David,

I reviewed the corrections you submitted, and the diagram needs more work.

I need a layout of the retail (counters, shelves, display cases).

I look at it and I just see a big open space. Then your MJ-03 states customer's will enter the reception area first before being allowed into the retail area (I don't see the partitions in the diagram).

Where is the restricted access area(s) within the (retail/customer area). For example, the counter(s) where you are going to have your POS's and where you are going to have marijuana stocked for sale of dispense for sale.

Remember, an area of retail marijuana store's licensed premises where marijuana or any marijuana product is stocked for sale or dispensed for sale is a restricted access area that requires escort and all of that stuff.

Please call me if you need to clarify things or if I'm missing something.

Thank you

Jane P Sawyer
