNFLOWER LECITHIN), SUGAR, WALNUTS, COFFEE, SEMI SWEET MINI CHOCOLATE BAKING CHIPS (SUGAR, UNSWEETENED CHOCOLATE, COCOA BUTTER, SOY LECITHIN, VANILLA), EGGS, COCOA, PECANS, DARK CHOCOLATE (CHOCOLATE, SUGAR, COCOA BUTTER, SOY LECITHIN (EMULSIFIER), VANILLA), BAKING SODA, VANILLA EXTRACT, ESPRESSO POWDER, CINNAMON, SEA SALT

Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be blended together with an electric mixer and then baked in a commercial oven according to what will yield approximately 5mg THC mini muffins. Muffins will then be flash frozen and then appropriately packaged in exit bags with labeling.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

INGREDIENTS: TURBINADO SUGAR, CANNABIS BUTTER (ORGANIC SALTED BUTTER, MARIJUANA, SUNFLOWER LECITHIN), ORGANIC EGGS, WHITE WHOLE WHEAT FLOUR, LESS THAN 2% OF: VANILLA EXTRACT, SEA SALT, BAKING POWDER , BAKING SODA

WWW.LADYGRAYMEDIBLES.COM

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly -
Stay put or get a ride.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Sunny Day Granola
Type:	Marijuana Product

Product Description: Details must include the color, shape, and texture.	Loose granola mix including oats, nuts, coconut flakes and chocolate chips.

Ingredients: This box is not applicable to marijuana concentrates	Oats, organic chocolate chips (organic sugar, organic cocoa mass, organic cocoa butter, organic vanilla), organic unsweetened coconut flakes, cannabis coconut oil (organic coconut oil, marijuana, sunflower lecithin), pecans, honey, maple syrup, walnuts, hemp hearts, sea salt, vanilla extract, cinnamon

Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be mixed together by hand in large mixing bowls and then baked in a commercial oven and cooled. Individual packaging will take place after complete cooling and granola will be weighed with kitchen scales for accuracy, then into appropriate bags with labels.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Sunny Day Granola
Type:	Infused granola

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Granola will be packaged in one cup increments in a child resistant/smell proof food safe mylar bag and then again in a larger mylar exit bag that is child resistant, resealable, and freezer/food safe. The labeling will be printed on waterproof labels to retain integrity in the freezer. It meets ASTM D3475 (American Society for Testing and Material Child Resistant) standards. 2 Tablespoons (5mg THC) = 1 serving 16 Tablespoons at 5mg THC per 2 Tablespoons = 40mg THC total

Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	These labels will be applied to the front and back of the smaller mylar bag that is inside the exit bag. The exit bag labeling is on the next page.

Form MJ-05: Marijuana Product Manufacturing Facility

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Mocha Chocolate Chunk Cookies
Type:	Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Cookies will be packaged in two size options and in a mylar exit bag that is child resistant, resealable, and freezer/food safe. The labeling will be printed on waterproof labels to retain integrity in the freezer. It meets ASTM D3475 (American Society for Testing and Material Child Resistant) standards. 4 cookies at 5mg THC each = 20mg THC total per package 10 cookies at 5mg THC each = 50mg THC total per package 1 cookie (5mg THC) = 1 serving

Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	See next page

LADY GRAY

GOURMET MEDIBLES

Avoid Accidental Ingestion:

Keep your edibles inside this resealable/reusable childproof package. Most of our edibles are created to stay frozen (for up to 6 months) until ready to enjoy. This package is perfect for your freezer and protects from anyone accidentally ingesting cannabis, adults and children alike.

Start Low and Go Slow:

Your digestive system processes cannabis slowly, especially if you've already eaten a substantial meal. Remember that the THC in orally consumed cannabis will be metabolized by the liver into 11-hydroxy-THC and this form is twice as strong and will last twice as long as regular THC. One hour is a minimum wait time to feel the effects (starting with a minimum dose of 5-10mg), as it can sometimes take up to three hours, depending on your body.

Do Not Drive or Operate Machinery:

Due to the slow nature edibles can take, 8 hours is recommended from the time you ingest cannabis to the time you drive so please plan your experience accordingly - Stay put or get a ride.

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

Marijuana or marijuana product that is expired or is otherwise deemed as waste by the facility will first be separated from other marijuana and marijuana products and placed into the designated waste area of the facility. The waste will then be entered into METRC and AMCO enforcement will be notified via email if/when necessary.
Marijuana products will be removed from any packaging and placed into a locked bin until it can be rendered unusable and disposed of. Marijuana flower will also be placed into a locked bin until it can be rendered unusable and disposed of. After the required three day notice period to AMCO, all waste will be rendered unusable by grinding and then mixing with other non-marijuana waste such as: paper, cardboard, plastic, food waste, vegetable oil or other compostable or non-compostable solid waste. The final mixture will be inspected to ensure it is at least 50% non-marijuana waste and will then be transferred to the local solid waste facility.

Section 7 – Testing

The area where in-house testing will occur must be identified on the premises diagram, per 3 AAC 306.520(2).	Yes	No
Will the marijuana product manufacturing facility perform in-house testing (as defined in 3 AAC 306.990(b)(20))?	☐	☑

Applicants should review 3 AAC 306.550 and be able to answer "Agree" to the item below.

The marijuana cultivation facility applicant has:	Agree	Disagree
Read and understands and agrees to the required laboratory testing set forth in 3 AAC 306.550	☑	☐

I declare under penalty of perjury that I have examined this form, including all accompanying schedules and statements, and to the best of my knowledge and belief find it to be true, correct, and complete.
