To Whom It May Concern:

I live down the road from where this facility wants to open shop. I am opposed to this business being put on the corner of Murray Lane and Sterling Highway. This would be a high traffic retail business where dangerous lines could form making it an extreme hazard in this location. It is a very precarious location to get on and off of from the Sterling Highway The disruption for the the neighborhood would be unnerving. This is an area where school buses come to pick up and drop off school children. The facility would be located just off from where the children wait for these buses and are dropped off from these buses. Also there is a church just a few hundred feet down the road. Furthermore, there is a U S Post Office box cluster right across from the proposed site just around the corner as you turn off the Sterling Highway. There is no access to this location directly from the Sterling Highway. The only access is through Murray Lane. The traffic this site would generate would be such a safety issue for the children as well as those that live down the road and retrieve their mail from the cluster boxes.

There must be another location where children, church, elderly, disabled, and other affected individuals would not be put into such danger. No one wants to fear for the safety of their children or for that matter for the safety and welfare of anyone who lives in this proposed site area.

Thank you for your consideration of this objection.

Respectfully,

S. M. Mettler
