Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

What is this form?

This operating plan change form is required for all marijuana establishment licensees seeking to change a licensed marijuana establishment's existing operating plan, as required by 3 AAC 306.100. With this form, a licensee may request changes to as much or as little as desired of Form MJ-01 and/or the corresponding operating plan supplemental for the establishment's license type. The **required $250 change fee may be made by check, cashier's check, or money order.**

Please complete and submit with this form the pages of Form MJ-01 and/or the corresponding operating plan supplemental that contain sections that you are requesting to change. **All fields must be completed of any page for which you are requesting changes** – upon board approval, the submitted pages will replace those currently on file. If your current, approved operating plan is on the original version of the forms, you may be required to complete and submit the new operating plan forms in their entirety.

The form(s) that I am requesting board approval to change is:

- [ ] **Form MJ-01:** Marijuana Establishment Operating Plan
- [ ] **Form MJ-03:** Retail Marijuana Store Operating Plan Supplemental
- [ ] **Form MJ-04:** Marijuana Cultivation Facility Operating Plan Supplemental
- [x] **Form MJ-05:** Marijuana Product Manufacturing Facility Operating Plan Supplemental
- [ ] **Form MJ-06:** Marijuana Testing Facility Operating Plan Supplemental

This form must be completed and submitted to AMCO's main office prior to changing existing operations. The licensed establishment's operations may not be altered unless and until the director has given temporary approval or the Marijuana Control Board (MCB) has given final approval of the changes. Please note that licensees seeking to change operating plans for multiple licenses must submit a separate completed copy of this form for each license.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Raspberry Roots, LLC	**MJ License #:**	10856		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Raspberry Roots				
Premises Address:	501 Raspberry Rd Suite 102				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99518

Form MJ-15: Operating Plan Change

Section 2 – Summary of Changes

Provide a summary of the changes for which you are requesting approval.

Canamo Vapes
We would like to add a secondary packaging option for our Vapes. Currently, our vapes are approved to be packaged into a child proof blister package. However, challenging supply chain logistics and volitility of product quality standards has led us to need addiitonal options to safely and compliantly distribute our vapes to consumers. Our request is to allow for a secondary option to package vapes into a mylar bag.
Mylar bags are resealable bags made from mylar material and used to help with the effects of heat, smell, light, moisture, oxygen, etc. on the products. The mylar bag will be approx. 2.5" to 3 " wide and 4.5 " to 9" tall. They have the ability to be heat sealed to prevent any tampering of products. The Mylar packaging will feature custom stickers to display the brands logo and product information, along with the applicable labels for regulatory compliance.

Additional changes include detailing marijuana concentrates and terpenes used for vape production.

Section 3 – Declarations

Read each statement below, and then sign your initials in the corresponding box to the right:	Initials
The proposed changes conform to all applicable public health, fire, and safety laws.	KAK
I understand that any temporary approval granted by the director is pending a final decision by the MCB; therefore, any investment I make, based upon temporary approval, is at my own risk.	KAK

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Canamo Vapes		
Product Type:	Concentrate		
Perishable: Yes/No	no	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Vape Oil is the softest, most viscous form of extracted cannabis. Usually sticky and runny like typical honey oil. Color ranges from a bright amber to a golden brown. Our Cannabis Vape Oil sold in cartridges to be smoked through vaporizing gadgets. To lighten the viscosity of the oil and allow for vaping mechanisms, oil is cut with certain mediums. Canamo vapes will consist of 0.5 to 1.0 gram of oil which will equate to approx. 200 to 900 mg of THC (dependent on the individual lot number) per each 0.5 ml to 1.0ml cartridge, respectively.
Ingredients: This box is not applicable to marijuana concentrates.	Marijuana concentrate - mainly shatter but may consist of our other approved marijuana concentrates Sugar Wax, Terp Dimond/Sauce, Budder, Badder, Crumble or Delight's Oil , viscosity cutting agent (polyethylene glycols, medium-chain triglycerides, Tec Temper, Cannabis Terpenes or Purchased Terpenes, or CBD) The particular marijuana product and Terpenes (including source of terpenes) used will be clearly indicated on the label
Standard Production Procedure and Detailed Manufacturing Process:	1. Put the marijuana concentrate (as identified and explained in the ingredient section above) into a Pyrex beaker and heat to specified temperature. 2. Process marijuana concentrate through a distillation procedure to further separate the cannabis compounds. End result product is still the same, just cleaner and more pure. With either starting substance, wait until product is at desired temperature and add cutting medium (i.e Cannabis Terpenes or purchased Terpenes, MCT, PEG, Tec Temper, etc.) 3. Immediately use heated stirrer to emulsify the blend. Let the solution cool to specified temperature and gather a sample for testing. 4. Upon successful testing results, fill the cartridges using a syringe with 0.5 ML, or 1.0 ML depending on desired cartridge size.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Canamo Vapes
Product Type:	Concentrate

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

First, the vape oil will be packaged into 0.5ml or 1.0ml vape cartridges. There are two types of cartridges: 1. Glass tank, which is transparent with a chrome thread (510 thread) bottom that attaches to external heating apparatus OR 2. Disposable vape cartridge with breath activation for on-demand vapor. Second, the vape cartridge with the cannabis oil will be EITHER placed into a child proof blister package OR a child proof, resealable mylar bag. The mylar bag will be approx. 2.5" to 3" wide and 4.5" to 9" tall depending on cart size. They have the ability to be heat sealed to prevent any tampering of products. The blister package and mylar bag will display the brand's logo and product information, along with the applicable labels for regulatory compliance. The product will be placed in to an opaque bag before leaving retail establishments .
