Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

What is this form?

An operating plan is required for all marijuana establishment license applications. Applicants should review **Title 17.38** of **Alaska Statutes** and **Chapter 306** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those statutes and regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020(c).

What must be covered in an operating plan?

Applicants must identify how the proposed premises will comply with applicable statutes and regulations regarding the following:

- Control plan for persons under the age of 21
- Security
- Business records
- Inventory tracking of all marijuana and marijuana product on the premises
- Employee qualification and training
- Health and safety standards
- Transportation and delivery of marijuana and marijuana products
- Signage and advertising

Applicants must also complete the corresponding operating plan supplemental forms (**Form MJ-03, Form MJ-04, Form MJ-05,** or **Form MJ-06**) to meet the additional operating plan requirements for each license type.

Section 1 – Establishment & Contact Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Red Run Cannabis Cultivators, LLC	**MJ License #:**	19372		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Red Run Cannabis Cultivators, LLC				
Premises Address:	12516 Kenai Spur Hwy, Suite A

Received by AMCO 10.16.18

Section 2 – Control Plan for Persons Under the Age of 21

2.1. Describe how the marijuana establishment will prevent persons under the age of 21 from gaining access to any portion of the licensed premises and marijuana items:

Red Run will insist each employee follow the letter of the law:
1. Each exterior access/entry point will remain closed and secure, unless an employee, vendor or visitor are entering or exiting the licensed facility.
2. Each exterior access/entry point will be secured with a commercial grade, non-residential door lock.
3. Each Restricted Access Area will be secured with a lock and a key will only be given to those employees with enhanced (Level II) security clearance.
4. Each entrance to a Restricted Access Area will be clearly marked by a sign that reads "Restricted Access Area. Visitors must be escorted."
5. The number of visitors on-site will be restricted to not more than five visitors and shall be supervised by an employee with enhanced (Level II) security clearance at all times. The supervising employee will wear a current identification badge, bearing his/her photograph and their level of security clearance.
6. A continuous surveillance video camera will be mounted in such a way as to cover each Restricted Access Area and each exterior access/entry point. Admission to the Restricted Access Area is described in the following section, below.

Section 3 – Security

Restricted Access Areas (3 AAC 306.710):

3.1. Describe how you will prevent unescorted members of the public from entering restricted access areas:

1. Each entrance to a Restricted Access Area will be clearly marked by a sign that reads "Restricted Access Area. Visitors must be escorted."
2. Each exterior access/entry point will remain closed and secure, unless an employee, vendor or visitor are entering or exiting the licensed facility.
3. Each visitor before entering any Restricted Access Area must be 21 years of age or older and will be required to present valid, legal identification.
4. Identification will be checked by a Red Run employee before the visitor is allowed to enter the licensed facility or any Restricted Access Area, the visitor's information is then entered into our company's Visitor Log.
5. After the visitor has been validated and their information entered into the company Visitor Log, a visitor identification badge will be issued. The visitor identification badge will hang mid-way down the visitor's chest by a lanyard or will be clipped to outer clothing and will remain there clearly visible throughout the extend of his/her visit.
6. Each visitor will be escorted at all times by an employee with enhanced (Level II) security clearance. At no time will the visitor be left unattended.
7. After each visit, the visitor will turn in their identification badge to the escorting-employee and the escorting-employee will log the visitor out and register the exiting details into the company's Visitor Log, including the date and time of exit as well as each Restricted Access Area visited.

3.2. Describe your recordkeeping and processes for admitting visitors into and escorting them through restricted access areas:

We developed our own cloud-based web dashboard which embeds a form application populated with critical fields that will be answered by the supervising employee after obtaining critical information from the visitor. These fields will include: First name, Last name, Date and time of visit (in/out), valid I.D. number, reason for visit, name of supervising employee, and temporary I.D. number. The form is connected to a Google Sheet - "Visitor Log (Responses) - which collects and stores the field-responses entered by the supervising employee. Each record-response is stored within the cloud-based Google Sheet and can be easily shared with appropriate authorities.

In addition, we will be keeping a hard-copy Visitor Log that will remain at our facility's main entry/access point. Every visitor will enter their critical information into the hard-copy Visitor Log before entering the licensed facility or any Restricted Access Area.

After the visitor has been validated and their information entered into the company Visitor Log, a visitor identification badge will be issued. The visitor identification badge will hang mid-way down the visitor's chest by a lanyard or will be clipped to outer clothing and will remain there clearly visible throughout the extend of his/her visit. Each visitor will be escorted at all times by an employee with enhanced (Level II) security clearance. At no time will any visitor be left unattended.

After each visit, the visitor will turn in their identification badge to the escorting-employee and the escorting-employee will log the visitor out and register the exiting details into the company's Visitor Log, including the date and time of exit as well as each Restricted Access Area visited.

3.3. Provide samples of licensee-produced identification badges that will be displayed by each licensee, employee, or agent while on the premises, and of visitor identification badges that will be worn by all visitors while in restricted access areas:

Security Alarm Systems and Lock Standards (3 AAC 306.715):

3.4. Exterior lighting is required to facilitate surveillance. Describe how the exterior lighting will meet this requirement:

The front of the building has several evenly-spaced, exterior lighting units, which will illuminate the front-exterior of the building, including the facade, front entry ways, windows and a large portion of the immediate-facing parking lot. Each side of the building will host exterior lighting (front and back) and will clearly illuminate the side-aspects of the building. These lights will be triggered by a dawn/dusk sensor which will immediately illuminate their perspective field(s) depending upon time of day and availability of light.

In addition, all exterior points of entry (doors & windows) will be equipped with exterior lights sufficient to clearly illuminate the point of entry (and thus anyone entering or exiting). The exterior lighting is automated by schedule and/or a dawn/dusk sensor.

Received by AMCO 10.16.18

3.5. An alarm system is required for all license types that must be activated on all exterior doors and windows when the licensed premises is closed for business. Describe the security alarm system for the proposed premises, explain how it will meet all regulatory requirements, and outline your policies and procedures regarding the actions to be taken by a licensee, employee, or agent when the alarm system alerts of an unauthorized breach:

We will be using a Honeywell security system. The Honeywell security system is a state-of-the-art security system that enjoys comprehensive detection and reporting capabilities. In addition to motion sensors - the system utilizes open/close door sensors, fire sensors and a high-decibel siren. The system has a centralized reporting/notification function that reports any security breach to the proper authorities as well as to Red Run management.

Each exterior access point will be equipped with an integrated, commercial-grade door lock.
Each interior room will be equipped with a motion sensor.
A keypad for enabling and disabling the Honeywell security system will be located within a short distance of the facilities' primary entry point.

Each exterior door and window access point(s) will be equipped with appropriate motion sensors which integrate into the overall security system. Any time the premise is closed for business, these sensors will arm and will become active. As a matter of redundancy, each exterior door/access point will be equipped with an open/close sensor.

The security system will notify the City of Kenai police, Alaska State Troopers and each owner of Red Run. After notification, at least one owner will immediately proceed to location and investigate the breach. Depending on the nature of the infraction, the owner will work with law enforcement to further investigate the nature of the unauthorized breach.

If an unauthorized breach of any kind has been determined, an owner/manager from Red Run will immediately notify AMCO enforcement with all critical details.

3.6. Describe your policies and procedures for preventing diversion of marijuana or marijuana product, including by employees:

Red Run has drafted a clear Code of Ethical Conduct, as a part of their training each employee will review, understand and confirm by signature that they will obey and abide by Red Run's Code of Ethical Conduct. Red Run employees will be trained specifically on how to properly identify individuals 21 years and older, on how to identify and prevent proxy purchasers and to not allow any unreasonable loitering. Each employee will also be trained on the handling of on-site visitors and the protocols necessary to ensure that each visitor is over the age of 21, logged into the company's Visitor Log and is escorted at all times.

A sign declaring, "No one under 21 years of age allowed!" will be posted at each Restricted Access Area where Cannabis is sold, stored or processed. Employees will be trained on the protocols necessary to ensure that no individual under the age of 21 is ever allowed into these Restricted Access Areas. All areas where Cannabis is processed and stored will be locked and inaccessible to anyone without sufficient security clearance. In addition, Red Run will ensure that its security system is sound and operational and that security protocols are followed by all staff so that if there ever is a concern or event, the investigating authorities will be able to review appropriate video footage.

Red Run has a zero tolerance policy for division. Management and staff will utilize daily/nightly inventory audits as a means to verify Metrc inventory figures for both pre-processed Cannabis material and post-processed Cannabis products. Each week's inventory audits are reviewed for any remarkable patterns or inconsistencies. If these inconsistencies appear remarkable, Red Run will conduct a formal in-house investigation. If the findings from an in-house investigation revel any potential material/product diversion, Red Run will immediately notify AMCO and report its findings clearly and thoroughly. If staff at Red Run suspect diversion for any reason, an investigation will be conducted, if the findings revel even potential material/product diversion, AMCO will be immediately notified.

Red Run staff will be well trained in Metrc's inventory tracking system and will strictly utilize its functions in a manner that will consistently maintain and realize actual inventory weights and measures. Staff will also ensure that all Cannabis material and products are stored and secured in a manner consistent with (3 AAC 306.710). Cannabis waste disposal protocols will also be strictly followed and enforced (3 AAC 306.740), no amount of Cannabis in any form or fashion will be disposed of without first notifying AMCO and rendering the Cannabis-material unusable.

3.7. Describe your policies and procedures for preventing loitering:

Our employees as part of their training protocol will be instructed to monitor the interior and exterior (parking lot) of the licensed facility for any individuals that linger on premise above and beyond a reasonable time frame. Our primary concern (which will be addressed through protocol and training) are random people/vehicles that may linger in the greater parking lot at-large for an unreasonable amount of time. In order to combat individuals lingering in the parking lot, our establishment will post highly visible signs that clearly prohibit any unreasonable loitering. Should a customer loiter on-premise for any unreasonable time frame, our employees are instructed to politely ask them to leave, and if necessary have a manager escort them off the premises.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

3.8. I certify that if any additional security devices are used, such as a motion detector, pressure switch, and duress, panic, or hold-up alarm, to enhance security of the licensed premises, I will have written policies and procedures describing their use. MT

Received by AMCO 10.16.18

(Additional Space as Needed):

3.6 Describe your policies and procedures for preventing diversion of marijuana or marijuana product, including by employees:

Red Run has drafted a clear Code of Ethical Conduct, as a part of their training each employee will review, understand and confirm by signature that they will obey and abide by Red Run's Code of Ethical Conduct. Red Run employees will be trained specifically on preventing diversion by learning and applying the critical steps necessary to properly identify individuals 21 years and older. A sign declaring, "No one under 21 years of age allowed!" will be posted at each access point where Cannabis is sold, stored or processed. Employees will be trained on the protocols necessary to ensure that no individual under the age of 21 is ever allowed into these Restricted Access Areas. In addition, Red Run will ensure that its security system is sound and operational and that security protocols are followed by all staff so that if there ever is a concern or event, the investigating authorities will be able to review appropriate video footage.

Red Run has a zero tolerance policy for division. Management and staff will utilize daily/nightly inventory audits as a means to verify Metrc inventory figures for both pre-processed Cannabis material and post-processed Cannabis products. Each week's inventory audits are reviewed for any remarkable patterns of inconsistencies. If these inconsistencies appear remarkable, Red Run will conduct a formal in-house investigation. If the findings from an in-house investigation revel any potential material/product diversion, Red Run will immediately notify AMCO and report its findings clearly and thoroughly. If staff at Red Run suspect diversion for any reason, an investigation will be conducted and AMCO will be immediately notified if the findings revel potential material/product diversion.

Red Run staff will be well trained in Metrc's inventory tracking system and will strictly utilize its functions in a manner that consistently maintains and realizes actual inventory weights and measures. Staff will also ensure that all Cannabis material and products are stored and secured in a manner consistent with (3 AAC 306.710). Cannabis waste disposal protocols will also be strictly followed and enforced (3 AAC 306.740), no amount of Cannabis in any form or fashion will be disposed of without first rendering it unusable.

Video Surveillance (3 AAC 306.720):

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

3.9. The video surveillance and camera recording system for the licensed premises covers each restricted access area, and both the interior and exterior of each entrance to the facility. MT

3.10. Each video surveillance recording: is preserved for a minimum of 40 days, in a format that can be easily accessed for viewing (consistent with the Alcohol & Marijuana Control Office's approved format list); clearly and accurately displays the time and date; and is archived in a format that does not permit alteration of the recorded image. MT

3.11. The surveillance room or area is clearly defined on the Form MJ-02: Premises Diagram that is submitted with this application. MT

3.12. Surveillance recording equipment and video surveillance records are housed in a designated, locked, and secure area or in a lock box, cabinet, closet or other secure area where access is limited to the licensee(s), an authorized employee, and law enforcement personnel (including an agent of the Marijuana Control Board). MT

3.13. Describe how the video cameras will be placed to produce a clear view adequate to identify any individual inside the licensed premises, or within 20 feet of each entrance to the licensed premises:

A video camera, a bullet-style 5meg 1080P fixed lens mini bullet camera, will be fixed to the exterior of the building along the facade - pointed directly at each exterior entry way and into the greater parking lot area, fixed and located no further than 10ft away from each exterior access point. Exterior lighting across the building's exterior facade will assist in providing sufficient enough light for the camera to resolve a clear enough view to identify any individual attempting to enter the premises. In addition, each camera is equipped with night-vision IR capabilities.

A video camera, a dome-style 5meg 1080P fixed lens dome camera, will be fixed to the ceiling and/or wall in each interior room, including hallways - pointed directly at each interior entry point. Interior lighting is triggered by motion sensors in each interior room, triggered interior lighting will assist in providing sufficient enough light for the camera to resolve a clear enough view to identify any individual inside the licensed premises. In addition, each camera is equipped with night-vision IR capabilities.

3.14. Describe the locked and secure area where video surveillance recording equipment and original copies of surveillance records will be housed and stored, and how you will ensure the area is accessible only to authorized personnel, law enforcement, or an agent of the Marijuana Control Board. If you will be using an offsite monitoring service and offsite storage of video surveillance records, your response must include how the offsite facility will meet these security requirements:

Our facility will have a highly secured office area that will house and store our video surveillance recording equipment. In addition, all video surveillance recording equipment is secured within an enclosed, locked rack-case. Surveillance recording equipment access will be limited to owners, authorized employees and to law enforcement (including AMCO). The secured room will be equipped with a commercial-grade door and keys will only be provided to employees with enhanced security clearance (Level II). Other authorized law enforcement or agents of AMCO will be granted immediate access upon request.

Received by AMCO 10.16.18

Section 4 – Business Records

Review the requirements under 3 AAC 306.755. All licensed marijuana establishments must maintain, in a format that is readily understood by a reasonably prudent business person, certain business records.

4.1. I certify that the following business records will be maintained and kept on the licensed premises: Initials

a. **all books and records necessary to fully account for each business transaction conducted under my license for the current year and three preceding calendar years** *(records for the last six months must be maintained on the licensed premises; older records may be archived on or off-premises)*; MT

b. **a current employee list setting out the full name and marijuana handler permit number of each licensee, employee, and agent who works at the marijuana establishment;** MT

c. **the business contact information for vendors that maintain video surveillance systems and security alarm systems for the licensed premises;** MT

d. **records related to advertising and marketing;** MT

e. **a current diagram of the licensed premises, including each restricted access area;** MT

f. **a log recording the name, and date and time of entry of each visitor permitted into a restricted access area;** MT

g. **all records normally retained for tax purposes;** MT

h. **accurate and comprehensive inventory tracking records that account for all marijuana inventory activity from seed or immature plant stage until the retail marijuana or retail marijuana product is sold to a consumer, to another marijuana establishment, or destroyed;** MT

i. **transportation records for marijuana and marijuana product, as required by 3 AAC 306.750(f); and** MT

j. **registration and inspection reports of scales registered under the Weights and Measures Act, as required by 3 AAC 306.745.** MT

4.2. A marijuana establishment is required to exercise due diligence in preserving and maintaining all required records. Describe how you will prevent records and data, including electronically maintained records, from being lost or destroyed:

Our establishment will be utilizing Google Drive as a cloud-based, secured file storage application. Google Drive allows for highly secure and accessible, cloud-based record keeping and data preserving. All pertinent records and data, including electronic and hard-copy records will be scanned and stored to our Google Drive account. In addition, our facility will be equipped with a restricted, locked office space that will also house hard-copy records.

Received by AMCO 10.16.18

Section 5 – Inventory Tracking of All Marijuana and Marijuana Product

Review the requirements under 3 AAC 306.730. All licensed marijuana establishments must use a marijuana inventory tracking system capable of sharing information with Metrc to ensure all marijuana cultivated and sold in the state, and each marijuana product processed and sold in the state, is identified and tracked from the time the marijuana is propagated from seed or cutting, through transfer to another licensed marijuana establishment, or use in manufacturing a marijuana product, to a completed sale of marijuana or marijuana product, or disposal of the harvest batch of marijuana or production lot of marijuana product.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

5.1. My marijuana establishment will be using Metrc, and if any other tracking software is used, it will be capable of sharing information with Metrc. MT

5.2. All marijuana delivered to a marijuana establishment will be weighed on a scale registered in compliance with 3 AAC 306.745. MT

5.3. My marijuana establishment will use registered scales in compliance with AS 45.75.080 (Weights and Measures Act), as required by 3 AAC 306.745. MT

Section 6 – Employee Qualification and Training

Review the requirements under 3 AAC 306.700. A marijuana establishment and each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or a marijuana product, or who checks the identification of a consumer or visitor, must obtain a marijuana handler permit from the board before being licensed or beginning employment at a marijuana establishment.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

6.1. Each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or marijuana product, or who checks the identification of a consumer or visitor, shall obtain a marijuana handler permit from the board before being licensed or beginning employment at the mari)uana establishment. MT

6.2. Each licensee, employee, or agent who is required to have a marijuana handler permit shall keep that person's marijuana handler permit card in that person's immediate possession (or a valid copy on file on the licensed premises) when on the licensed premises. MT

6.3. Each licensee, employee, or agent who is required to have a marijuana handler permit shall ensure that that person's marijuana handler permit card is valid and has not expired. MT

6.4. Describe any in-house training that will be provided to employees and agents (apart from a marijuana handler course):

Based on a Job Application, managers will screen employees for verification of age and a background check looking for convictions for any of the following: felonies; DUIs; alcohol- or drug-related offenses; violence against a person; crimes of dishonesty; crimes involving weapons. Further, Marijuana Handler's Permit certificates of completion will be required. Professional appearance and good hygiene will be mandatory.

During training, employees and managers will learn and integrate all relevant regulations and statutes. New employees must sign Acknowledgment of Responsibilities that each has (1) read the relevant regulations and statutes in their Employee Handbook, (2) agreed to honor their Code of Ethical Conduct, (3) agreed to report any criminal conviction(s) during their employment; (4) agreed to cooperate in any inspection conducted by AMCO or its agent; (5) agreed to check photo-I.D. for 100% of transactions; and (6) agreed not to sell to anyone under 21 years of age or who is intoxicated on alcohol or controlled substances. Employees will be trained in the recognition and detection of Proxy Purchasers and intoxicated customers (alcohol and cannabis). There will be strict enforcement of Section 355 per-purchase weight limits and Section 310 "no free samples" regulation.

Red Run will document all training hours, counseling and feedback, positive work performance and corrective actions taken (consultation and discipline). Red Run will implement a No-Retaliation Rule. Reporting in good faith any co-employee or manager for misconduct, including a statute or regulation violation, will not result in a negative employment action against the Reporter. Employees will be taught to refer all complaints from a consumer, or community member, to a manager.

Employees will be trained to notice and identify any potential loitering on premises. Each employee will also be trained in applicable public health, fire, safety codes and ordinances of the state and the local government.

Received by AMCO 10.16.18

Section 7 – Health and Safety Standards

Review the requirements under 3 AAC 306.735.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

7.1. I understand that a marijuana establishment is subject to inspection by the local fire department, building inspector, or code enforcement officer to confirm that health or safety concerns are not present. MT

7.2. I have policies regarding health and safety standards (including: ensuring a person with an illness or infection does not come into contact with marijuana or marijuana product; good hygienic practices; cleaning and maintenance of equipment and the premises; pest deterrence; chemical storage; sanitation principles; and proper handling of marijuana and marijuana product) and will take all reasonable measures and precautions to ensure that they are met or exceeded. MT

7.3. I have policies to ensure that any marijuana or marijuana product that has been stored beyond its usable life, or was stored improperly, is not salvaged and returned to the marketplace. MT

7.4. I have policies to ensure that in the event information about the age or storage conditions of marijuana or marijuana product is unreliable, the marijuana or marijuana product will be handled in accordance with 3 AAC 306.735(d). MT

Answer "Yes" or "No" to each of the following questions: Yes No

7.5. Adequate and readily accessible toilet facilities that are maintained and in good repair and sanitary condition are clearly indicated on my Form MJ-02: Premises Diagram. ☑ ☐

7.6. Convenient handwashing facilities with running water at a suitable temperature are clearly indicated on my Form MJ-02: Premises Diagram. ☑ ☐

7.7. If you answered "No" to either 7.5 or 7.6 above, describe how toilet and/or handwashing facilities are made accessible, as required by 3 AAC 306.735(b)(2):

Section 8 – Transportation and Delivery of Marijuana and Marijuana Products

Review the requirements under 3 AAC 306.750.

8.1. Describe how marijuana or marijuana product will be prepared, packaged, and secured for shipment. Include a description of the type of locked, safe, and secure storage compartments to be used in vehicles transporting marijuana or marijuana product:

See Page 11 of 11 (8.1).

Received by AMCO 10.16.18

(Additional Space as Needed):

8.1. Describe how marijuana or marijuana product will be prepared, packaged, and secured for shipment. Include a description of the type of locked, safe, and secure storage compartments to be used in vehicles transporting marijuana or marijuana product:

Pursuant to 3 AAC 306.750, Red Run will prepare marijuana or marijuana product for transport or transfer to another marijuana establishment by: (1) placing packaged marijuana or marijuana product within a sealed, tamper-evident shipping container; (2) affixing a label in compliance with Alaska law [3 AAC 306.470] to the shipping container; and, (3) generating a transport manifest from the marijuana cultivation facility's marijuana inventory system. (NOTE: the transport manifest will remain with the marijuana at all times while being transported and a copy will be given to the licensed marijuana establishment that receives the shipment.) Any individual transporting marijuana in compliance with this section will have a marijuana handler permit.

Pursuant to 3 AAC 306.750, when any marijuana or marijuana product is transported, Red Run will use Metrc, the State's sanctioned marijuana tracking system, to record the type, amount and weight of marijuana or marijuana product being transported, the name of the transporter, the time of departure and expected delivery, and the make, model and license plate number of the transporting vehicle. A complete, printed Metrc transport manifest will be kept with the marijuana or marijuana product at all times.

Pursuant to 3 AAC 306.510, Red Run will not package, manufacture or sell any marijuana product that is an adulterated food or drink; closely resembles a familiar food or drink item including candy; or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.

When Red Run packages its manufactured products for a retail marijuana store to sell to a consumer, the packaging will be designed/constructed in compliance with federal law [16 U.S.C. 1700+ known as the Poison Prevention Packaging Act], with the goal that it be significantly difficult for children under five years of age to open, while being not normally difficult for adults to use properly as defined by federal regulation [16 C.F.R. 1700.20].

Pursuant to 3 AAC 306.750, during transport - any marijuana or marijuana product will be placed in a sealed package or container and then placed into an enclosed, secure storage compartment located inside the vehicle transporting the marijuana or marijuana product. The sealed package will not be opened during transport. By contract, the vehicle transporting marijuana or marijuana product must travel directly from the shipping marijuana establishment to the receiving marijuana establishment, and must not make any unnecessary stops in between except to deliver or pick up marijuana or marijuana product at any other licensed marijuana establishment.

Received by AMCO 10.16.18

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

8.2. The marijuana establishment from which a shipment of marijuana or marijuana product originates will ensure that any individual transporting marijuana shall have a marijuana handler permit required under 3 AAC 306.700. MT

8.3. The marijuana establishment that originates the transport of any marijuana or marijuana product will use the marijuana inventory tracking system to record the type, amount, and weight of marijuana or marijuana product being transported, the name of the transporter, the time of departure and expected delivery, and the make, model, and license plate number of the transporting vehicle. MT

8.4. The marijuana establishment that originates the transport of any marijuana or marijuana product will ensure that a complete printed transport manifest on a form prescribed by the board must be kept with the marijuana or marijuana product at all times during transport. MT

8.5. During transport, any marijuana or marijuana product will be in a sealed package or container in a locked, safe, and secure storage compartment in the vehicle transporting the marijuana or marijuana product, and the sealed package will not be opened during transport. MT

8.6. Any vehicle transporting marijuana or marijuana product will travel directly from the shipping marijuana establishment to the receiving marijuana establishment, and will not make any unnecessary stops in between except to deliver or pick up marijuana or marijuana product at any other licensed marijuana establishment. MT

8.7. When the marijuana establishment receives marijuana or marijuana product from another licensed marijuana establishment, the recipient of the shipment will use the marijuana inventory tracking system to report the type, amount, and weight of marijuana or marijuana product received. MT

8.8. The marijuana establishment will refuse to accept any shipment of marijuana or marijuana product that is not accompanied by the transport manifest. MT

Section 9 – Signage and Advertising

9.1. Describe any signs that you intend to post on your establishment with your business name, including quantity, dimensions, graphics, and location on your establishment (photos or drawings may be attached):

We will attach a small 2"x2" sign to the building, located at the facility's front door entry-point. The sign will only have our business name and our "RR" brand-mark. There will be no other signs.

Received by AMCO 10.16.18

9.2. Describe any advertising you intend to distribute of your establishment. Include medium types and business logos (photos or drawings may be attached):

This question is difficult to answer since marketing mediums, content and channels change so rapidly.

Red Run plans on using basic advertising mediums, including hard-copy print (magazine, flyers, sales pamphlets, banners), radio advertising and cyber-social mediums (website, Facebook, Instagram, Twitter).

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
