Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Vickie Lee Fenster	**MJ License #:**		18173	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Alaska's Latitude 61				
Premises Address:	2201 Nissen Drive				
City:	Palmer	**State:**	Alaska	**ZIP:**	99645

Received by AMCO 8/3/18

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Nova decarboxylation machine, Magic Butter Machine, Nylon Stainer, Stainless Steel Stainer to hold nylon strainer. Glass Measuring cups, Professional grade Chef whisks. Stainless steel Pot for batch lot.
Oils; Coconut, Sesame, Avocado, Vitamin E, Mineral
Witch Hazel.
No combustible materials are used in the any part of the process of making of a topical oil, ointment, or liniment.

Received by AMCO 8.3.18

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

The Marijuana will be rendered unusable and undesirable by first coating it in a fine yellow powder. Then processing that marijuana in a Magic Butter machine, which grinds/blends with vegetable based grease or oils. After staining and retrieving the cannabis from processing, it will be placed on the top shelf within the secured cabinet. There are 2 tubs on this shelf. Each one is clearly marked, as well as written instructions on inside of the cabinet doors, restating these procedures. The first tub is for holding **after** notification has been made to AMCO(paperwork will be in tub and logged in ledger on top of tub) The second tub is waiting for notification to be made to AMCO. The notification will be made no later than 3 days and on the form prescribed by the board.

After notification comes back allowing for the marijuana to be destroyed the bag of unusable Marijuana(approximately ¼ cup) will now be mixed with a cup of soil which exceeds requirements. This cup of soil will be well blended, this process is done in the facility where the date time group of the above procedure will be entered also into the log kept with notifications data.

This then will be scattered over a compost pile.

A marijuana product that has been found by the licensee unfit for sale. Will if at a retail facility, be transferred and transported back to the manufacturing facility, with all the appropriate information entered in to the METRC tracking system, and transportation documentation created and attached. At the facility, this product will be mixed with soil, and rendered unusable and undesirable, with the video date/time group so notated on baggie prior to placement in tub. This baggie will be placed within the appropriate tub in the Secure Cabinet on the top shelf. The ledger is to be filled in and AMCO notified as described in proceeding paragraphs. If a product is found to be unfit for sale and it is at the facility the same procedures are required. Render it unusable and undesirable. Log it in the ledger, METRC and follow the procedures for Notification of AMCO.

AMCO Received 12/8/2018

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.

Answer "Yes" or "No" to the following question: Yes No

5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)? ☐ ☒

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

After processing of Oil #2, it is in the final product stage. At this point the licensee shall collect a random sample. The licensee then prepares the signed statement that this sample has been randomly collected. This statement will be scanned into a data file, a hard copy placed in file in locked security room. The original signed statement will be transported to the marijuana testing facility. This information will be entered into the marijuana inventory tracking system and all the required components recorded in transportation log. The test sample will now be transported in a sealed package and in a locked, safe and secure storage compartment in the vehicle with a complete printed transport manifest with product at all times. The test sample will be transported by the Licensee to the Testing Facility.

After testing results, a Label will be attached to the shipping container showing a licensed MARIJUANA testing facility AND giving results set forth in 3AAC 306.570 (d)-(e) has tested the final product and is transported with final packaged product to Retail facility.

AMCO Received 11/26/2018

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	3B A 2oz		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	TOPICAL		

Product Description: Details must include the color, shape, and texture.	Light brown smooth texture topical ointment
Ingredients:	Ingredients: Coconut oil, Avocado oil, Sesame oil, Vitamin E oil, Oplopanax horridus, Harpagophytum procumbens, Arnica Montana, Frankincense Boswellia sacra, Zingiber Officinales rhizome, Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Dry Herbs and oils are placed in a Magic Butter machine, processed 8 hours, strained, (this is oil#1). Marijuana that has been through the decarboxylation process and oil #1, are placed into a Magic Butter machine and reprocessed with the essential oils added. When this process is complete this oil is strained again and the strained marijuana which is now in a mesh bag is placed in a baggie and that baggie is marked with date/batch information is placed in the tub marked waiting for notification to AMCO. The ledger, which sits on tub, then needs to be completed. A random sample will be taken, for testing at this time. The statement prepared and those procedures as established will also be followed. After a sample has been taken, the rest of the oil is placed in a glass jar and stored in refrigerator until the test results are returned.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/8/2018

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	3B A 2oz
Product Type:	Ointment

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

2 Oz. of product in a Black Polypropylene Dome jar, Total amount of THC 0.5 mg TO 1 gram. Number of servings and individual application size on bottom of label on front. Packaged in a Blue mylar heat sealed child proof bags. Bags will be approximately 4" x 6" We choose a larger bag so the label on the front and the METRC and facility batch information would not be crowded on mylar bag.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

serving size and total applications as well as information on METRC will be included as test results come back

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	3B Bb		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	TOPICAL		

Product Description: Details must include the color, shape, and texture.	Light brown/green smooth texture topical ointment
Ingredients:	Ingredients: Coconut oil, Avocado oil, Sesame oil, Vitamin E oil, Oplopanax horridus, Harpagophytum procumbens, Arnica Montana, Frankincense Boswellia sacra, Zingiber Officinales rhizome, Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Dry Herbs and oils are placed in a Magic Butter machine, processed 8 hours, strained, (this is oil#1). Marijuana that has been through the decarboxylation process and oil #1, are placed into a Magic Butter machine and reprocessed with the essential oils added. When this process is complete this oil is strained again and the strained marijuana which is now in a mesh bag is placed in a baggie and that baggie is marked with date/batch information is placed in the tub marked waiting for notification to AMCO. The ledger, which sits on tub, then needs to be completed. A random sample will be taken, for testing at this time. The statement prepared and those procedures as established will also be followed. After a sample has been taken, the rest of the oil is placed in a glass jar and stored in refrigerator until the test results are returned.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	3B D		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	TOPICAL		

Product Description: Details must include the color, shape, and texture.	Light brown smooth texture topical ointment
Ingredients:	Ingredients: Coconut oil, Avocado oil, Sesame oil, Vitamin E oil, Oplopanax horridus, Harpagophytum procumbens, Arnica Montana, Frankincense Boswellia sacra, Zingiber Officinales rhizome, Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Dry Herbs and oils are placed in a Magic Butter machine, processed 8 hours, strained, (this is oil#1). Marijuana that has been through the decarboxylation process and oil #1, are placed into a Magic Butter machine and reprocessed with the essential oils added. When this process is complete this oil is strained again and the strained marijuana which is now in a mesh bag is placed in a baggie and that baggie is marked with date/batch information is placed in the tub marked waiting for notification to AMCO. The ledger, which sits on tub, then needs to be completed. A random sample will be taken, for testing at this time. The statement prepared and those procedures as established will also be followed. After a sample has been taken, the rest of the oil is placed in a glass jar and stored in refrigerator until the test results are returned.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
