Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

What is this form?

This operating plan change form is required for all marijuana establishment licensees seeking to change a licensed marijuana establishment's existing operating plan, as required by 3 AAC 306.100. With this form, a licensee may request changes to as much or as little as desired of Form MJ-01 and/or the corresponding operating plan supplemental for the establishment's license type. **The required $250 change fee may be made by check, cashier's check, or money order.**

Please complete and submit with this form the pages of Form MJ-01 and/or the corresponding operating plan supplemental that contain sections that you are requesting to change. **All fields must be completed of any page for which you are requesting changes** – upon board approval, the submitted pages will replace those currently on file. If your current, approved operating plan is on the original version of the forms, you may be required to complete and submit the new operating plan forms in their entirety.

The form(s) that I am requesting board approval to change is:

- ☐ **Form MJ-01:** Marijuana Establishment Operating Plan
- ☐ **Form MJ-03:** Retail Marijuana Store Operating Plan Supplemental
- ☐ **Form MJ-04:** Marijuana Cultivation Facility Operating Plan Supplemental
- ☑ **Form MJ-05:** Marijuana Product Manufacturing Facility Operating Plan Supplemental
  - Amending an approved product
- ☐ **Form MJ-06:** Marijuana Testing Facility Operating Plan Supplemental

This form must be completed and submitted to AMCO's main office prior to changing existing operations. The licensed establishment's operations may not be altered unless and until the director has given temporary approval or the Marijuana Control Board (MCB) has given final approval of the changes. Please note that licensees seeking to change operating plans for multiple licenses must submit a separate completed copy of this form for each license.

Form MJ-15: Operating Plan Change

Section 2 – Summary of Changes

Provide a summary of the changes for which you are requesting approval.

The licensee seeks approval for an additional method of packaging. A 750ml size product for wholesale purposes, packaged in a glass jar, was previously approved. The licensee now seeks approval to offer this product in retail sizes of 0.5grams and 1gram, each packaged in a syringe for dispensing and contained within a sealed plastic bag. These changes to the serving sizes available are the only changes proposed.

Section 3 – Declarations

Read each statement below, and then sign your initials in the corresponding box to the right: Initials

The proposed changes conform to all applicable public health, fire, and safety laws. C.I

I understand that any temporary approval granted by the director is pending a final decision by the MCB; therefore, any investment I make, based upon temporary approval, is at my own risk. C.I

As a marijuana establishment licensee, I declare under penalty of perjury, with falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Full Extract Ethanol Hash Oil (abbreviated as "FEEHO")		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	This extract can be light gold, amber, or dark brown in color. Will be a similar consistency & viscosity of molasses, decreasing in viscosity as it is warmed.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Utilizing a Pressure-less Cryogenic Ethanol Closed Loop Extractor, ethanol will be chilled and decompressed and then used to saturate the marijuana material to be subject to extraction. The resulting mixture will be decompressed and the emulsion of ethanol and marijuana extract will be sent to the chilled collection chamber. The operator then cycles that chilled emulsion back over the material several times to achieve an efficient extraction. Once extraction is complete, the extractor is connected to a Rotovap and the emulsion is transferred from the collection chamber to the Rotovap. Continue to next page.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Actual product images will be provided prior to first sale to retail or manufacturer. This is just an example of possible color & clarity of concentrate.

The Rotovap will then separate ethanol from the desired extract, resulting in a crude marijuana oil. The recovered ethanol is recycled back into the system for later use. Leaving behind a crude ethanol hash oil concentrate that can be further processed into other concentrates or edibles.
