Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Chocolate Ganja Bar
Type:	Edible Marijuana Product

Product Description: Details must include the color, shape, and texture.	The Chocolate Ganja Bar is a square shaped chocolate bar that will vary in color from light to dark brown and range in texture from smooth to coarse.

Ingredients: This box is not applicable to marijuana concentrates	CO2 concentrate oil, cocoa butter, maple syrup, cacao powder, unsweetened cocoa powder, vanilla extract, roasted almonds or other nuts, mint, sea salt, raspberry, coconut oil, honey

Standard Production Procedure and Detailed Manufacturing Process:	Melt butter (off direct heat) in double boiler. After heat, add maple syrup and whisk until smooth. Add cacao powder, vanilla extract and mix to taste. Measure and pour the tempered mixture onto a pan with almonds, sea salt and any other non cannabis ingredients. Refrigerate to harden and cut into individual serving sizes.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Comfort Caramels
Type:	Marijuana Edible Product

Product Description: Details must include the color, shape, and texture.	Comfort caramels will be square or oval shaped with color ranging from light brown to dark brown. Texture will be smooth on the outside with a chewy center.

Ingredients: This box is not applicable to marijuana concentrates	CO2 concentrate, butter, brown sugar, sweetened condensed milk, corn syrup, salt, vanilla extract.

Standard Production Procedure and Detailed Manufacturing Process:	Line a baking dish with greased parchment paper. Over medium heat, warm the cream, butter and salt in a saucepan until the butter melts. Remove from heat. In another saucepan, combine the sugar, corn syrup and water. Stir until the sugar is evenly moistened to form a thick grainy paste. Wipe down the side of the pan with a damp pastry brush removing sugar crystals from above the mixture. Immerse a thermometer into the mixture. Do not stir at this point. Cook over medium heat. Let the mixture come to a boil without stirring. When mixture hits about 250 degrees the syrup will turn transparent and boil rapidly. Around 320 degrees the syrup will darken slightly. After heat, whisk warm cream and butter into the sugar syrup gently. Return to heat letting the caramel come to a boil without stirring. Color will start off as a soft buttery yellow and turn into a dark reddish brown caramel. whisk vanilla into final mixture. Pour caramel into mold and rest for at least two hours. Separate into single servings from mold and package.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Cotton Mouth Candy
Type:	Marijuana Edible Product

Product Description: Details must include the color, shape, and texture.	Cotton Mouth Candies will be round and the color will vary from light brown or green to dark brown or green and be smooth and slightly sticky in texture.

Ingredients: This box is not applicable to marijuana concentrates	CO2 concentrate, sugar, water, corn syrup, food coloring, essential oils, flavoring

Standard Production Procedure and Detailed Manufacturing Process:	In large saucepan mix together the sugar, corn syrup and water until dissolved. Cook the mixture at 300-310 degrees until it reaches the hard cracked stage in a large saucepan. When ready it should start to yellow around the edges of the pan. Remove from burner to begin cooling. Quickly add any flavoring and food coloring. Pour the liquid candy into an aluminum foil lined pan or partitioned form to separate. Mark the candy into partitions containing no more than 5mg of THC per piece. Once hardened, remove the candy from the foil. Indentations from forming should break apart easily or use a knife to separate candy servings.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Green Acres Oil
Type:	Marijuana CO2 Concentrate

Product Description: Details must include the color, shape, and texture.	Green Acres Oil is a liquid that is clear with a yellow tint and will be available in multiple strains and terpene combinations intended for consumption, Green Acres Oil is manufactured only for wholesale.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Ground marijuana material is decarboxylated in an electric oven. The material is then extracted using the CO2 extractor with specific parameters for oil product. The resulting extract is then further refined using ethanol extraction and then fractional distillation. The plant material, wax, and other inert materials are disposed of according to 3 AAC 306.740 and the final extract is packaged and stored in a freezer.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	*Note - this picture is only to show color and texture of product. This product will no be sold in syringes and will only be used in house for edibles, and sold to other manufactures as wholesale.

Product Name:	Rosin
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Rosin ranges between a smooth and sticky mass and is light yellowish to light brown in color. Shape is amorphous. Rosin has a waxy appearance and is soft and pliable to the touch. Intended for use as an inhalant.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Ground marijuana material or whole flower is loaded into a stainless steel rosin press die. The die is then loaded into a hydraulic press. The die is heated with an electric element while the hydraulic press squeezes the concentrates out of the marijuana plant material. The die is then removed from the press and the marijuana plant material is disposed of according to 3 AAC 306.740. The marijuana concentrates are removed from the die and manually separated into the appropriate weights for retail, packaged, and stored in a freezer.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	THC Truffles
Type:	Marijuana Edible Product

Product Description: Details must include the color, shape, and texture.	Each truffle is round in shape and ranges from light brown to black and may have an additional chocolate drizzle covering the top. The truffle is chocolate on the outside and a flavored ganache (whipped filling with chocolate and flavored cream) on the inside. The consistency ranges from smooth to speckled on the outside with a creamy center.

Ingredients: This box is not applicable to marijuana concentrates	CO2 concentrate (waxy oil), dark chocolate, coco, heavy whipping cream, semi sweet chocolate, butter, corn syrup, chocolate chips, luster dust, coconut, nuts, chocolate shaving, cinnamon, fruit puree, citrus zest, flavored oils

Standard Production Procedure and Detailed Manufacturing Process:	Chocolate: combine heavy whipping cream and melted chocolate with butter in a double boiler Ganache: whisk chocolate, heavy whipping cream and other choice ingredients together with butter and corn syrup (for flavor and texture) and dip into chocolate. Let rest for 12-24 hours. 2 week shelf life at room temperature. For longer term storage, refrigerate for 24 hours before freezing to prevent temperature shock. Temper to store in freezer for up to 2 years and avoid temperature changes. Thaw at room temperature before removing from individual packaging.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	THC Truffles
Type:	Marijuana Edible Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	THC truffles will be individually wrapped in cellophane and then packaged in childproof, food grade, opaque pop tops. One brownie equals one serving and 5mg of THC. Each 60 dram pop top package contains 5 individual servings, totaling 25mg of THC per container.

Sample Labels:
Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.

THC TRUFFLES

Please see below for sample labels. Note: these labels will wrap around the pop tops.

Product Name:	Totem Tinctures
Type:	Marijuana Edible

Product Description: Details must include the color, shape, and texture.	Totem Tinctures are pre-loaded sealed pipettes or syringes filled with cannabis oil. Tinctures have a consistency that varies from liquid to gel form ranging from light yellow to dark amber in color.

Ingredients: This box is not applicable to marijuana concentrates	CO2 oil and food grade ethanol

Standard Production Procedure and Detailed Manufacturing Process:	High purity, food grade ethanol is measured using a pipette and placed in a preloaded syringe not to exceed 50mg THC per syringe. High purity cannabinoid oil is then measured using a pipette and added to the ethanol. The (container) is then sealed and stored in a refrigerator. Syringe will have demarcations indicating each 5mg of THC serving.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Product is for oral consumption. This product provides an edible option to consumers who do not want to consume sugar/calories that most edibles contain.

Some products were approved at the September 2017 meeting, others at the November 2017 meeting.
