---

Dear The High Expedition Company,

We have received all approvals necessary to move your license to active status in our database. Although your license will now display as active in the database, this does not mean that you are ready to begin operating. The date that your status is changed to active is the "issue date" for your license. You must follow the steps in the post-approval instructions listed below. Once you have satisfied all requirements and upon successful completion of your preliminary inspection, an AMCO enforcement investigator will deliver your license. The investigator will date and initial your license on that day . The date your license is delivered is the "Effective date" and you may begin operating your license on that date.

Please carefully review the instructions on our website regarding your next steps to be credentialed, scheduling your inspection and ultimately receiving your license.
https://www.commerce.alaska.gov/web/portals/9/pub/MCB/OtherResources/MJPostApprovalInstructions.pdf

If you haven't yet attended a training session and passed the Metrc test, complete this step before requesting to be credentialed into the Metrc system.
You can sign up for training here: http://www.metrc.com/

If you have attended training and passed the Metrc test, your next step is to contact Metrc and request to be credentialed.
Please email Support@metrc.com or call Metrc Support line at 1-877-566-6506

You also need to make sure you have Marijuana Handler Permits for everyone in the facility that will be handling marijuana. You will be required to show the permits at inspection, so plan ahead.

Congratulations on receiving your approvals. Please contact our enforcement team at amco.enforcement@alaska.gov when you place your order for tags in Metrc so that the inspection can be scheduled within two weeks of the order. Please do not order labels or schedule the inspection until you are within two weeks of being fully ready to be inspected, including meeting all security requirements. Please do not labels before you have all required security measures in place.

Thank you
