Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Arctic Bakery, LLC	**MJ License #:**		16006	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Arctic Bakery, LLC				
Premises Address:	1409 Well Street				
City:	Fairbanks	**State:**	Alaska	**ZIP:**	99701

Received by AMCO 11/21/18

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

Incoming marijuana MJ fiber to be purchased from licensed cultivators only. Test results conducted by a licensed test facility for incoming fiber will be reviewed by management to ensure minimum AMCO and facility quality standards for acceptance are met before authorizing transport. Minimum factors include: specific strain of MJ, cannabinoid potency profile, microbial, residual solvent(s), mold, mildew, filth, herbicides, pesticides, fungicides and harmful chemical(s). Authorized incoming fiber will be received by the lab manager & general manager, who will verify the actual fiber received meets the product test results, verify actual received weight on registered scale(s), log the shipment into the MJ inventory tracking system, & store in secure, cool, dry storage area of the restricted access facility. Incoming fiber that fails to meet minimum standards will be rejected and returned to the licensed cultivator immediately. Specific fiber batches weighed on a registered scale for oil extraction, logged in the MJ inventory tracking system, will be pre-chilled in the walk-in freezer, soaked in pre-chilled ethanol, & the infused ethanol processed in the lab by: (1) filtration to 10 microns, (2) rotovap system, (removes ethanol which is recaptured for subsequent use & the decarboxylation of crude oil is also accomplished) & (3) distillation. Processed distilled oil weighed by lab manager & verified by general manager, labeled, logged in the MJ inventory tracking system, segregated in secure area of the lab until test results returned. Extracted fiber, residual processing MJ oil waste, & any oil that fails third party testing will be weighed on a certified scale, logged in the MJ inventory tracking system by lab manager & verified by general manager, then securely stored until destroyed per MJ waste policy. Each MJ infused edible production order will use only tested and inventoried distilled oil. The production/packaging room will comply with and exceed all health and safety requirements of 3 AAC 306.735 and 18 AAC 31 requirements. Specific weigh of oil needed for each production order to comply with the exact 5mg of THC requirement per edible serving including calculating variances will be determined and weighed by lab manager on certified scale(s), logged into the MJ inventory tracking system, verified by General Manager and released to production crew lead with production order signed by both employees.

Continued On Page 8 - Additional Space

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

The extraction laboratory within the licensed Arctic Bakery premises facility will employ the following method/techniques and equipment to create and process marijuana concentrate and other marijuana by products and extractions: Store and pre-chill marijuana fiber and food grade ethanol in the walk in freezer, reduce to extremely low temperatures both the marijuana fiber and the ethanol solvent in an extremely low temperature chest freezer, soak marijuana fiber in the food grade ethanol, winterize the ethanol based extract through a vacuum assisted triple filtration system, evaporate the the ethanol solvent from the THC oil through a roto-evaporation process with the use of a 20L roto-evaporator, vacuum pump and chiller system, resulting in the recapture of the ethanol solvent for reuse, remove the THC oil from the 20L flask through moderate heat motivation with the use of a standard hair dryer, decarboxylate the THC oil on a magnetic stir plate and then process the decarboxylated THC oil through a 5L short path distillation system removing the terpenes and impurities, resulting in a high quality/high percentage of purity THC oil to infuse into the edible products.

The facility may also use methods of extraction that do not require solvents such as keif sifting, cold water and dry ice methods, and heat press for rosin extracting in the future.

(Additional Space as Needed):

Section 2 - Overview of Operations - 2.1 Continued

Production crew lead will determine exact weight and volume of chocolate ingredients and/or candy ingredients needed to fulfill each production order and verified by General Manager. Pre-measured THC oil will be infused into the specific batch of edibles during the production process. Manufactured individual edible servings will be mechanically wrapped in nitrogen filled clear 4mm mylar to protect from potential contamination during the production shift, segregated for storage and logged into the MJ inventory tracking system. Each completed production order to be signed by shift lead and General Manager. Test samples for each batch will be third party tested with: product that passes testing will be packaged (within potency requirements of 3 AAC 306.560: not to exceed ten (10) individual servings of 5mg THC each for a maximum total of 50mg THC per package and all packaging requirements of 3 AAC 306.565) and labeled per AMCO approved methods (3 AAC 306.570) reviewed by the General Manager and logged into MJ inventory tracking system and stored in the secure and climate controlled facility until transported for distribution to licensed retailers. Any product that fails testing will be weighed on a certified scale and segregated by the lab manager and verified General Manager, logged into MJ inventory tracking system and securely stored until destroyed per MJ waste policy. Completed packaged products that pass third party licensed testing under 3 AAC 306.550 and meet company quality control standards to be destributed will be transported by an authorized employee, agent or third party transporter only to licensed retailers. The transportation of MJ infused products will meet all requirements of 3 AAC 306.750 and all products shipments will be logged into the MJ inventory tracking system and transport manifest generated. Any rejected or returned product from a retailer will be logged into the MJ inventor tracking system. In the event of a product recall, the company recall policy will be immediately implemented, AMCO and DEC notified and all product subject to the recall transported to the facility within 3 AAC 306.750 as rapidly as feasible, segregated, logged in the MJ inventory tracking system and destroyed under the MJ waste plan, unless specific directives are received by AMCO and/or DEC, in which case such directive instructions will be followed. All reports and documents generated during these processes will be preserved as business records and available to AMCO. All extraction, production and packaging activities will be video surveillance recorded, stored in the secure surveillance room available to AMCO.

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it. BS

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

The list of marijuana or marijuana products that are designated as marijuana waste will be labeled and logged, stored separately and rendered unusable and disposed of: (1) Marijuana fiber that has been extracted, (2) waste residue created during the extraction process, (3) any processed product that fails third party testing, (4) any processed product that fails to meet company quality standards, (5) any processed product that is outdated or expired, and (6) any product returned to the facility in the event of a recall. All material designated as marijuana waste will be labeled and securely stored separately from all other marijuana or marijuana products until it is rendered unusable and disposed off. A marijuana waste log will be kept with secured business records, available to AMCO upon request, which will include (1) status of all marijuana waste, (2) types of all marijuana waste, (3) date AMCO was notified of planned schedule to render waste unusable, (4) date that marijuana waste was made unusable, and (5) date the unusable marijuana waste was picked up by the trash service provider. AMCO will be provided a minimum of three days written notice before the process to render the marijuana waste unusable is accomplished and the date the notification sent will be logged.
To render marijuana waste unusable it will be ground by a designated employee in full view of interior facility security video recording, with compostable or non-compostable solid wastes with the resulting mixture containing a minimum of 51% non-marijuana waste. The non-marijuana wastes to be used include: (1) paper waste, (2) plastic waste, (3) cardboard waste, (4) food waste, (5) yard waste and (6) vegetable based grease and/or oils. Once completed a manager will inspect and insure the process was done correctly, securely store the unusable waste separate from all other marijuana and marijuana products and note the event in the marijuana waste log. The recorded and processed waste will be disposed of in the trash dumpster, which will be located inside the facility property fencing which is a restricted area and covered by exterior surveillance video cameras, on a scheduled day for trash pickup. The date of the disposal will be entered into the marijuana waste log.

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	BS

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 6.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

All Marijuana (MJ) fiber purchased will only be from licensed cultivators. Arctic Bakery will require random samples of the actual fiber under consideration to be purchased, to be third party tested in a licensed testing facility before accepting the fiber. The key factors for incoming MJ fiber include: specific strain, cannabinoid potency profile, microbial, residual solvents(s), mold, mildew, filth, herbicides, pesticides, fungicides and harmful chemical(s). MJ fiber that fails testing will be rejected and not purchased from the cultivator. Fiber that passes testing standards will be purchased, transported and upon acceptance at the facility, weighed, entered into the MJ inventory tracking system and stored in the walk in freezer. Subsequent to the extraction and distillation process, THC oil will be weighed, entered into the MJ inventory tracking system, segregated and random samples selected and transported to a licensed third party testing facility. The THC oil will be tested for the cannabinoid potency, microbial, residual solvents(s), mold, mildew, filth, herbicides, pesticides, fungicides and harmful chemical(s). THC Oil that fails this testing will be weighed, entered into the MJ inventory tracking system and securely stored until destroyed per the MJ waste policy. THC Oil that passes the testing will be weighed, entered into the MJ inventory tracking system and securely stored in a controlled environment until released for infusion into edible products. Each batch of manufactured infused edible products will be assigned a specif batch number and a specific weight of THC oil will be assigned and entered into the MJ inventory tracking system before production. AT the conclusion of each batch of infused edible production, the batch data will be entered into the MJ inventory tracking system, the product will be segregated and securely stored and random edible product samples will be transported to a licensed third party testing facility. The random samples will be tested for the cannabinoid potency, microbial, residual solvents(s), mold, mildew, filth, herbicides, pesticides, fungicides and harmful chemical(s). Batches that fail this testing will be entered into the MJ inventory tracking system and securely stored until destroyed per the MJ waste policy. Batches that pass this testing will be entered into the MJ inventory tracking system and become available for wholesale distribution to licensed retail stores. The exterior packaging will be clearly labeled with the testing information set forth in 3 AAC 306.570 as illustrated in MJ-05 Section 7 for each product, "Sample Labels".

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sinners and Saints Candy Apple		
Product Type:	Edible		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year

Product Description: Details must include the color, shape, and texture.	Cannabis distillate infused candy, light green in color, smooth, round, hard candy made in equally dosed and measured portions, individually wrapped and placed in a child resistant, resealable pouch of ten (10) candies per pouch.
Ingredients: This box is not applicable to marijuana concentrates.	Granulated Sugar, Corn Syrup, Artificial Flavor, Citric Acid, Malic Acid, Coconut Oil, Cannabis Oil, Artificial Color. CONTAINS: Coconut.
Standard Production Procedure and Detailed Manufacturing Process:	Candy is rolled, tempered and infused with batched and dosed cannabis distillate for uniformity. Candy is poured into vibrating molds to reduce air bubbles and create consistent density from piece to piece. Candy is then packaged in single, individual air tight flow wrap packaging; counted into pouches of ten (10) and labeled.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	**Sinners and Saints Candy Apple**
Product Type:	**Edible**

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	**Ten (10) individually wrapped 5 gram candy (servings) of equally dosed (5mg) THC portions are placed into a child resistant, heat sealed, resealable opaque, foiled mylar pouch with a total of 50mg of THC per pouch. The pouch is green and white (denoting apple) and calls out number of servings, THC (mg) per serving and other information compliant with 3 AAC 306.565.**
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	Sinners & Saints Apple – 50 mg Batch/Lot Number:_____ Gross Weight:_____ Net MJ Weight:_____ Mfd. Date:_____ Exp. Date:_____ Tested By:_____ License Number:_____ Strain:____ THC:___% THCA__% CBD__% CBDA:__% CBN:__% Contaminants tested for: mold, mildew, filth herbicides, pesticides, fungi, residual solvents Label to be attached or printed on the back side of the packages in the empty box printed for this purpose, directly below the Arctic Bakery logo.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sinners and Saints Candy Blue Raspberry		
Product Type:	Edible		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year

Product Description: Details must include the color, shape, and texture.	Cannabis distillate infused candy, blue in color, smooth, round, hard candy made in equally dosed and measured portions, individually wrapped and placed in a child resistant, resealable pouch of ten (10) candies per pouch.
Ingredients: This box is not applicable to marijuana concentrates.	Granulated Sugar, Corn Syrup, Citric Acid, Artificial Color, Coconut Oil, Artificial Flavor, Cannabis Oil. CONTAINS: Coconut.
Standard Production Procedure and Detailed Manufacturing Process:	Candy is rolled, tempered and infused with batched and dosed cannabis distillate for uniformity. Candy is poured into vibrating molds to reduce air bubbles and create consistent density from piece to piece. Candy is then packaged in single, individual air tight flow wrap packaging; counted into pouches of ten (10) and labeled.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	**Sinners and Saints Candy Blue Raspberry**
Product Type:	**Edible**

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Ten (10) individually wrapped 5 gram candy (servings) of equally dosed (5mg) THC portions are placed into a child resistant, heat sealed, resealable opaque, foiled mylar pouch with a total of 50mg of THC per pouch. The pouch is blue and white (denoting blue raspberry) and calls out number of servings, THC (mg) per serving and other information compliant with 3 AAC 306.565.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Sinners & Saints Blue Raspberry – 50 mg
Batch/Lot Number:_____
Gross Weight:_____ Net MJ Weight:_____
Mfd. Date:_____ Exp. Date:_____
Tested By:_____ License Number:_____
Strain:____ THC:___% THCA__%
CBD__% CBDA:__% CBN:__%
Contaminants tested for: mold, mildew, filth herbicides, pesticides, fungi, residual solvents

Label to be attached or printed on the back side of the packages in the empty box printed for this purpose, directly below the Arctic Bakery logo.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sinners and Saints Candy Butterscotch		
Product Type:	Edible		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year

Product Description: Details must include the color, shape, and texture.	Cannabis distillate infused candy, gold in color, smooth, round, hard candy made in equally dosed and measured portions, individually wrapped and placed in a child resistant, resealable pouch of ten (10) candies per pouch.
Ingredients: This box is not applicable to marijuana concentrates.	Granulated Sugar, Corn Syrup, Butter, Artificial Flavor, Cannabis Oil, Sea Salt, Artificial Color. CONTAINS: Milk.
Standard Production Procedure and Detailed Manufacturing Process:	Candy is rolled, tempered and infused with batched and dosed cannabis distillate for uniformity. Candy is poured into vibrating molds to reduce air bubbles and create consistent density from piece to piece. Candy is then packaged in single, individual air tight flow wrap packaging; counted into pouches of ten (10) and labeled.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	**Sinners and Saints Candy Butterscotch**
Product Type:	**Edible**

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Ten (10) individually wrapped 5 gram candy (servings) of equally dosed (5mg) THC portions are placed into a child resistant, heat sealed, resealable opaque, foiled mylar pouch with a total of 50mg of THC per pouch. The pouch is tan and white (denoting butterscotch) and calls out number of servings, THC (mg) per serving and other information compliant with 3 AAC 306.565.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Sinners & Saints Butterscotch – 50 mg
Batch/Lot Number:_____
Gross Weight:_____ Net MJ Weight:_____
Mfd. Date:_____ Exp. Date:_____

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sinners and Saints Candy Peppermint		
Product Type:	Edible		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year

Product Description: Details must include the color, shape, and texture.	Cannabis distillate infused candy, white in color, smooth, round, hard candy made in equally dosed and measured portions, individually wrapped and placed in a child resistant, resealable pouch of ten (10) candies per pouch.
Ingredients: This box is not applicable to marijuana concentrates.	Granulated Sugar, Corn Syrup, Coconut Oil, Artificial Color, Cannabis Oil , Natural Flavor. CONTAINS: Coconut.
Standard Production Procedure and Detailed Manufacturing Process:	Candy is rolled, tempered and infused with batched and dosed cannabis distillate for uniformity. Candy is poured into vibrating molds to reduce air bubbles and create consistent density from piece to piece. Candy is then packaged in single, individual air tight flow wrap packaging; counted into pouches of ten (10) and labeled.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	**Sinners and Saints Candy Peppermint**
Product Type:	**Edible**

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Ten (10) individually wrapped 5 gram candy (servings) of equally dosed (5mg) THC portions are placed into a child resistant, heat sealed, resealable opaque, foiled mylar pouch with a total of 50mg of THC per pouch. The pouch is red, white and green (denoting peppermint) and calls out number of servings, THC (mg) per serving and other information compliant with 3 AAC 306.565.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Sinners & Saints Peppermint – 50 mg
