Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Fireweed Extracts Budder		
Product Type:	Concentrate		
Perishable: Yes/No	No - If refrigerated.	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts Budder is a portion cut from a batch to get the specific weight desired. Exact shape and thickness varies. Color ranges from a light gold to a dark amber. Generally opaque. Texture is soft and gooey. When frozen, it becomes hard and brittle and can easily shatter into small pieces.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	A closed-loop system is used to extract the essential oils from the plant using a solvent or mix of solvents. The solvents are recovered from the extracted oils back into a holding tank until there is a thin liquid in the bottom vessel. This liquid is transfered to a shallow pan and placed in a vacuum oven to purge the remaining solvents. The purging and finishing process can take from 3 to 10 days and is done with low heat. After testing, the product is weighed into 1/2 gram to 1 gram portions and packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Fireweed Extracts Budder
Product Type:	Concentrate

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Packages will be small clear glass containers with white or clear lids inside white and clear mylar heat-sealed child-proof bags. Jar sizes will range from 6 ml to 9 ml. Bags will be approximately 3.5"x 5" to 4"x6". Budder will come in 1/2 gram or 1 gram amounts. The total amount of THC will vary with the original product used to create the concentrate, and will range from 40% to 99%.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Product Name:	Fireweed Extracts Crumble		
Product Type:	Concentrate		
Perishable: Yes/No	No - If refrigerated.	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts Crumble is granular in texture and ranges from light gold to dark amber in color. It has no shape, instead it resembles a pile of gooey cake crumbs.

Ingredients: This box is not applicable to marijuana concentrates.	

Standard Production Procedure and Detailed Manufacturing Process:	A closed-loop system is used to extract the essential oils from the plant using a solvent or mix of solvents. The solvents are recovered from the extracted oils back into a holding tank until there is a thin liquid in the bottom vessel. This liquid is transfered to a shallow pan and placed in a vacuum oven to purge the remaining solvents. The purging and finishing process can take from 3 to 10 days and is done with low heat. As it solidifies, the product is turned over on itself until it eventually resembles cake crumbs. After testing, the product is weighed into 1/2 gram to 1 gram portions and packaged for sale.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Fireweed Extracts Kief		
Product Type:	Concentrate		
Perishable: Yes/No	No - If refrigerated.	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts Kief is a powder. It resembles piles of pollen. The color varies from light yellow to brown and can even see hues of purple or orange depending on the strain of the plant it came from. Small bits of green plant material may also be included.

Ingredients: This box is not applicable to marijuana concentrates.	

Standard Production Procedure and Detailed Manufacturing Process:	Raw cured dry flower is placed in a shaker bag with dry ice and closed. It is then held screen side down and shaken out over a piece of parchment for collection. It is weighed into jars and packaged for sale.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Fireweed Extracts Live Resin		
Product Type:	Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts Live Resin is a mix of crystals in terpenes or "sauce". Shape forms to the container. Color ranges from almost clear yellow to a dark amber. Generally opaque. Texture is like wet sand. When frozen, it becomes hard and brittle and can easily shatter into small pieces. Will soften and become liquid as temperatures exceed 80F.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	A closed-loop system is used to extract the essential oils from the frozen plant using a solvent or mix of solvents. The solvents are recovered from the extracted oils back into a holding tank until there is a thin liquid in the bottom vessel. This liquid is transfered to a jar and placed in a vacuum oven to purge the remaining solvents. The purging and finishing process can take from 3 to 10 days and is done with low heat. Product Name:	Fireweed Extracts Shatter		
Product Type:	Concentrate		
Perishable: Yes/No	No - If refrigerated.	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts Shatter is a flat portion cut from a large sheet to get the specific weight desired. Exact shape and thickness varies. Color ranges from a light gold to a dark amber. Generally transparent. Texture is firm but malleable, and can be slightly sticky depending on the quantity of terpenes present. When frozen, it becomes hard and brittle and can easily shatter into small pieces. Can soften and even become liquid as temperatures exceed 80F.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	A closed-loop system is used to extract the essential oils from the plant using a solvent or mix of solvents. The solvents are recovered from the extracted oils back into a holding tank until there is a thin liquid in the bottom vessel. This liquid is transfered to a shallow pan and placed in a vacuum oven to purge the remaining solvents. The purging and finishing process can take from 3 to 10 days and is done with low heat. Eventually, a sheet of solid material is produced. After testing, the sheet is broken into 1/2 gram to 1 gram portions and packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Divine Konfections		
Product Type:	Edibles		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Divine Konfections are in a small pillow-shaped form in attached blocks of 10 with deep scores between each break-off piece. They have a firm, slightly rough texture. The letters "KK" and "THC" alternate on the break-off pieces. Divines come in a variety of colors to go along with their flavors (i.e. Banana = yellow). One break-off piece is one portion and contains up to 5 mg of THC each.
Ingredients: This box is not applicable to marijuana concentrates.	Glucose and/or corn syrup, sugar, thc/cbd marijuana concentrate (made by Kreative Konfections LLC) in an alcohol tincture, flavor's essential oil and/or natural or artificial flavoring, food coloring, cocoa powder, vanilla bean powder, citric acid, citrus zest. Flavors are both pure and combinations of the following: apple, apple butter, apple pie, apricot, banana, blackberry, black licorice, blueberry, butterscotch, cherry, chocolate, cinnamon, clove, coconut, coffee, ginger, grape, grapefruit, guava, hot cinnamon, honeydew, key lime pie, lavender, lemon, lemon meringue, lime, mint, mixed berries, orange, peach, peach cobbler, pear, peppermint, pineapple, raspberry, root beer, spearmint, strawberry, strawberry lemonade, rhubarb, tangerine, watermelon, wintergreen, vanilla and vanilla bean.
Standard Production Procedure and Detailed Manufacturing Process:	Add glucose syrup, sugar, and water into a pot over medium-high heat. Bring syrup to boil. Stir while syrup boils. As soon as syrup reaches the hard crack stage, remove from heat. Add thc/cbd concentrate, flavorings, any powders or zests, and food coloring. Whisk until all ingredients are incorporated. Pour into molds and cool. Place blocks into packages. Send to lab for testing before sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Wording indented on the top will alternate "KK" and "THC". Shown below are a block as packaged as well as broken-off individual pieces.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Kreative Karamels		
Product Type:	Edibles		
Perishable: Yes/No	Yes - If includes nuts or seeds.	**Shelf Life:** If perishable.	1 year. Longer if refrigerated.

Product Description: Details must include the color, shape, and texture.	Kreative Karamels are in a small cube form. Approximitely 5/8" cubed. They have a semi-soft and malleable texture. They are smooth and slightly sticky to the touch. Toppings of chocolate, nuts, seeds, salt, or sugar embellishments may be present. Kreative Karamels are generally light to dark brown in color. One candy is one portion and contains up to 5 mg THC each.

Ingredients: This box is not applicable to marijuana concentrates.	Corn syrup, sugar, butter, thc/cbd marijuana concentrate (made by Kreative Konfections LLC), evaporated milk, salt, essential oils, natural and artificial flavoring, nuts, seeds, malt, cocoa powder, vanilla bean powder, citric acid, citrus zest, and sugar embellishments. Flavors are both pure and combinations of the following: almond, apple butter, banana, blackberry, blueberry, butterscotch, cashew, chai tea, cherry, chocolate, coffee, dark chocolate, earl grey tea, ginger, lavender, lemon, lime, malt, mint, orange, peanut, pecan, pineapple, pistachio, pumpkin seed, raspberry, sea salt, vanilla, vanilla bean, and walnut.

Standard Production Procedure and Detailed Manufacturing Process:	Add corn syrup, sugar, and salt into a pot over medium heat. Bring syrup to hard ball stage. Add butters until melted. Add thc/cbd concentrate and evaporated milk. Bring to firm ball stage, remove from heat and add flavorings. Whisk until all ingredients are incorporated. Pour caramel into molds and sprinkle toppings if needed. Cool. Remove from molds and coat in chocolate and additional toppings if needed. Once cooled, individually wrap. After testing, package.

Depiction:
Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
