Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	GoodSinse LLC	**MJ License #:**		14874	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	GoodSinse LLC				
Premises Address:	2604 Davis Road				
City:	Fairbanks	**State:**	Alaska	**ZIP:**	99709

AMCO Received 10/23/2019

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

Cannabis will be purchased from licensed cultivators in the State of Alaska. This cannabis will be used to produce various products with the intention of selling those products wholesale to State of Alaska licensed marijuana retailers and State of Alaska licensed marijuana product manufacturing facilities. All employees of GoodSinse will maintain a current State Marijuana Handler Permit Card. Most marijuana products will be moved directly within the facility to our retail location. However, products that will be transferred will be done so in an opaque container, limited to five pounds per tag ID, with a tamper-proof seal. A completed transport manifest will be kept with the transport and cannabis at all times. METRC will be used to record the type, amount, weight, and name of transported products, time of departure and expected delivery time and to ensure consistency. It will also include the vehicle information including make, model, and license plate number of the vehicle transporting cannabis. It will be transported and stored in a lockable compartment of the vehicle where it will remain until arrival at the named destination. The transporting vehicle will travel directly to the destination. The recipients will only include State licensed facilities. A signature, printed name, Marijuana Handler Permit number, and time of arrival will all be recored on the manifest upon arrival to the destination. A copy of the completed manifest will be kept at GoodSinse. METRC will be also be used to record the sale of all marijuana products and will keep an updated inventory of said products. Employees will ensure all customers have valid photo identification stating they are twenty-years (21) of age or older and that customers show no visible signs of impairment.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

A convection oven will be used to decarboxylate the cannabis trim or flower. Then we will use either the stove top or crock pot for slow cook edible cannabis extracts made with butter and/or coconut, peanut, vegetable, and/or any other edible oil. A list of chemicals that will be used during the extraction process are (but not limited to): dry ice, CO2, heptane, Isobutane, N-butane, propane, hexane, liquid nitrogen, ethanol, isopropyl alcohol, PTFE thread sealing tape, non-melting silicone lubricant, 3A micron sieve bead, glycol/water. All chemicals will be clearly marked and stored in accordance with local and state fire regulations.

Butane hash oil (BHO) products will utilize closed-loop oil extractor.

Alcohol (EHO) extractions will utilize a closed-loop rotary evaporation for recovery of ethanol.

Carbon dioxide (CO2) extractions will utilize a closed-loop extractor.

Rosin press will utilize heat and pressure to extract oil.

Kief spinner will separate trichromes from plant material.

AMCO Received 10/23/2019

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it. DP

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

The removal of all solid waste for the facility is done by Business Services of Alaska LLC or Alaska Waste Management. There will be an on-site septic system for wastewater. Cannabis solid waste, including expired or outdated marijuana or marijuana product, will be stored in accordance with local, State, and Department of Environmental Conservation (DEC) regulations until its destruction and eventual compost or removal. All cannabis plant waste, including expired or outdated marijuana or marijuana product will be weighed, logged and held on camera for the required seventy-two (72) hours before being mixed with equal parts compostable material. Some examples of compostable materials used are wood chips, saw dust, soybean meal, barley, plant root balls or any other compostable material that renders the waste unusable for its original intended use. No unusable cannabis will leave the premises until it has been properly processed. Once mixed the mixture will be placed in the secured compost pile, dumpster, livestock feed pile, or prepared for removal from the premises. The composting area will be located in a fenced area with a lock. GoodSinse will notify the Board using METRC at least three (3) days before destruction or composting of any waste. No unusable cannabis will leave the premises until it has been properly processed. All auxiliary process waste such as used paper towels, Q-tips, rubber gaskets, blue Teflon tape, etc. will be disposed of in accordance with local waste codes.

The extractions staff will dispose of all liquid waste in accordance with local, State, and Department of Environmental Conservation (DEC) rules and regulations. Product manufacturing will not generate a substantial increase in wastewater.

AMCO Received 10/23/2019

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	DP

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

GoodSinse will not sell, give, distribute, deliver, or offer to sell, give, distribute, or deliver, marijuana or a marijuana product until all laboratory testing required under 3 AAC 306.645 has been completed, and the label required under 3 AAC 306.475 or 3 AAC 306.570 is affixed (3 AAC 306.340). GoodSinse will provide a sample of each marijuana product manufactured at the facility to a licensed marijuana testing facility, and will not sell or transport a marijuana product until all laboratory testing required under 3 AAC 306.645 has been completed. GoodSinse will also collect a random sample for testing by selecting a product from each production lot in an amount required by the marijuana testing facility; and designate an individual responsible for collecting each sample. That individual will prepare a signed statement showing that each sample has been randomly selected for testing; will provide the signed statement to the marijuana testing facility; maintain a copy as a business record under 3 AAC 306.755; and will transport the sample to the marijuana testing facility in compliance with 3 AAC 306.750. After collecting and transporting a sample for testing, GoodSinse will segregate the entire production lot from which the testing sample was selected until the marijuana testing facility reports the results from its tests. During this period of segregation, GoodSinse will maintain the production lot in a secure, cool, and dry location to prevent the marijuana product from becoming contaminated or losing its efficacy. GoodSinse will not sell or transport any marijuana product from the segregated lot until the marijuana testing facility has completed its testing and analysis and provided those results, in writing, to GoodSinse. GoodSinse will also maintain the testing results as part of its business records. Samples of marijuana concentrate or other marijuana product may be provided to an employee of the facility, provided that the employee is in possession of a valid marijuana handler card for the purpose of quality control and not to be consumed on premises in accordance with 3 AAC 306.557.

AMCO Received 10/23/2019

(Additional Space as Needed):

AMCO Received 10/23/2019

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;** DP

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or** DP

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.** DP

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Breath Mints		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	12 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Breath mints will be white, smooth and round and approximately 1/2" in diameter.
Ingredients:	Powdered gum paste, extract (flavors: peppermint, cinnamon, spearmint and strawberry), powdered sugar, cannabis distillate, water, and lecithin.
Standard Production Procedure and Detailed Manufacturing Process:	Powdered gum paste is mixed with water and then kneaded to form a dough. Extract and acannabis distillate is then added and mixed in. Dough is then flattened on powdered sugar and cut into small circles; the circles then covered in more powdered sugar and allowed to dry before being put into containers and stored in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Breath Mints
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Breath mints will be placed into a clear Mylar bag with black or white backing or a childproof cardboard box or tin container. Each container will be sealed. Each mint will equal one serving. Each container will contain ten servings. Each package will contain 50mg THC, or 5mg THC per serving. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Breath Spray		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	12 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Breath spray will be a clear liquid.
Ingredients:	Flavored oil (flavors: peppermint, cinnamon, spearmint and strawberry), cannabis distillate, filtered water, and lecithin.
Standard Production Procedure and Detailed Manufacturing Process:	Oil is mixed with approved cannabis concentrate and water. It is then put into containers and stored in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for <u>each</u> proposed marijuana concentrate or marijuana product.

Product Name:	Breath Spray
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Breath spray will be placed into a clear plastic bottle. Each container will be sealed. Four sprays will equal one serving. Each container will contain ten servings. Each package will contain 50mg THC, or 5mg THC per serving. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Brownies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	8 weeks
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Brownies will be cut into 1" x 1" or 3" x 3" squares. They will be brown, soft, moist, and fudgy.
Ingredients:	All-purpose flour, sugar, brown sugar, eggs, marijuana, butter, cannabis kief or cannabis distillate, cocoa, vanilla extract, and kosher salt.
Standard Production Procedure and Detailed Manufacturing Process:	All ingredients are mixed together and poured into a pan and baked in an oven. They are then removed from the oven and allowed to cool. They are then cut into squares, put into containers and stored in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Brownies
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Brownies will be placed in a childproof Mylar bag or cardboard box. Each container will be sealed and contain one brownie. Each 3"x3" brownie will contain (10) 1.5"x0.6" 5mg THC servings totaling 50mg THC and 1"x1" brownie will contain either (1) 1"x1" 5mg THC servings totaling 5mg THC or (2) 1"x0.5" 5mg THC servings totaling 10mg THC. Labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bubble Hash		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Bubble hash is made using ice water. It has a golden yellow to dark brown color. Individual trichomes are separated from the plant and collected to form a “brown sugar” consistency. This product can be pressed and shaped into cubes or pucks.

Ingredients:	Non-applicable

Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing an ice water bath to extract oils from cannabis plant matter by placing the plant matter in a mesh bag and washing it in cold distilled water and ice. The water is then further strained to remove the plant matter. The hash is then scooped out and placed on parchment paper to dry, and then packaged.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bubble Hash
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Bubble hash will be placed into a clear acrylic or glass container with childproof lid or a clear Mylar bag with black or white backing. Each bag or container will be sealed. Each package will range in weight from .5g to 7g and will not exceed 5600mg THC per package. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Buttercreams		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Buttercreams will be brown firm squares about 1" x 1" in size.
Ingredients:	Tempered dark chocolate will be used for covering. Butter, cannabis distillate, light corn syrup, lemon juice, cream, candy flavoring oil (mint, orange and raspberry), and powdered sugar will be used for centers.
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients are mixed together and heated until melted and then and then poured into a candy mold. After buttercreams have cooled and set, they are removed from the candy mold, put into containers and stored in temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Buttercreams
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Buttercreams will be placed into a clear childproof Mylar bag with black or white backing or childproof cardboard box. Each container will be sealed. Each container will contain either 2, 5 or 10 servings; each piece will equal one serving. Each package will contain10mg THC, 25mg THC or 50mg THC total, or 5mg THC per serving. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Product Name:	Caviar Joint		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Cannabis joints are tubular, long, thin and firm with a filter on one end.
Ingredients:	Marijuana, cannabis distillate and cannabis flower kief.
Standard Production Procedure and Detailed Manufacturing Process:	Caviar joints are joints that are packed with flower or trim leaves. The outside of the joint is then sprayed with distillate made from BHO, CO2, or ethanol extractions. Each joint is then dusted with kief that has been mechanically separated from cannabis flower.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Cheesecake Bites		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 wks. frozen; 5 days refrig.
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Cheesecake bites will be light-colored and will vary based on flavors. The bites will be firm but creamy.
Ingredients:	Sugar, cream cheese, sweetened condensed milk, eggs, lemon juice graham crackers, vanilla extract, butter, cannabis distillate and cocoa powder and semi-sweet chocolate chips (for chocolate flavoring) or fruit pie filling (flavors: blueberry, cherry).
Standard Production Procedure and Detailed Manufacturing Process:	Sugar, graham crackers and butter are mixed together and pressed into bottom of baking pan for the crust. Cream cheese is blended using a mixer until it is smooth. Sweetened condensed milk, vanilla extract, cannabis distillate and lemon juice are then added to mixture and blended until smooth and no lumps remain. The mixture is poured onto the crust and chilled until it is set. It is cut into squares, put into containers and then stored in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Product Name:	Crumble		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Crumble is made from BHO, CO2, or ethanol extractions. Crumble can range in color from white, golden yellow, to dark amber. It is not transparent. It is brittle-like wax but does not easily stick together.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses isobutane, propane, or CO2 as a solvent to “wash” cannabis plant matter. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete the extract is collected and the solvent is reused. No post production steps are taken to get consistency as it forms naturally.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Distillate Inhalers		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Inhalant/Wholesale		

Product Description: Details must include the color, shape, and texture.	The oil can be clear to light amber in color. Distillate may be mixed with terpenes to enhance flavor. The distillate is suspended in an ethanol solution. The inhaler is shaken then consumed by pressing down on the canister to deliver a 5mg dose of THC.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing their own distillate or that from other approved marijuana product manufacturers. Distillate inhaled are made using BHO, CO2, or ethanol extractions that have been further processed by short path distillation. If terpenes are added, they will be mixed during the suspension in an ethanol solution to reach the consistency of an aerosol. If terpenes are sourced to mix with the distillate they will be from marijuana or other natural sources.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Distillate Vape Cartridge		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale		

Product Description: Details must include the color, shape, and texture.	Distillate vape cartridge is made from BHO, CO2, or ethanol extractions and will also be dispensed from a vape cartridge. The oil can be clear to light amber in color. Vape cartridge oil is viscous like honey.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses isobutane or ethanol or n-butane or propane or heptane CO2, or a mixture of gases, as a solvent to "wash" cannabis plant matter to make a crude oil. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete the extract is collected and the solvent is reused. It is further distilled using specialized lab equipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Distillate Vape Cartridge
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Distillate vape cartridge will be individually packed in a clear cartridge with two silicone caps on either end. The capped vape cartridge will then be placed into a clear Mylar bag with black or white backing or a childproof cardboard box. Wholesale packaging in bulk will be in a glass container not to exceed five pounds. Each bag or container will be sealed. Each package will not exceed 5600mg THC per package. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Distillate		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale		

Product Description: Details must include the color, shape, and texture.	Distillate is a viscous liquid that ranges from clear to emerald green in color.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will utilize a closed loop extraction system which uses isobutane or ethanol or n-butane or propane or CO2, or a mixture of gases, as a solvent to "wash" cannabis plant matter; primary source for crude oil will be ethanol-extracted. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete, the extract is collected and the solvent is reused. It is further distilled using specialized lab equipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Distillate
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Distillate will be packaged for individual retail in syringes and/or a clear Mylar bag with black or white backing. Distillate will also be used in-house as an ingredient for other products except for wholesale to other marijuana product manufacturing facilities. Packaging for wholesale will be in glass beakers. Each container will be sealed. Each package will not exceed 5600mg THC per package. All packaging and labeling will comply with 3 AAC 306.565-570. Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Donuts		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1-2 days, 1 week refrig.
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Donuts are brown, round, cake-like in appearance and have holes in the center. They are approximately 2" in diameter and will be spongy in texture.
Ingredients:	Flour, sugar, baking powder, salt, cinnamon, nutmeg, vanilla extract, milk, eggs, infused vegetable oil.
Standard Production Procedure and Detailed Manufacturing Process:	Combine dry ingredients. Beat eggs with milk and mix with remaining ingredients and add to dry mixture. Pat to 1/4" thickness and use cutter to form circles. Heat oil to 375 degrees F and drop circles into oil. Remove from oil when done and allow to cool before putting into containers and storing in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for <u>each</u> proposed marijuana concentrate or marijuana product.

Product Name:	Donuts
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Donuts will be placed into a clear Mylar bag with black or white backing or childproof cardboard box. Each container will be sealed and will include 2, 4 or 10 servings; one donut will equal two servings. Each package will contain 10mg THC, 20mg THC, or 50mg THC, or 5mg THC per serving. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	EHO (Ethanol Hash Oil)		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale		

Product Description: Details must include the color, shape, and texture.	EHO is extracted using an ethanol alcohol wash. All alcohol is evaporated/purged off and then filtered. It has a dark brown or dark green color. It has a viscous and sticky consistency like honey.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses ethanol as a solvent to “wash” cannabis plant matter. The extract is further filtered. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete, the extract is collected and the solvent is reused.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	IPopsicles will be frozen (cold and hard) and rectangular in shape. Color will vary with flavor.
Ingredients:	Flavored fruit juice (flavors: cherry, orange, grape, apple, pineapple, lemon, lime and mango) and cannabis distillate.
Standard Production Procedure and Detailed Manufacturing Process:	Popsicles are made by adding cannabis distillate to juice. They are slowly heated together at low temperature and cooled before being poured into a mold with wooden sticks inserted in the center and then frozen. They are then removed from the mold, placed into a container and stored in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for <u>each</u> proposed marijuana concentrate or marijuana product.

Product Name:	Popsicles
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Popsicles will be placed into clear plastic wrapping and then into a clear Mylar bag with black or white backing or a childproof cardboard box. Each package will contain 2 servings, 4 servings or 10 servings; one popsicle will equal one serving. Each container will be sealed. Each container will contain 10mg THC, 20mg THC or 50mg THC, or 5mg THC per serving. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pressed Hash		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Pressed has will range from light green to dark brown. Consistency will be cake-like fudgy. Pressed Hash will be formed into a round ball, square or coin shape, approx. 1.232" in diameter.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	Pressed Hash is made by mixing dry sift kief sourced from an approved marijuana cultivation or manufacturing licensee. The kief is then mixed with terp sauce and distillate and then formed into desired shape.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pressed Hash
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Pressed Hash will be packaged into a cardboard, or plastic or glass container. Containers will be placed into a childproof cardboard box or mylar bag. Each Pressed Hash will range in weight from 0.5g to 7g and will not exceed 5600mg THC. All packaging and labeling will comply with 3 AAC 306.565.570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pressed Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Pressed rosin is made using heat and pressure. Pressed rosin will be made from either flower or kief. Its color can range from a golden yellow to dark amber. Its transparency can be clear to cloudy. Consistency can be sticky and smooth, or form into larger clumps. There is no set shape.
Ingredients:	Non-applicable.
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a rosin press system which uses heat and pressure to extract oils from cannabis.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pressed Rosin
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Pressed rosin will be placed onto parchment paper and then into a clear Mylar bag with black or white backing, or other suitable childproof container. Each bag or container will be sealed. Each package will range in weight from .5g to 7g and will not exceed 5600mg THC per package. All packaging and labeling will comply with 3 AAC 306.565-570.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pull and Snap		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Pull and snap is made using BHO, CO2, or ethanol extractions. Pull and snap can be golden yellow to dark amber in color depending on the strain used. It can be clear and transparent like glass or cloudy like wax. It has the consistency of taffy when pulled.

Ingredients:	Non-applicable

Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses isobutane, ethanol, n-butane, or CO2 as a solvent to “wash” cannabis plant matter. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete the extract is collected and the solvent is reused. No post production steps are taken to get consistency as it forms naturally.

Depiction:
Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Pull and Snap
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Pull and snap will be placed into an acrylic, glass container, or parchment paper. Container will be placed into a childproof mylar bag or cardboard envelope. Each bag or container will be sealed. Each package will range in weight from 0.5 to 7.0g per package. All packaging and labeling will comply with 3 AAC 306.565-570. Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rice Krispie Treats (Gluten-free)		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	8 weeks
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Rice Krispie treats will be light in color and will be cut into 4" x 4 1/2" squares and will be slightly firm and chewy.
Ingredients:	Marshmallow cream, Rice Krispies cereal, and infused butter.
Standard Production Procedure and Detailed Manufacturing Process:	Infused butter and cream are melted and cereal is added and mixed together. Mixture is then poured into a baking pan and allowed to cool before being cut into squares and frozen between wax paper and put into containers and stored in temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Product Name:	Shatter		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Shatter is made by using BHO, EHO or CO2 extractions. Shatter is smooth and brittle like glass or bendable. It can be clear, golden yellow or darker amber in color.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses isobutane, ethanol, n-butane, or CO2 as a solvent to “wash” cannabis plant matter. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete the extract is collected and the solvent is reused. No post production steps are taken to get consistency as it forms naturally in the lower temperatures of purging.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Sugar Cookies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	8 weeks
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Cookies will be light-colored, round and 2" in diameter, and either soft and chewy or hard and crunchy in texture.
Ingredients:	All-purpose flour, white sugar, baking powder, baking soda, eggs, butter, cannabis distillate and vanilla extract.
Standard Production Procedure and Detailed Manufacturing Process:	Dry ingredients are mixed together. Then eggs are mixed with butter, cannabis distillate and vanilla extract and combined with dry ingredients. Cookies are placed onto a baking sheet and heated at 375 degrees for 8-10 minutes. After they are removed from the oven and allowed to cool, they are put into containers and stored in a temperature-controlled environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	THCA Diamonds		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	THCA Diamonds are made from BHO, CO2, or ethanol extractions. THCA Diamonds can be clear, yellow, or dark amber depending on the strain being used. They are hard like glass but not brittle. They may be suspended in light oil of residual terpenes. THCA Diamonds can be up to 99.9% THC.

Ingredients:	Non-applicable

Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses isobutane, ethanol, n-butane, CO2 or a mixture of gases as a solvent to “wash” cannabis plant matter. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete the extract is collected and the solvent is reused.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Wax		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Wax is made using BHO, CO2, or ethanol extractions. Wax color can range from golden yellow to dark brown. It is not transparent. Its consistency is waxy or like a thick paste.
Ingredients:	Non-applicable
Standard Production Procedure and Detailed Manufacturing Process:	GoodSinse will be utilizing a closed loop extraction system which uses isobutane, ethanol, n-butane, propane, CO2 or a mixture of propane & n-butane as a solvent to “wash” cannabis plant matter. A closed loop system will prevent any solvents from being released into the atmosphere and allows for reclamation of the solvent for reuse. Once the process is complete the extract is collected and the solvent is reused. It is then "whipped" during the purge process and then left to purge completely.
