Re: Marijuana Product Manufacturing Facility License #14874

Dear applicant,

The AMCO Office has reviewed the documents submitted for the proposed marijuana establishment license referenced above. This letter is notice under 3 AAC 306.025(e)(2) that your application is incomplete and additional items are needed to complete the application. The additional items that need correction or resubmittal are listed below—please be sure to read the entire letter. **Please note that if the corrections and/or additional documents submitted in response to this letter are not found to be complete, your application will be returned to you in accordance with 3 AAC 306.025(e)(1), and you will need to file a new application and pay a new fee should you wish to continue pursuing licensure.**

- **MJ-02 Premises Diagram**
  - An insufficient number of diagrams were submitted. Please refer to the instructions on Page 1 and 2 of MJ-02 and submit all required diagrams. Please order and label them #1 through #5 according to the list on Page 1.
    - If you have questions concerning what is required on Diagrams 1 through 5, please call or email for clarification.
  - The licensed premises of the manufacturing facility must be contiguous, but the proposed layout does not appear to meet this requirement.
    - There is a 424 square foot area labeled "Product Manufacturing Unlimited". What does this mean?
- **MJ-05 Manufacturing Supplemental**
  - Page 2, Section 2.1:
    - Please expand on your response to provide an overview of this proposed facility's operations. Only the transfer of marijuana products is currently described.
  - Page 3, Section 4.2:
    - Your response describes how wastewater and marijuana plant waste will be disposed of. Expand on your response to include the disposal procedures for expired or outdated marijuana products, and/or liquid marijuana waste (not wastewater).
- **MJ-05 (Marijuana Products)**
  - Ingredients Section for all products:
    - In the Ingredients section, specify whether the marijuana used in the proposed product is flower/trim, an approved concentrate, etc. If the base marijuana ingredient is different

(such as variations that use infused butter, or that use infused coconut oil), the variations should be submitted as separate products.
    - The Ingredients section of most products includes "may or may not contain lecithin". Please specify for each product whether lecithin will be used or not.
- Packaging Description for all products:
    - Many products include a primary and/or secondary packaging option, but also include "or other suitable childproof container". Please be specific regarding the packaging options that you are proposing.
    - Most products contain a variant of the following: "Each package will contain from 0% to 100% THC, THCA or CBD or a combination of them. Each package will not exceed 50mg THC, or 5mg THC per serving. All packaging and labeling will comply with 3 AAC 306.565-570". Please remove this verbiage – the total THC per package and THC per serving should be specified for each product and not contain a wide range of percentages. Compliance with packaging and labeling regulations should be demonstrated by your sample labels and the information provided in this section.
    - For edible products, the milligrams of THC per serving must be specified. For example, you might have a serving of a product that will contain 3 milligrams of THC, or a serving that will contain 5 milligrams.
- Breath Mints – Packaging Description
    - Include a picture of the proposed Mylar bag.
- Bubble Hash
    - Please include more details about the standard production procedure for this product.
- Buttercreams
- Candy Wafers – Ingredients:
    - List all proposed flavors for this product in this section, and remove "etc.".
- Cannastix
    - In the Ingredients, list all proposed flavors for this product in this section, and remove "etc.".
    - In the Packaging Description, what constitutes an individual serving of the product is not specified.
- Cheesecake Bites
    - The Product Description mentions multiple flavors of this product. Include a list of all proposed flavors in either this section or the Ingredients section.
- EHO (Ethanol Hash Oil)
    - You state in the Product Description that this extract will be made using ethanol, but the standard production procedure includes isobutane, n-butane, and other types of solvents. Please specify the solvent used.
- Ethanol Tincture
    - You state that this product will be made using either decarboxylated or ground cannabis plant material. Are you proposing different variants?
    - The product's intended use is Topical. Is this accurate?
- FECO – Capsules and Syringes
    - If you will be submitting this product as two products (one in capsules, one in syringes), please give each product a different name.
    - [Question] The product is named FECO, but the acronym is specified as Full Cannabis Extract Oil. Should it be Full Extract Cannabis Oil?
- Green Dragon Tincture
    - You state that this product will be made using either decarboxylated or ground cannabis plant material. Are you proposing different variants?

        - The product's intended use is Topical. Is this accurate? Also, how is this product different from your proposed Ethanol Tincture?
    - Hash Cookie
        - Include a sample image of the glass or acrylic container you are proposing for this product.
    - Infused Butter
    - Infused Coconut Oil
        - Two variants of this product were submitted – one for use in-house as an ingredient, and one that is packaged in clear acrylic or glass containers (and is listed as a topical product). Is this also being prepared as a stand-alone edible product for sale?
    - Infused Coffee
        - In the Packaging Description, provide a sample image of a bottle with the demarcations for serving sizes as described in your response.
    - Infused Juice
        - Include a list of all proposed juice flavors in either the Ingredients or Product Description sections.
        - In the Packaging Description, provide an image of the proposed foil pouch showing the demarcations for serving sizes.
    - Lemon Sugar Face Scrub
        - Please clarify in the production procedure if the infused lemon juice used is your own in-house product.
    - Pull and Snap
        - Include an image of the proposed glass container in the Packaging Description section.
- **MJ-07 Public Notice Posting Affidavit**
    - The Public Notice requirements must be completed within ninety days of submitting all application documents and fees. It will be necessary to post a copy of your Public Notice at the premises and one other conspicuous location for **ten days**. After this is complete, fill out and submit a new MJ-07.
- **MJ-08 Local Government Notice Affidavit**
    - Page 1, Section 2 – Certification:
        - The date that a copy of your Public Notice was sent to the City of Fairbanks was not provided.
        - A copy of your Public Notice must also be provided to the Fairbanks North Star Borough. Once this has been done, complete a new MJ-08.
- **Publisher's Affidavit**
    - The newspaper advertisements must be completed within ninety days of you submitting all application documents and fees, but these advertisements ran in 2016. Furthermore, it advertises the application of a different license number and license type. It will be necessary to run an advertisement **once a week for three consecutive weeks** and provide a new affidavit from the publisher. Be sure to use the Advertisement Notice available on this license page through MyAlaska.

It is very important that you submit the above corrections and/or documents in a timely manner so that AMCO staff has adequate time to review the corrections and/or additional documents which must be found to be complete within 90 days of the date of this letter.

Respectfully,

TJ Zielinski, Occupational Licensing Examiner

For,
Erika McConnell, Director
marijuana.licensing@alaska.gov

Subject: License #14874, DBA: GoodSinse, LLC- Submitted New Marijuana Product Manufacturing Facility Application
Date: Friday, September 20, 2019 11:19:10 AM
Attachments: image001.png
14874 Refund Form.pdf

Good morning,

We have received the following New license application documents:

- MJ-00 Application Certifications
- MJ-01 Operating Plan
- MJ-02 Premises Diagram
- MJ-05 Product Manufacturing Supplemental (partial)
- MJ-09 Statement of Financial Interest
- Proof of Possession for Proposed Premises
- Entity Documents
- Fees: (Please note that the fees will not be processed until the rest of the application documents are received)
    - Background check $48.25 for each person
    - Application fee $1000
    - License fee $5000

Once we receive the following document(s), the application will move to the queue of applications in line to be reviewed by an examiner:

- Food Safety Permit Application (from the Department of Environmental Conservation)

- Fingerprint cards for (Daniel Peters and Danielle Peters)
    - We have old fingerprints for this application, but because the fingerprints were taken over a year ago, and the Department of Public Safety (DPS) will not except the fingerprint cards, please submit new fingerprint cards.
    - Additionally, please respond to this email and let us know if you would like the old fingerprint cards mailed to you or shredded.
    - Furthermore, it looks like we processed a check for $94.00 (the old price for fingerprints) around 7/2/18, but because we did not submit them to DPS because we had not received the application documents, I have attached a refund form to this email. Please review the refund form, print, sign, and date it and send it back to me for processing.

- Although you submitted the MJ-07, MJ-08, and Publisher's Affidavit, the notice requirements must be given within the 90 days preceding the submittal of all application requirements (3 AAC 306.025(c)).
    - Please re-advertise for 3 weeks, then, submit a new Publisher's Affidavit with a copy of the newspaper clipping. Make sure to use the updated Advertisement Notice

from MyAlaska.

- Please repost the Public Notice at both, the location of the proposed premises and another conspicuous location for ten days, and then submit a new MJ-07 completed and signed in front of a notary. Make sure to use the updated Public Notice from MyAlaska.
- Please re-notify the Mat-Su Borough and the Community Council by submitting to them the Public Notice, and then submit a new MJ-08 completed and signed in front of a notary. Make sure to use the updated Public Notice from MyAlaska.

- There was an email sent from you on 9/16/19 at 6:10 pm (number two of three) with a link with a compressed (zipped) folder; unfortunately, we cannot accept attachments in this format. Please resend in PDF format.

Always include a coversheet obtained from MyAlaska with anything you submit to us.

Thank you,

Jacqlene Drulis

Hello,

I am beginning to review your new application for a Marijuana Product Manufacturing Facility, but I will need you to resubmit the products that were included under MJ-05 Operating Plan Supplemental, Parts 1-3. These attachments are formatted as fillable PDF Portfolios, but I will need you to convert them to non-fillable forms and not in a Portfolio format – a single, multi-page document (or several multi-page documents) is preferable.

Due to the size of the files, you may have an easier time sending them via the State of Alaska's drop box called ZendTo. It will allow you to send files up to 8.0 GB to State of Alaska users. The link to ZendTo is https://drop.state.ak.us/drop/, and files can be sent to marijuana.licensing@alaska.gov.

You will not need to resubmit Dry Sift Kief and Infused Coffee.

Let me know if you have any questions,

Good morning,

I have reviewed your application for a marijuana establishment, but at this time your application is considered incomplete. See the attached notice regarding corrections, additional documents, and/or resubmittals that need to be addressed in your application.

Please make sure to read the entire notice. If the submitted corrections for your application are inadequate to deem your application complete, or your application is still incomplete after ninety (90) days from the date of this notice, your application will be returned to you in accordance with 3 AAC 306.025(e)(1) and 3 AAC 306.025(f). Should you wish to continue pursuing licensure, it would be necessary to file a new application and pay new fees.

Ninety-day Due Date: 1/6/2020

Let us know if you require copies of any submitted documents, and feel free to call or email if you need clarification on any items in the Incomplete Notice. Correspondence should be sent to marijuana.licensing@alaska.gov.

Sincerely,

TJ Zielinski

Attachments:	image001.png

Good afternoon,

I've finished reviewing the attached documents and many of the necessary corrections have been made. However, there are still some remaining issues with Form MJ-02 and some of the products submitted with MJ-05.

It isn't very clear how the two areas of the proposed Product Manufacturing license are connected, but it appears that part of a room designated for receiving and storage for the Cultivation facility will be a walkway without any barriers separating it from this room, which isn't adequate to make the premises contiguous. There are also several inconsistencies between this proposed floor plan and what is being proposed for your Onsite Consumption Endorsement application, which I am still reviewing. Can you provide diagrams that show everything that is being proposed? As a reminder, each licensed premises must be contiguous. Be sure to also include the following details on Diagram 1:

- Room dimensions
- Labeling of the licensed premises (the boundary is marked, but not labeled)
- The restricted access areas within that premises (in a different color than the licensed premises, unless all areas will be designated as restricted access to exclude restrooms)

Can you also try to use thinner lines for marking the boundaries? The thick marker lines make some of the diagram details difficult to see.

I will also note that if these applications are approved, it may be necessary to file Form MJ-14: Licensed Premises Diagram Change for License #10279.

Form MJ-05: Products

First, just a note – I am unsure if the products submitted with different marijuana base ingredients will require variations in the name or package to differentiate them, but it will be a question that I bring to the board when these products are considered. There are some corrections or revisions also still required on some of the products:

- Cannastix, Infused Coffee, Infused Juice, Infused Lemonade, Infused Olive Oil, Infused Peanut Oil, Infused Syrup, Infused Vegetable Glycerin, and Infused Vegetable Oil:
    - The Ingredients were revised to list only cannabis distillate as the marijuana ingredient, but the Standard Production Procedures (SPP) still state “cannabis flower kief or other approved cannabis concentrate” as being added in the process.
- Cheesecake Bites:
    - The only marijuana ingredient in Ingredients is infused butter, but the SPP mentions cannabis kief being added to the mixture. If kief will be included also (infused butter AND kief), please add it to the Ingredients section.

- Chocolate Chip Cookies:
    - The first step in the SPP involves mixing cream, butter, and sugar. Please list what type of cream this is under Ingredients.
- Ethanol Cannabis Mixture:
    - On Page 5, the name is Ethanol Cannabis Mixture. On Page 6, the name is Ethanol Tincture. Which name is correct?
- Green Dragon Tincture:
    - In the Packaging Description, please clearly state how much of the product constitutes an individual serving.
- Infused Butter:
    - The cannabis ingredient is distillate, but the SPP mentions that plant waste needs to be removed from the mixture. Where does the plant waste come from?
- Infused Pesto and Infused Tea:
    - In the Packaging Description, specify how much pesto equals one serving.
- Instant Coffee:
    - The Product Description and SPP describe a drinkable product, but the Depiction and Packaging Descriptions suggest that this is infused ground coffee. Please clarify.
- Rice Krispie Treats (with kief):
    - In the SPP, when is kief added?
- Sugar Cookies (butter or distillate)
    - The Ingredients still include infused butter OR cannabis distillate, but the SPP lists infused butter only. If you want to include both marijuana ingredients, they can both be listed, but if it will be one or the other then they should be submitted separately.
- Sugar Cookes (butter and kief):
    - Specify in the SPP at what point kief is added.

Good afternoon Cherie,

These corrections are focused on the Product Manufacturing facility, but I was having trouble seeing how the diagrams were relating to each other. For the time being, I will only be asking about the Product Manufacturing facility. Regarding room dimensions, you can either provide the square footage of each room, or the overall dimensions of outer walls.

It still isn't clear whether or not this is a contiguous premises, and this proposal also makes the Cultivation facility non-contiguous. I made some notes on the color copy that you submitted, and it is attached as "Diagram with Markups". I also asked what the light blue/cyan outline represents, since this is a different shade than was previously used to label the Product Manufacturing license.

There was a note on this diagram that all areas outlined in yellow are the licensed premises. The Retail Store, Cultivation Facility, and Product Manufacturing facility are all separate licenses, and each has a separate licensed premises. In order for each premises to be contiguous, you should be able to access every part of that premises without needing to pass through a different licensed premises (or going outside). For the purposes of this application, only the restricted access areas of the Product Manufacturing license need to be labeled.

Let me know if you have any questions about the diagrams.

Marijuana Product Review

I received the revisions to products that you submitted last Thursday, but there are questions that I have for the Marijuana Control Board regarding how products are submitted that I will be seeking clarification on at the November 13-15, 2019 meeting. This includes listing multiple marijuana ingredients on a single product, and other factors that may be applicable for some of the products that you are proposing. I can continue reviewing your proposed products based on our current interpretation if you would like, but would you mind waiting until after the November meeting so that I can get some of the questions answered?

Sincerely,

To Whom It May Concern,

Attached please find our standard cover sheet with listed documents regarding GoodSinse LLC marijuana product manufacturing facility license number 14874. Per AMCO's email of October 25, 2019 regarding the above license, we have revised the premises diagram to MJ-02 to better reflect the boundaries; an uncolored diagram is also included to better see the details. As for room dimensions, what specifics do you require? Do you want simple square footage or would you like the length by width by height of the rooms? Is this regarding our onsite consumption area or manufacturing area? The onsite consumption is not scheduled to begin construction until early spring 2020. We understand that changes to the premises diagram may be necessary once we receive approval from the State of Alaska for the onsite consumption endorsement. Thank you for your assistance.

Attachments:	image001.png

Good morning Dan,

Thank you, received and the three licensed premises appear to be contiguous. Both of the submitted diagrams are in color, but it is easier to see the layout of the rooms and the doorways in the "Peters PH 4 AMCO Diagram 2" version so I would advise using that copy. For your MJ-02, we have Diagrams 3 and 4 on file, so Diagrams 1, 2, and 5 are still outstanding. This does show many of the requirements of Diagrams 1, 2, and 5, so please label them as such if you would like to submit them that way. There are some additional details to include to meet the requirements of Diagram 1 though:

- Include a label on this diagram that this is specifically for License #14874. The different licenses in the building are labeled, but this is just to clearly indicate that this is part of the #14874 application.
- Include on the diagram that all areas except the restrooms are restricted access areas.
    - Can you outline the restrooms in a different color to make it clear where they are?
- Please add the outer dimensions of the building. The retail and consumption areas have dimensions shown, but not the rest of the building.
- Label what the different areas of the Manufacturing premises are used for, such as storage.

In order for an application to be considered on the November 2019 meeting, the application would have needed to be deemed complete on or before October 25, 2019, unfortunately. The corrections to your proposed products are nearly complete, but three still need corrections:

- Candy Wafers – the Ingredients say that distillate will be used, but the Standard Production Procedure (SPP) says kief.
- Cannastix – the Ingredients say "cannabis distillate", but the SPP says "cannabis distillate or other cannabis approved concentrate".
- Chocolate Coffee Crunch Bites (with distillate) – cannabis distillate is listed in Ingredients, but the SPP states "kief (or distillate)".

I wanted to get a better understanding of what was being proposed for the facility before proceeding with your Onsite Consumption Endorsement application, so I'll be following up with you on this application a little later in the afternoon.

Let me know if you have any questions about this application.

Sincerely,

TJ Zielinski

Subject: Re: Incomplete Application - GoodSinse LLC, License #14874

Mr. Zielinski,

3 things to discuss;

1. I think we may have a solution for our premises diagram problems. We have altered the premises diagram to reflect a contiguous pathway for the product manufacturing facility by eliminating cultivation storage in that area and changing it to product manufacturing only. We have also included the square footage for each of the license types. Please note that all restricted access areas for product manufacturing facility are located within the blue boundary marking, excluding our restrooms. This attached diagram will be the final layout for all license types and endorsements,(if approved) at GoodSinse. Two copies of the diagram have been attached. One is colored to indicate boundaries and one without for better detail.

2. I am requesting we continue with GoodSinse Manufacturing license #14874 to be approved in the November meeting. I normally wouldn't mind waiting to get the clarification you need, however per earlier AMCO emails, if we aren't found to be complete soon we will have to submit a new application. This will likely trigger a new conditional use permit with the FNSB as well as other government red tape. I could see waiting for approval for the products in question. Is something you would consider?

3. I'm wondering if there was anything further with onsite consumption endorsement. Have we met all requirements? I'm seeking approval before I do any major reconstruction of the building.

Thanks for your help!

Good morning,

I have received and reviewed the revisions for this application, but there are still corrections required. The revised Diagram 2 and 3 does not show the restricted access areas for the Marijuana Product Manufacturing Facility. Instead, it shows restricted access areas for your retail store. It also does not provide the information required on Diagram 3. As a reminder, the diagrams needed are:

- Diagram 1 – a diagram of the licensed premises for THIS establishment, to include room dimensions, the restricted access areas, and other information listed in the instructions for MJ-02.
- Diagram 2 – a diagram that outlines all areas of the premises that GoodSinse LLC has legal right to.
- Diagram 3 – a site plan, as-built, or similar diagram showing the different structures on the property
- Diagram 4 – an aerial photo of the lot and the surrounding lots
- Diagram 5 – a diagram of the entire building that distinguishes between this licensed premises, other premises in the building, and any unlicensed areas as appropriate.

Let me know if you have questions about the diagram requirements. It has gotten somewhat complicated, but this should be very close to being complete.

Marijuana Products

At the November 2019 Meeting, the Board clarified that a single product can include multiple proposed marijuana ingredients without needing to submit them as separate products (using shatter, distillate, or kief, for example). You separated your products out based on marijuana ingredients as I had previously asked, but if you would like then you can include multiple under a single product. Let me know how you want to proceed on those products.

One other clarification that came from the board was that for concentrates, the solvents used in production need to be specified. Your concentrates include isobutane, ethanol, n-butane, propane, heptane, CO2, or a mixture of gases. Please ensure that only the solvents that you are proposing to use for these products are listed. Many of the Standard Production Procedures for various concentrates are the same. Are any additional steps taken during the production processes that differentiates these products?

As a side note, there were some products and revisions to products submitted with these documents that were not items that I requested. If you make changes that aren't asked for, can you summarize them in the body of emails?

Let me know if you have any questions.

Sincerely,

TJ Zielinski

Hello,

I have finished reviewing your documents, and no further corrections are required for Form MJ-02: Premises Diagram. However, some products will require some revisions or clarification.

Crumble, Pull and Snap, Shatter, Sugar Wax, Terp Sauce, THCA Diamonds, and Wax
The Product Descriptions for these products state that they will be made from BHO, CO2, or ethanol extractions/EHO (in the case of Shatter). Isn't BHO hash oil that has been extracted from cannabis using butane? Also, some of the products listed also include propane and heptane, which are different from butane.

The Standard Production Procedures for these products are identical, except for some differences in the solvents that will be used. Are any additional steps taken during production that results in different end products? Wax includes the additional step that it will be whipped before purging is complete. What about the others?

Distillate Inhalers
Will the distillate used be your own in-house product, or sourced from another manufacturer. Please specify in either the Product Description or Standard Production Procedure. You mention adding terpenes in the description, but this is not included as a part of the Production Procedure. Please include this step, and specify whether the added terpenes will be from marijuana or some other source.

Pressed Hash
The Product Description states this product is made by mixing cannabis oils and kief, but this is not reflected in the Standard Production Procedure. What kinds of cannabis oils will be used, and where does the kief come from? That isn't a proposed product included in this application.

Vape Cartridge
The Standard Production Procedure is identical to the one listed for Distillate Vape Cartridges. How are these products different?

Brownies (both variants)
Per the Product Description, brownies will be cut into 1" by 1" squares, or 3" by 3" squares. In the Packaging Description, can you specify which brownie is packaged in which way?

Chocolate Chip Cookies
In the Standard Production Procedure, at what point is cannabis distillate added?

Infused Coffee, Infused Glaze, Infused Juice, Infused Lemonade, Infused Pesto, Infused Tea

In the Packaging Description, specify how much of the product will be packaged in a container, and how much of the product equals one serving.

Infused Syrup
When are flavoring syrups added? Please also specify how much of the product will be packaged in containers.

Instant Coffee
How much of this product is packaged in each container?

Pain Patch
In the Ingredients, include a list of the different concentrates that will be used in the making of this product.

Sincerely,

---

Good morning,

Understood, thank you for the heads up. I finished reviewing these products, and all but two need no further revisions.

For Infused Tea, can you include a list of flavors? The previous versions listed green tea and kombucha, but it looks like you are anticipating additional flavors based on the ingredients.

For Instant Coffee, there are some typos in Line 2 of the Packaging Description.

Due to the number of products that are included with this application, see below for a list of products received that do **not** need further corrections (this is just for reference):

1. Breath Mints
2. Breath Spray
3. Brownies
4. Bubble Hash
5. Buttercreams (with distillate)
6. Buttercreams (with infused butter)
7. Candy Wafers
8. Cannastix
9. Caviar Joints
10. Cheesecake Bites (with distillate)
11. Cheesecake Bites (with kief)
12. Chocolate Chip Cookies
13. Chocolate Coffee Crunch Bites (with distillate)
14. Chocolate Coffee Crunch Bites (with kief)
15. Chocolate Ganaches
16. Chocolate-Covered Caramels (with distillate)
17. Chocolate-Covered Caramels (with kief)
18. Crumble
19. Distillate
20. Distillate Inhalers
21. Distillate Vape Cartridges
22. Donuts
23. EHO
24. Ethanol Cannabis Mixture
25. FECO Capsules
26. FECO Syringes

27. Green Dragon Tincture
28. Gummies
29. Hard Candies
30. Hash Cookie
31. Infused Butter
32. Infused Coconut Oil
33. Infused Coffee
34. Infused Glaze
35. Infused Juice
36. Infused Lemonade
37. Infused Olive Oil
38. Infused Peanut Oil
39. Infused Pesto
40. Infused Syrup
41. Infused Vegetable Glycerin
42. Infused Vegetable Oil
43. Lemon Sugar Face Scub
44. Lollipops
45. Moon Rocks
46. Pleasure Patch
47. Popsicles
48. Pressed Hash
49. Pressed Rosin
50. Pull and Snap
51. Rice Krispie Treats (Gluten Free) [with infused butter]
52. Rice Krispie Treats (Gluten Free) [with kief]
53. Shatter
54. Sugar Cookies (with distillate)
55. Sugar Cookies (with kief)
56. Sugar Wax
57. Terp Sauce
58. THCA Diamonds
59. Wax

Hello,

Please see attachment that includes 20 revised products. We have removed the the Vape Cartridge as it was a double to our Distillate Cartridge.

Cherie is no longer with the company so I will be taking over so I apologize as I'm just taking things over and piecing it together.

Thanks,

Shaun Huot
