RE: letter if clarification and requested corrections license #10067

Director Chambers,

I'm writing this letter to supplement and clarify questions asked in Green Leaf's 'letter of incomplete' dated February 9th 2017. Attached you will find corrected forms MJ-00, MJ-01, MJ-03 and a copy of Green Leaf's Certificate of Incorporation.

In your letter you also ask the following questions and I would like to take this opportunity to answer them.

On form MJ-02 you asked for clarification in terms of additional tenants in Green Leaf's proposed premises. For the record there are no additional tenants or businesses in the complex/building located at 4612 Halibut Point Road Sitka Alaska 99835. Per your request I've attached a site plan that clearly delineates the outer boundaries highlighted with a chartreuse highlighter marker.

You asked what 'Northern Lights #5' is. Northern Lights #5 is a popular strain of marijuana that Green Leaf's plans on offering. I've also attached a blown up picture of our label- front and back- so you can see the writing better. My reasoning behind not writing the THC on the 'example label' is because Green Leaf is using a separate label printer to adhere the estimated THC content – along with batch numbers- in compliance with 3 AAC 306.345; and I didn't want to disclose the wrong information to the board.

Per your request, I went ahead and further labeled marijuana storage areas.

Per your request, I added 'first floor' and second floor to Green Leaf's premise diagram.

The 'fitting room' will be used for customers to try on retail clothing sold in our retail store.

On the second floor the 'blue dots' represent stools.

On the first floor the 'blue dots' represent toilets.

As always, if you have any questions please don't hesitate to contact me directly.

Sincerely,

Aaron Bean, CEO
Green Leaf Inc.
