Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Enlighten Extractions, LLC	**MJ License #:**	21552		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	ENLIGHTEN EXTRACTIONS, LLC				
Premises Address:	524 E 48th Ave, 1A				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99503

AMCO Received 11/5/2019

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All Shipments of marijuana and marijuana product that arrives at the facility will be first inspected by a licensee or designated employee before being accepted and entered as inventory The shipment contents will be reconciled with the transport manifest, shipment labels and packaging labels to ensure consistency All product will be weighed by Enlighten Extractions and reconciled with the weight listed on the manifest and labels Any shipments with discrepancies will be rejected Shipments that pass initial inspection will be accepted into the facility, immediately entered into METRC and added to the inventory log All marijuana and marijuana products will be tracked in METRC from intake into the facility, to its use in a manufactured product or disposal to its transfer to another licensed facility At the end of each business day, the Enlighten Extractions management team will reconcile each transfer to or from another licensed facility with METRC and the inventory on hand to ensure consistency and to resolve discrepancies immediately A random sample of each product manufactured at the facility will be sent to a licensed testing lab before being transferred to another licensed facility and the remainder of the production lot will be segregated from all other product until the testing results are received Once passing testing results are received from the testing lab, marijuana products will be packaged and labeled in compliance with AMCO Regulations The packaged products will then be transported by an agent of Enlighten Extractions who holds a valid marijuana handler permit or by a third party transport company with valid marijuana handler permits All transfers will be entered into METRC and a trip manifest will be set with each shipment as well as stored on site as a business record

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Enlighten Extractions will be using the following equipment, gases, chemicals and other compounds:

CO2 extractor machine; closed loop rotary evaporator, vacuum ovens; freezer; centrifuge; grinder; chillers, short path distillation equipment, water bath, ultra sonic cleaner, closed loop hydrocarbon extractor designed for Butane and other hydrocarbon solvents (Butane, N-Butane, & Iso-Butane), or propane; recovery pump, solvent recovery tank, solvent scale, heated water circulator and chiller; vacuum pumps; Bubble Magic washing machine (or comparable); homogenizers, certified scales; heat press; rosin press, ultra sonic homogenizer (Nano Tech), Bottle Machine, nano-emulsifier and cryo-freezer

AMCO Received 11/5/2019

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Enlighten Extractions anticipates the following marijuana plant and product waste at the manufacturing facility; (1) contaminated or infected marijuana or marijuana products (2) marijuana or marijuana products deemed by the licensee or a manager as unfit for sale or consumption for any reason (3) marijuana product that fails testing (4) marijuana plant waste created during the extraction process (5) marijuana or marijuana product that becomes expired (6) other marijuana or marijuana product waste as determined by the MCB or director. Once marijuana or marijuana product is deemed as waste, it will be separated from all other marijuana and marijuana products and securely stored in locked bins on the licensed premises and an email notification will be sent to AMCO Enforcement at least 3 days prior to rendering the waste unusable as well as recording the waste in METRC. All solid marijuana plant waste (plant matter waste from the extraction process such as plant matter that is pressed/squeezed to extract oil) and marijuana product waste will be ground in a grinder and then mixed with other solid compostable waste such as; food waste, yard waste, vegetable based grease/oils, or non-compostable waste such as paper waste, plastic waste, cardboard waste, and soil until the mixture is no more than 50% marijuana waste. Liquid marijuana waste such as concentrates will be mixed with at least equal parts of non-marijuana waste and then stored away from all other marijuana and marijuana products in locked containers on the premises, inside the facility in the locked waste container then transferred to the outdoors locked container once rendered unusable. The waste will then be picked up by the local waste truck and taken to the landfill. The logged information will be available to AMCO at any time upon request, and securely stored.

AMCO Received 11/5/2019

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☒

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

A designated Enlighten Extractions employee will be responsible for collecting a random sample from each production lot to be sent to a licensed testing facility. The designated employee will sign a statement certifying that the sample was randomly selected. A copy of the signed statement will accompany the sample to the testing facility and another copy will be filed on-site as a business record. The sample will be transported to the testing facility by a Enlighten Extractions agent who holds a valid marijuana handler permit or by a third party transport company who has valid marijuana handler permits. The remainder of the production lot will be segregated from all other marijuana and marijuana products in secure containers until the testing results are received. During the quarantine period, all product will be securely stored on-site and then Enlighten Extractions will ensure the products are kept cool and dry to prevent contamination or loss of efficacy. A copy of the testing facility results will be stored in the office on-site as an official business record and will be made available to AMCO upon request.

AMCO Received 11/5/2019

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;** [JS]

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or** [JS]

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.** [JS]

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bear Bites		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	2 mo. fridge, 9 mo. frozen
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Chocolate fudge. Shape will be rectangular, no animal or cartoon shapes. Fudge will have a firm and creamy consistency with a smooth texture. Fudge will appear brown.
Ingredients:	Heavy cream, sugar, cacao powder, brown rice syrup, salt, natural flavors (please reference supplemental page for proposed flavors; the particular flavor will be on the finished product label), natural coloring (vegetable extracts), lecithin, cannabis concentrate (shall be either; canna butter, canna coconut oil, canna liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce). Actual cannabis concentrate used will be clearly named on the finished product label.
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be heated and blended. The cannabis concentrate will be mixed in until homogeneous. The resulting mix will be poured into uniform molds in proper proportions to assure accurate potency, then set to cool. The final product, Bear Bites, will be packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/30/2019

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bear Bites
Product Type:	Edible

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Bear Bites will be individually wrapped in foil or parchment paper and then packaged in either child resistant (CR) heat-sealed mylar bags, CR metal tins, or CR cardboard drams. Serving potency will be clearly identified on the label. The product will contain either 2.5 or 5 milligrams of THC per serving and be packaged in batches containing not more than 50mg of THC per package. serving potency clearly indicated on label. Packages will contain no more than 50 mg THC total. Each Bear Bite is approximately 1" L x 0.5" W x 0.5" H.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bliss		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Month
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	A heavy cream. Bliss is a thick creamy liquid that will take the shape of the packaging. Product color will vary based on natural flavors used. (See attached supplemental page for flavor/color list).
Ingredients:	Heavy cream, milk, sugar, natural flavors (please reference supplemental page for proposed flavors), natural coloring (vegetable extracts), canna-liquid ((water, cannabis concentrate (cannabis concentrate used in the production of canna-liquid shall be either; canna butter, canna coconut oil, shatter, distillate, crumble, budder, kief, tincture, or sauce), food grade emulsifiers)). Flavor and cannabis concentrate used in production will be clearly indicated on the finished product label.
Standard Production Procedure and Detailed Manufacturing Process:	Cream, milk, sweetener, and flavoring will be mixed together, put through a pasteurization process until homogeneous and then filled into package containers. The in-house cannabis concentrate will be added in regimented portions to assure accurate dosage. The final product, Bliss, will then be sealed, packaged, and placed into storage until prepared for testing and shipping.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Budder		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Ranging from yellow, gold, and brown. Free form shape. Smooth and creamy texture.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of permitted solvents (hydrocarbons, Co2) The solution is purged with the use of a vacuum oven and/or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Budder, is then properly packaged and stored until testing and sale. Solvent used will be indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Budder
Product Type:	Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Up to seven (7) grams of budder will be placed into small glass, plastic, or silicone containers and then packaged into resealable, child resistant (CR) mylar bags, a cardboard box with a tamper seal, or a CR cardboard box. The actual amount of total THC will be listed on the label per testing results.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Canna-liquid		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Concentrate		

Product Description: Details must include the color, shape, and texture.	Water compatible cannabis oil. The color will range from clear to light yellow/greenish, and can be sightly viscous in nature. Product will have a liquid texture. Tincture will be used as an in-house or wholesale product.
Ingredients:	Water, emulsifier (e.g. lecithin, vegetable oil), and cannabis concentrate (shatter, distillate, crumble, kief, tincture, or sauce). Actual cannabis concentrate used will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Water, cannabis concentrate, and emulsifier will be mixed together using an ultrasonic device to create a homogeneous nano-emulsion liquid. The concentrated liquid will then be diluted with water to certain concentrations depending on the requirements of our in-house manufactured products. Product will be packaged and stored prior to testing and shipment/use.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	*photograph depicts color variations and does not reflect packaging

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Canna-liquid
Product Type:	Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	The Canna-liquid will be stored in clean, sanitized, and sealed containers. The total volume and weight of the product will vary with each batch. Each batch will be stored in separate containers and each batch will be entered in METRC as a separate package. Each batch will be tested by an independent lab to determine the percentage of THC and other test parameters. Each container will be marked with the name of the product, METRC package number, date, test lab, lab license number, strain and test results. After acceptable test results are obtained, it may be infused into edible products. All Canna-liquid will be used inside our facility to produce our products or to be sold wholesale with the intent to be used in other facilities' products.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Chocolate Chip Cookies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	2 mo. fridge, 6 mo. frozen
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Tan color cookie with brown chocolate chips. Circular shape, no animal or cartoon shapes. Chewy consistency and a moist, spongy texture.
Ingredients:	Flour, baking powder, baking soda, salt, butter, sugar, brown sugar, eggs, vanilla extract, chocolate chips, vegetable glycerin, cannabis concentrate (canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce). Particular cannabis concentrate will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Mix cannabis concentrate with ingredients according to recipe. Ingredients will be blended together until homogeneous, then scooped in proper proportions to assure accurate dosing. The cookies will be baked and set to cool. The final product, Chocolate Chip Cookies, will be packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Up to seven (7) grams of crumble will be placed into small glass, plastic, or silicone containers and then packaged into resealable, child resistant mylar bags, a cardboard box with a tamper seal, or a child resistant cardboard box. The actual amount of total THC will be listed on the label per testing results.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Crumble

Standard Production Procedure and Detailed Manufacturing Process: hydrocarbons

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of hydrocarbons. The solution is purged with the use of either a vacuum oven or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Crumble, is then properly packaged and stored until testing and sale. Enlighten Extractions will clearly identify on the final product label the type of solvent used in the extraction process.

Standard Production Procedure and Detailed Manufacturing Process: Co2

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Co2. The solution is purged with the use of either a vacuum oven or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Crumble, is then properly packaged and stored until testing and sale. Enlighten Extractions will clearly identify on the final product label the type of solvent used in the extraction process.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Delight		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	A flavored milk, Delight is a liquid that will take the shape of the bottle. Color will vary based on natural flavors added (see attached supplemental list for all proposed color/flavor variations).
Ingredients:	Almond Milk/Coconut Milk/Milk/Oat Milk (flavor depending), sugar, brown rice syrup/maple syrup (flavor depending), natural flavors (flavor depending), food coloring (flavor depending), cacao powder (flavor depending), canna-liquid (water, cannabis concentrate, and food grade emulsifiers). See attached supplemental list for all proposed flavor variations. Flavor and cannabis concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Milk base (oat, almond, coconut, or regular milk based on flavor), sweetener, and flavoring will be mixed together, put through a pasteurization process and then filled into package containers. Then the in-house cannabis concentrate will be added to the containers in regimented portions to assure accurate dosage. Product will be stirred until homogeneous. The final product, Delight, will then be sealed, packaged, and placed into storage until prepared for testing and shipping.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Distillate Oil

Standard Production Procedure and Detailed Manufacturing Process: hydrocarbons

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of hydrocarbons. The solution is purged with the use of either a vacuum oven or roto-evaporator under specified conditions to achieve desired consistency. Crude extract will be further purified through the process of distillation, resulting in distillate oil. The Distillate is then properly packaged and stored until testing for use or sale.

Standard Production Procedure and Detailed Manufacturing Process: Co2

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Co2. The resulting solution will be diluted in food grade ethanol for winterization or filtration. The filtered solution is then purged with the use of a roto-evaporator. The resulting crude oil will be further purified through the process of distillation, resulting in distillate oil. The distillate is then properly packaged and stored for sale.

Standard Production and Detailed Manufacturing Process: Ethanol

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of ethanol. The solution will be put through a series of filtration steps such as winterization to purify extract. The solution is purged with the use of a roto-evaporator. The resulting crude oil will be further purified through the process of distillation, resulting in distillate oil. The distillate is then properly packaged and stored for sale.

Distillate Cartridge

Standard Production Procedure and Detailed Manufacturing Process: hydrocarbons

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of hydrocarbons. The solution is purged with the use of either a vacuum oven or roto-evaporator under specified conditions to achieve desired consistency. Crude extract will be further purified through the process of distillation, resulting in distillate oil. Natural terpenes will be added as needed. The concentrated oil is then properly packaged in empty cartridges and stored until testing and sale.

Standard Production Procedure and Detailed Manufacturing Process: Co2

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Co2. The resulting solution will be diluted in food grade ethanol for winterization or filtration. The filtered solution is then purged with the use of a roto-evaporator. The resulting crude oil will be further purified through the process of distillation, resulting in distillate oil. Natural terpenes will be added as needed. The distillate is then properly packaged in cartridges and stored for sale.

Standard Production Procedure and Detailed Manufacturing Process: Ethanol

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of ethanol. The solution will be put through a series of filtration steps such as winterization to purify extract. The solution is purged with the use of a roto-evaporator. The resulting crude oil will be further purified through the process of distillation, resulting in distillate oil. Natural terpenes will be added as needed. The distillate is then properly packaged in cartridges and and stored for sale.

Product Name:	Dry Sift		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Ranging from white to yellow, gold, or brown. Small, round shaped sand and grainy like texture.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Dry Sift is created naturally when it falls off from plant matter. Loose, dry buds and trim will be very gently sifted using only fine screens. Dry Sift will be collected into a container as a result. The resulting product is considered higher grade due to a more refined sifting process. The final product, Dry sift, will be properly packaged and stored until testing and sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Enlighten Caps		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	1 Year
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Capsules will be clear, amber, or yellow and containing cannabis infused Medium-Chain Triglyceride (MCT) oil, gelatin, or olive oil. Liquid has a slightly oily texture.
Ingredients:	Gelatin, MCT oil, or olive oil, lecithin, vegetable glycerin, cannabis concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce).
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate will be added to a warm beaker of MCT oil, gelatin, or vegetable glycerin and the mixture will be emulsified until desired potency is achieved and is homogeneous. The mixture will then be used to fill food grade capsules. The final product, Enlighten Caps, will be properly packaged, stored, tested, and sold.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Enlighten Gummies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Gelatin-based chewable sweet. Product will have a circular or square shape, no animal or cartoon shapes. The gummies will have a tender, but chewy texture and will be coated in a fine sugar/starch to prevent sticking. Product color will vary based on natural flavors used (e.g. Blue = Bluberry, Pink = Strawberry).
Ingredients:	Sugar, water, glucose syrup/light corn/tapioca syrup (flavor depending), gelatin, fruit pectin, citric acid, natural flavors (see attached supplemental page for all proposed flavors/colors), food coloring, cannabis concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce). Actual cannabis concentrate used will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be heated and blended to make gummy mixture. Then in-house cannabis concentrate will be mixed in until homogeneous. The resulting mix will be poured into uniform molds in proper proportions to assure accurate potency, then set to cool. The final product, Enlighten Gummies, will be packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/23/2019

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Enlighten Gummies
Product Type:	Edible

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Gummies will be packaged in either child resistant (CR), heat-sealed mylar bags, CR metal tins or CR cardboard drams. The product will contain 1, 3 or 5 milligrams of THC per serving and and be packaged in batches of 2, 5, 10, 15, 25, or 50 gummies per package, with no more than 50mg THC total per package. Serving potency will be clearly indicated on the label. Packages will contain no more than 50 mg THC total.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Enlighten Mist		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Enlighten Mist is an oral spray, slightly golden in color with a smooth, oily texture.
Ingredients:	MCT (medium-chain triglyceride) oil, natural flavors (various flavor extracts, e.g. mint, cinnamon), cannabis concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce). See attached supplemental page for proposed flavor variations. Actual flavor and cannabis concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate and natural flavoring will be added to MCT oil to achieve a ratio of THC no more than 50mg per package and will be mixed until homogenized. The mixture will be loaded into 5ml bottles. The final product, Enlighten Mist, will be packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Grizzly Chews		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 mo fridge, 1yr Frozen
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Caramels that will be square or rectangular in shape; no animal or cartoon shapes. Caramel will have a firm and chewy consistency with a smooth texture. Brown to Tan in color.
Ingredients:	Heavy Cream or Coconut milk (flavor depending), Sugar, maple syrup, brown rice syrup, butter or coconut cream (flavor depending), salt, vanilla extract, cacao powder (flavor depending), natural flavors (flavor depending), cannabis concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce). Actual Cannabis concentrate will be indicated on final product label. See attached supplemental page for list of proposed flavors.
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be heated and blended to make caramel mixture. Then cannabis concentrate will be mixed in until homogeneous. The mixture will be poured into uniform molds in proper proportions to assure accurate potency, then set to cool. The final product, Grizzly Chews, will be packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/23/2019

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Grizzly Chews
Product Type:	Edible

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Grizzly chews will be individually wrapped in plastic or parchment paper and then packaged in either child resistant (CR), heat-sealed mylar bags, CR metal tins or CR cardboard drams. The product will contain 1, 3 or 5 milligrams of THC per serving and be packaged in batches of 2, 5 10 15 25 or 50 gummies per package with serving potency clearly indicated on label. Packages will contain no more than 50 mg THC total.
Each caramel is approximately 1" L x 0.5" W x 0.5" H.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Product Name:	HTFSE		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokeable		

Product Description: Details must include the color, shape, and texture.	HTFSE is an acronym for High Terpene Full Spectrum Extract. The product is a fluid liquid that form fits to container and is slightly viscous and sticky. The color will range between yellow, gold, and clear. HTFSE will be used as an in-house or wholesale product.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Hydrocarbon solvent. The residual solvent in the solution are then purged below regulated ranges (3 AAC 306.645) using specified pressures and temperatures with the use of pressure vessels and a vacuum oven to achieve the desired consistency and appearance of Sauce (a proposed Enlighten Extractions product). The liquid portion of Sauce, which is the final product, will be separated from the crystalline solid portion. The final liquid-like product, HTFSE, is then properly packaged and stored until testing and use.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Live Resin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Ranging from clear, yellow, gold, and brown. Free form shape. Gooey, liquidy, shiny, creamy or smooth in texture. Crystalline structures commonly form giving a chunkier consistency.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	To create Live Resin, fresh cannabis flower/trim is frozen immediately after harvest and processed at low temperatures to preserve the maximum amount of terpenes and natural cannabinoids. Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of permitted solvents (hydrocarbons, Co2) The solution is purged with the use of a vacuum oven and/or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Live Resin, is then properly packaged and stored until testing and sale. See additional production procedures.

Live Resin

Standard Production Procedure and Detailed Manufacturing Process: hydrocarbons

To create Live Resin, fresh cannabis flower/trim is frozen immediately after harvest and processed at low temperatures to preserve the maximum amount of terpenes and natural cannabinoids. Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of hydrocarbons. The solution is purged with either the use of a vacuum oven or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Live Resin, is then properly packaged and stored until testing and sale.

Standard Production Procedure and Detailed Manufacturing Process: Co2

To create Live Resin, fresh cannabis flower/trim is frozen immediately after harvest and processed at low temperatures to preserve the maximum amount of terpenes and natural cannabinoids. Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Co2. The solution is purged with either the use of a vacuum oven or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Live Resin, is then properly packaged and stored until testing and sale.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Nectar		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	A lemonade, Nectar is a liquid that will take the shape of the packaging. Color will vary based on natural flavors added (see attached supplemental page for all proposed flavors/colors)
Ingredients:	Water, sugar, lemons/strawberries/blueberries/raspberries/limes etc (flavor depending), natural flavors or juice (essential oil or flavor extract depending on flavor, food coloring (if needed), canna-liquid (water, cannabis concentrate, and food grade emulsifiers). See attached supplemental page for all proposed flavors. **Actual Flavor and cannabis concentrate used will be clearly indicated on the final product label.**
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be mixed together, **put through a pasteurization process** and then filled into package containers. Then the in-house cannabis concentrate will be added in regimented portions to assure accurate dosage. The final product, Nectar, will then be sealed, packaged, and placed into storage until prepared for testing and shipping. **Flavor and cannabis concentrate used in production will be clearly indicated on the finished product label.**
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/23/2019

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Nectar
Product Type:	Edible

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Nectar will be bottled in 12 fl. oz bottles with serving sizes of 5mg THC with options of 2, 5 or 10 servings per package. Serving potency will be clearly marked on the label. Each serving size will be either 1.2 fl.oz, 2.4 fl.oz, or 6 fl.oz of beverage respectively and be clearly indicated with lines of demarcation on the label. There will be no more than 50 mg of THC total in any full bottle. The bottle will have a child resistant cap.

* or similar. Lines of demarcation are for sample only, not an actual serving size

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Peanut Butter Pops		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Chocolate covered peanut butter balls that are shaped like small, round spheroids. Dark brown coating with lighter brown filling. Brittle "snap like" chocolate coating filled with a creamy smooth peanut butter center.
Ingredients:	Chocolate: (cacao powder, cacao butter, milk powder (flavor depending), sugar, salt), Filling: Cane Sugar, peanut better, maple syrup, vanilla extract, cannabis concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce). Will be either Dark Chocolate or Milk Chocolate. Cannabis concentrate used will be on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Mix cannabis concentrate with peanut butter filling ingredients to create infused peanut butter filling mix. The mix will then be weighed to assure appropriate dosage. Chocolate ingredients will be melted together and tempered. The peanut butter balls will be dipped in chocolate and left to set. The final product, Peanut Butter Pops, will be properly packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Shatter

Standard Production Procedure and Detailed Manufacturing Process: hydrocarbons

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of hydrocarbons. The solution is purged with the use of either vacuum oven or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Shatter, is then properly packaged and stored until testing and sale. Actual solvent used will be clearly indicated on the final product label.

Standard Production Procedure and Detailed Manufacturing Process: Co2

Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Co2. The solution is purged with the use of either vacuum oven or roto-evaporator under specified conditions to remove all residual solvents below the regulated ranges (3 AAC 306.645) to achieve desired consistency. The final product, Shatter, is then properly packaged and stored until testing and sale. Actual solvent used will be clearly indicated on the final product label.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Soft Chews		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Soft chewable sweet. Product will have a circular or square shape, no animal or cartoon shapes. Various colors and flavors (e.g. red/cherry, yellow/pineapple, green/lime, blue/blueberry). The gummies will have a tender, but chewy texture and will be coated in a fine sugar/starch to prevent sticking.
Ingredients:	Gelatin, Water, glucose syrup/corn syrup/brown rice syrup (flavor depending), sugar,shortening, soy lecithin, powdered sugar, Natural Flavors [please reference supplemental page for proposed flavors], food coloring (vegetable extracts), Gum arabic, Citric acid, Cannabis Concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce) Actual Cannabis Concentrate used will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Ingredients will be heated and blended to make candy mixture. Then in-house cannabis concentrate will be mixed in until homogeneous. The resulting mix will be poured into uniform molds in proper proportions to assure accurate potency, then set to cool. The final product, Soft Chews, will be packaged and placed into storage until prepared for testing and shipment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

AMCO Received 12/30/2019

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Soft Chews
Product Type:	Edible

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Soft Chews will be packaged in either child resistant (CR), heat-sealed mylar bags, CR metal tins or CR cardboard drams. Serving potency will be clearly identified on the label.

1 serving = 1 soft chew (1, 3,or 5mg THC) packaged in either 2, 5 10, 15, 25 or 50 Soft Chews per package, with no more than 50 mg THC total per package. One Soft Chew is approximately 0.5" L x 0.25" W x 0.25" H.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Cannabis infused sugar. Product is an off-white crystalline powder with a fine, granular texture.
Ingredients:	Sugar, cinnamon (flavor depending), natural flavors (flavor depending), cannabis flower or cannabis concentrate (shall either be shatter, distillate, crumble, budder, kief, tincture, or sauce). Actual Flavor and Cannabis Concentrate used will be clearly indicated on final product label. See attached supplemental page for list of proposed flavors.
Standard Production Procedure and Detailed Manufacturing Process:	Sugar and decarboxylated cannabis concentrate will be diluted in food grade ethanol and mixed until homogenous. Mixture will then be heated to removed ethanol. The resulting infused sugar will then be milled with natural flavors, tested, then packaged per desired potency. The final product, Symple Shooga, will be properly stored and shipped.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Symple Shooga
Product Type:	Edible

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Simple Shooga will be individually wrapped in small packets and then packaged in either child resistant (CR) metal tins or CR cardboard drams. Another packaging option is to package product into CR packets and then place packets inside a box. Serving potency will be clearly identified on the label. 1 serving = 1 shooga packet. The product will contain 1, 3 or 5 milligrams of THC per serving and be packaged in batches of 2, 5, or 10 with serving potency clearly indicated on label. Packages will contain no more than 50 mg THC total. Each packet will be approximately 1" L x 2" W.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Symple Syrup		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	2 years
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	A sugar syrup, Symple Syrup is a slightly viscous and sticky liquid that will take the shape of the packaging. Color will vary based on natural flavors added (e.g. Blue = Blueberry, Green = Kiwi)
Ingredients:	Sugar, brown rice syrup, agave nectar, water, natural flavors, food coloring, citric acid, canna-liquid (water, cannabis concentrate, food grade emulsifiers). See attached supplemental page for list of proposed flavors. **Actual flavor and cannabis concentrate used will be clearly indicated on the final product label.**
Standard Production Procedure and Detailed Manufacturing Process:	Flavored sugar syrup ingredients will be mixed together with canna-liquid to create infused flavored syrup. Then the product will be filled into package containers. The in-house cannabis concentrate will be added in regimented portions to assure accurate dosage. The final product, Symple Syrup, will then be sealed, packaged, and placed into storage until prepared for testing and shipping.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	***photograph depicts color variations and does not reflect packaging**

Product Name:	Terp Darts		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	HTFSE (a proposed Enlighten Extractions product) oil-filled glass tankard with a color ranging from clear to light yellow to dark amber. Oil is usually viscous in nature. Free form shape that fits to container.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate will be extracted from flower or trim using a closed-loop machine with the use of Hydrocarbon solvent. The residual solvent in the solution are then purged below regulated ranges (3 AAC 306.645) using specified pressures and temperatures with the use of pressure vessels and a vacuum oven to achieve the desired consistency and appearance of Sauce (a proposed Enlighten Extractions product). The liquid portion of Sauce, which is the final product, will be separated from the crystalline solid portion. The final liquid-like concentrate will be packaged in glass syringes to create the final product, Terp Dart, is then properly packaged and stored until testing and use.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Tonic		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	2 years
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Tonic is a golden amber to clear tincture with a water like consistency.
Ingredients:	Food-grade ethanol, cannabis flower or trim, cannabis concentrate (shall either be canna butter, canna coconut oil, canna-liquid, shatter, distillate, crumble, budder, kief, tincture, or sauce), (essential oil/ flavor extract depending on flavor, e.g. hazelnut, almond, cinnamon) Actual flavor and Cannabis Concentrate used will be clearly indicated on the final product label. See attached supplemental page for list of proposed flavors.
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis flower/trim or concentrate is heated for decarboxylation. The cannabis is steeped (like tea) in the alcohol to extract active compounds. If mixing tincture using flower or trim, the plant matter is removed. Tincture made with cannabis concentrate will be mixed until homogeneous. The final product, Tonic, will be properly packaged and stored before testing and sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
