Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

What is this form?

This operating plan change form is required for all marijuana establishment licensees seeking to change a licensed marijuana establishment's existing operating plan, as required by 3 AAC 306.100. With this form, a licensee may request changes to as much or as little as desired of Form MJ-01 and/or the corresponding operating plan supplemental for the establishment's license type. **The required $250 change fee may be made by check, cashier's check, or money order.**

Please complete and submit with this form the pages of Form MJ-01 and/or the corresponding operating plan supplemental that contain sections that you are requesting to change. **All fields must be completed of any page for which you are requesting changes** – upon board approval, the submitted pages will replace those currently on file. If your current, approved operating plan is on the original version of the forms, you may be required to complete and submit the new operating plan forms in their entirety.

The form(s) that I am requesting board approval to change is:

- ☐ **Form MJ-01:** Marijuana Establishment Operating Plan
- ☐ **Form MJ-03:** Retail Marijuana Store Operating Plan Supplemental
- ☐ **Form MJ-04:** Marijuana Cultivation Facility Operating Plan Supplemental
- ☑ **Form MJ-05:** Marijuana Product Manufacturing Facility Operating Plan Supplemental
- ☐ **Form MJ-06:** Marijuana Testing Facility Operating Plan Supplemental

This form must be completed and submitted to AMCO's main office prior to changing existing operations. The licensed establishment's operations may not be altered unless and until the director has given temporary approval or the Marijuana Control Board (MCB) has given final approval of the changes. Please note that licensees seeking to change operating plans for multiple licenses must submit a separate completed copy of this form for each license.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Axion Enterprises, LLC	**MJ License #:**			12769
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	SECRET GARDEN CANNABIS				
Premises Address:	726 E. 15th AVE, Suite 2				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99501

AMCO Received 1/2/2020

Alaska Marijuana Control Board

Form MJ-15: Operating Plan Change

Section 2 – Summary of Changes

Provide a summary of the changes for which you are requesting approval.

Secret Garden Cannabis is requesting permission to change packaging options and dosage options to their already approved products.
Below is a list of the packaging and dosage changes made to each product:
Chocolate Ganja Bar: Addition of an CR mylar bag as a packaging option. Addition of optional amounts of servings per package.
Snicker Doobies: Addition of an CR mylar bag as a packaging option. Addition of optional amounts of servings per package. Pot Brownie: Addition of an CR mylar bag (containing clear plastic container) as a packaging option. Addition of optional amounts of servings per package.
THC Truffles: Addition of an CR mylar bag as a packaging option. Addition of optional amounts of servings per package. Greenhouse Specials: Addition of an CR mylar bag (containing clear plastic container) as a packaging option. Addition of optional amounts of servings per package.
Garden Gummies: Addition of an CR mylar bag as a packaging option. Addition of optional amounts of servings per package. Cotton Mouth Candy: Addition of an CR mylar bag as a packaging option. Addition of optional amounts of servings per package
Comfort Caramels: Addition of an CR mylar bag as a packaging option. Addition of optional amounts of servings per package. Addition of options to individually wrap caramels, and wrapping options).Totem Tincture: Addition of bottles as a packaging option. Addition of 0.5 g CR screw top glass container to Rosin. Secret Garden Cannabis would also like to sell Green Acres oil in house and as a product for retail sales.
Secret Garden Cannabis is also adding filtration and cleaning chemicals to their operating agreements - MJ-05 Page 2, Section 3.1

Section 3 – Declarations

Read each statement below, and then sign your initials in the corresponding box to the right: Initials

The proposed changes conform to all applicable public health, fire, and safety laws. JT

I understand that any temporary approval granted by the director is pending a final decision by the MCB; therefore, any investment I make, based upon temporary approval, is at my own risk. JT

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All marijuana at Secret Garden Cannabis product manufacturing facility will be identified and tracked from the time the marijuana or marijuana product is received through sales and/or disposal. Tracking will include identification and acceptance of incoming marijuana or marijuana product, the use of marijuana and marijuana product for extraction and manufacture of concentrates and products, and finally sale and transfer to a retail licensee. Marijuana plant material will be processed for approved concentrate extraction and approved edibles will be produced using the marijuana concentrate. A random sample of each marijuana product manufactured at the facility will be provided to a licensed marijuana testing facility for testing per 3 AAC 306.550. The remainder of the production lot will be segregated in the secured quarantined product area until the testing results are received. All marijuana waste and/or marijuana product waste will be disposed of per 3 AAC 306.740. A METRC transport manifest will be required for all transfers between licensed facilities. For transfer to a facility other than Secret Garden Cannabis, the product will be placed inside a locked and secured storage compartment within the vehicle or affixed to the bed of a truck for transport. Secret Garden Cannabis will comply with Alaska State and Anchorage Municipality health and safety standards. All transactions will be reconciled in METRC by the end of each business day.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Equipment: Commercial oven, CO2 botanical oil extractor, hydraulic rosin press, crock pot, ice water extraction bags, winterization equipment including buchner funnels, filter papers, vacuum pumps, rotary evaporator, hot plates, stir pads and distillation glassware, distillation assembly equipment including chillers, flasks, funnels, heating elements, borosilicate glassware, quartz glassware and various control electronics.
Solvents, gases, chemicals: CO2, ethyl alcohol, activated charcoal, acetone, Celite 545 (Filtration used for winterization process), T5 - Bentonite Clay (Filtration), Limonene (Cleaning) and citric acid.

Additional Equipment: homogenizer, vacuum oven

AMCO Received 1/2/2020

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Chocolate Ganja Bar		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year (Frozen)
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	The Chocolate Ganja Bar is a square shaped chocolate bar that will vary in color from light to dark brown and range in texture from smooth to coarse.
Ingredients:	Ingredients: CO2 concentrate (C02 concentrate will consist of either; crumble, shatter, rosin, kief, green acres oil), cocoa butter, corn syrup, cocoa powder, unsweetened cocoa powder, vanilla extract (with and without) roasted almonds, peanuts, hazelnuts, cashews, pecan, walnut, macadamia nut, brazil nut, cocoa nibs, maple syrup, dried blueberries, dried cherries, dried strawberries, dried mango, dried raspberries, mint, sea salt, coconut oil, honey. Actual C02 concentrate used will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Melt butter (off direct heat) in double boiler. After heat, add maple syrup and whisk until smooth. Add cacao powder, vanilla extract and mix to taste. Measure and pour the tempered mixture onto a pan with almonds, sea salt and any other non cannabis ingredients. Refrigerate to harden and cut into individual serving sizes.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Chocolate Ganja Bar
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Chocolate Ganja Bar will be packaged in child resistant, food grade, opaque mylar bags with an optional clear section to display product or a pop top container. If mylar bag is used, Chocolate Ganja Bar will be placed in an opaque container prior to customer leaving the store. One Piece of Chocolate equals 1 individual serving. Each individual serving equals 5 mg of THC. Each pop top or mylar bag will contain either 2 servings totaling 10 mg of THC per package, 5 servings totaling 25 mg of THC per package or 10 servings totaling 50 mg of THC per package.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	CHOCOLATE GANJA BAR: Please see below for sample labels. Note: these labels will wrap around the pop tops or on the CR Mylar bag. Total amount of THC will be indicated on label based upon total servings per package. Example below reflects label for a total per package of 15 and 30 mg.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Comfort Caramels		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year (frozen)
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Comfort caramels will be square or oval shaped with color ranging from light brown to dark brown. Texture will be smooth on the outside with a chewy center.
Ingredients:	CO2 concentrate (C02 concentrate will consist of either; crumble, shatter, rosin, kief, green acres oil,), butter, brown sugar, sweetened condensed milk, corn syrup, salt, vanilla extract. Actual C02 concentrate used will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Line a baking dish with greased parchment paper. Over medium heat, warm the cream, butter and salt in a saucepan until the butter melts. Remove from heat. In another saucepan, combine the sugar, corn syrup and water. Stir until the sugar is evenly moistened to form a thick grainy paste. Wipe down the side of the pan with a damp pastry brush removing sugar crystals from above the mixture. Immerse a thermometer into the mixture. Do not stir at this point. Cook over medium heat. Let the mixture come to a boil without stirring. When mixture hits about 250 degrees the syrup will turn transparent and boil rapidly. Around 320 degrees the syrup will darken slightly. After heat, whisk warm cream and butter into the sugar syrup gently. Return to heat letting the caramel come to a boil without stirring. Color will start off as a soft buttery yellow and turn into a dark reddish brown caramel. whisk vanilla into final mixture. Pour caramel into mold and rest for at least two hours. Separate into single servings from mold and package.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Comfort Caramels
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Comfort Caramels will be packaged in child resistant, food grade, opaque pop tops or an opaque CR Mylar bag with a clear plastic display window. If packaged in mylar bag, Comfort Caramels will be placed in an opaque container prior to customer leaving the store. One Comfort Caramel = 1 individual serving. One individual serving = 5 mg of THC.. Each pop top or Mylar bag will contain either 5 caramels totaling 25 mg of THC per package or 10 caramels totaling 50 mg of THC per package. Caramels may or may not be individually wrapped in parchment paper, cellophane or similar.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	COMFORT CARAMELS: Please see below for sample label. Note: these labels will wrap around the pop tops. One label is shown for the small pop top and one for the large pop top or mylar bag. Total amount of THC will be indicated on label based upon total servings per package. Example below reflects label for a total per package of 15 and 30 mg.

Product Name:	Cotton Mouth Candy		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Cotton Mouth Candies will be round and the color will vary from light brown or green to dark brown or green and be smooth and slightly sticky in texture.
Ingredients:	CO2 concentrate (C02 concentrate will consist of either; crumble, shatter, rosin, kief, green acres oil), sugar, water, corn syrup, food coloring, essential oils, flavoring. Actual C02 concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	In large saucepan, mix together the sugar, corn syrup and water until dissolved. Cook the mixture at 300-310 degrees until it reaches the hard cracked stage in a large saucepan. When ready it should start to yellow around the edges of the pan. Remove from bumer to begin cooling. Quickly add any flavoring and food coloring. Pour the liquid candy into an aluminum foil lined pan or partitioned form to separate. Mark the candy into partitions containing no more than 5mg of THC per piece. Once hardened, remove the candy from the foil. Indentations from forming should break apart easily or use a knife to separate candy servings.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Green Acres Oil		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Green Acres Oil is a liquid that is clear with a yellow tint and will be available in multiple strains and terpene combinations.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ground marijuana material is decarboxylated in an electric oven. The material is then extracted using the C02 extractor with specific parameters for oil product. The resulting extract is then further refined using ethanol extraction and then fractional distillation. The plant material wax, and other inert materials are disposed of according to 3 AAC 306.740 and the final extract is packaged and stored in a freezer.

Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Greenhouse Specials is a round oatmeal cookie ranging in color from light to dark brown with a slightly crisp exterior and chewy center.
Ingredients:	CO2 concentrate (C02 concentrate will consist of either; crumble, shatter, rosin, kief, green acres oil), butter, brown sugar, vanilla extract, flour, baking soda, salt, cinnamon, nutmeg, quick oats, raisins (with and without), craisins, white chocolate chips, macadamia nuts. Actual C02 concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Mix wet and dry ingredients separately and then combine. Fold in oats, raisins and other ingredients. Form the dough into balled tablespoons and bake on an un-greased cookie sheet. Bake at 375 degrees for 8-11 minutes depending on desired consistency.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Greenhouse Specials
Product Type:	Other Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Greenhouse special cookies will be packaged in child resistant, food grade, opaque pop tops or opaque CR mylar bag with a clear display window, or in a clear plastic container and placed in an Opaque CR mylar bag. If packaged in a mylar bag and/or plastic container, Greenhouse Specials will be placed in an opaque container prior to customer leaving the store. One cookie equals one serving and 5 mg of THC. Each pop top or mylar bag will contain either: 2 cookies totaling 10 mg of THC per package, 5 cookies totaling 25 mg of THC per package or 10 cookies totaling 50 mg of THC per package. Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	GREEN HOUSE SPECIALS: Please see below for sample label. Note: these labels will wrap around the pop tops or on the child resistant mylar bag. Total amount of THC will be indicated on label based upon total servings per package. Example below reflects label for a total per package of 25 mg.

Product Name:	Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Rosin ranges between a smooth and sticky mass and is a light yellowish to light brown in color. Shape is amorphous. Rosin has a waxy appearance and is soft and pliable to the touch. Intended for use as an inhalant.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ground marijuana material or whole flower is loaded into a stainless steel rosin press die. The die is then loaded into a hydraulic press. The die is heated with an electric element while the hydraulic press squeezes the concentrates out of the marijuana plant material. the die is then removed from the die and manually separated into the appropriate weights for retail, packaged, and stored in a freezer.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	THC Truffles		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	2 Years (frozen)
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Each truffle is round in shape and ranges from light brown to black and may have an additional chocolate drizzle covering the top. The truffle is chocolate on the outside and a flavored ganache (whipped filling with chocolate and flavored cream) on the inside. The consistency ranges from smooth to speckled on the outside with a creamy center.
Ingredients:	CO2 concentrate (C02 concentrate will consist of either; crumble, shatter, rosin, kief, green acres oil), dark chocolate, coco, heavy whipping cream, semi sweet chocolate, butter, corn syrup, chocolate chips, luster dust, coconut, nuts, chocolate shaving, cinnamon, fruit puree, citrus zest, flavored oils. Actual C02 concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Chocolate: combine heavy whipping cream and melted chocolate with butter in a double boiler. Ganache: whisk chocolate, heavy whipping cream and other choice ingredients together with butter and corn syrup (for flavor and texture) and dip into chocolate. Let rest for 12-24 hours. 2 week shelf life at room temperature. For longer term storage, refrigerate for 24 hours before freezing to prevent temperature shock. Temper to store in freezer for up to 2 years and avoid temperature changes. Thaw at room temperature before removing from individual packaging.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Totem Tinctures		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Totem Tinctures are pre-loaded sealed pipettes or syringes filled with cannabis oil. Tinctures have a consistency that varies from liquid to gel form ranging from light yellow to dark amber in color.
Ingredients:	CO2 concentrate (C02 concentrate will consist of green acres oil), (with and without) food grade ethanol, safflower oil, vegetable oil, coconut oil, glycerin, MCT oil, artificial flavor (such as; mint oil, lemon oil, rosemary oil, thyme oil, lemon extract, mint extract, vanilla extract, orange extract, ginger extract, lime extract, kiwi extract, blueberry extract, cherry extract, grape extract, strawberry extract, raspberry extract, blackberry extract), food coloring (depending)
Standard Production Procedure and Detailed Manufacturing Process:	High purity, food grade ethanol is measured using pipette and placed in a preloaded syringe or pipette bottle, not to exceed 50 mg THC per bottle or syringe. High purity cannabinoid oil is then measured using a pipette and added to the ethanol. The "container" is then sealed and store in a refrigerator. Syringe will have demarcations indicating each 5 mg of THC serving, Pipette will have graduated lines to indicate serving size.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Product is for oral consumption. This product provides an edible option to consumers who do not want to consume sugar/calories that most edibles contain.

Section 7 – Proposed Product Packaging and Sample Labels
