I am very concerned with B&E putting in for this license to cultivate marijuana. I am the closest neighbor to the property they are wanting to cultivate marijuana on. My family has lived in this house and neighborhood for over 13 years now. I am worried about the potential crime this will bring to my back yard. I have a 2 year old son and one on the way. How on earth, would anyone ever want to raise a family next to something like that? How would we ever be able to sell our home with such a thing next door in a subdivision?!
My concerns are with the area they are wanting to do this In. There is an Elementary school 4 miles away!!! What about the property values of neighboring homes?? This is a sub division and family neighborhood. This isn't the middle of nowhere. This is Pittman road. Families in this area are heavily affected by this decision. Please, please for all it is worth hear us out on this matter. This will not do the area any favors. Not to mention the property they are wanting to cultivate on will be running off well water, some homes in this area had to dig 3+ wells to find a good one. This area struggles with low water levels as it is. Or were they planning on using the water from the wet lands behind their property to water the plants?? Which is illegal. Either way, this area is not okay for what they want to do. It's not safe for the families or practical for anyone but the people who are applying. Let them do this somewhere else, not in our backyards! Thank you. I hope our voices will be herd.
