Alaska Marijuana Handler Permit Education

Recreational Marijuana Regulations 3AAC 306

Marijuana product manufacturing facility license required

Time Remaining: 3 seconds

A person may not extract marijuana concentrate for sale or formulate or manufacture any marijuana product for sale unless that person has obtained a marijuana product manufacturing facility license from the board in compliance with this chapter, or is an employee or agent acting for a licensed marijuana product manufacturing facility.

The board will issue a standard marijuana product manufacturing facility license; and a marijuana concentrate manufacturing facility license.

A person seeking any type of marijuana product manufacturing facility license must submit an application for a marijuana product manufacturing facility license on a form the board prescribes, including the information set out under 3 AAC 306.020 and 3 AAC 306.520; and demonstrate to the board's satisfaction that the applicant will operate in compliance with:

- each applicable provision of 3 AAC 306.500 - 3 AAC 306.570 and 3 AAC 306.700 - 3 AAC 306.755; and
- each applicable public health, fire, safety, and tax code and ordinance of the state and the local government in which the applicant's proposed licensed premises are located.

A licensee of a marijuana product manufacturing facility, or an employee or agent of a marijuana product manufacturing facility, may not have an ownership interest in or a direct or indirect financial interest in a licensed marijuana testing facility.

Marijuana product manufacturing facility privileges

Time Remaining: 3 seconds

Except as provided in 3 AAC 306.515, a licensed marijuana product manufacturing facility, including a marijuana concentrate manufacturing facility, is authorized to:

- purchase marijuana from a marijuana cultivation facility or from another marijuana product manufacturing facility
- extract marijuana concentrate in compliance with 3 AAC 306.555
- manufacture, refine, process, cook, package, label, and store marijuana products approved under 3 AAC 306.525, including (A) marijuana concentrate; or (B) any product intended for consumption or use on the body that is comprised of marijuana and other ingredients, including edible products, ointments, salves, patches, or tinctures
- sell, distribute, or deliver marijuana extract or any marijuana product only to a licensed retail marijuana store or to another licensed marijuana product manufacturing facility
- provide and transport samples of marijuana concentrate or other marijuana product to a licensed marijuana testing facility for testing.
- provide a sample of marijuana concentrate or a marijuana product approved under 3 AAC 306.525 to a licensed retail marijuana store for the purpose of negotiating a sale
- store inventory in a restricted access area on the licensed premises as provided in 3 AAC 306.535
- transport marijuana in compliance with 3 AAC 306.750
- conduct in-house testing for the marijuana product manufacturing facility's own use

Alaska Marijuana Handler Permit Education

Recreational Marijuana Regulations 3AAC 306

Acts prohibited at marijuana product manufacturing facility

Time Remaining: 4 seconds

A licensed marijuana product manufacturing facility, including a licensed marijuana concentrate manufacturing facility, may not:

- sell, deliver, distribute, or transfer marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation;
- sell marijuana, marijuana concentrate, or a marijuana product that is not manufactured, packaged, and labeled in compliance with 3 AAC 306.500 - 3 AAC 306.570;
- allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on the licensed premises;
- manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.

A licensed marijuana product manufacturing facility may not accept any marijuana from a marijuana cultivation facility or another marijuana product manufacturing facility unless all marijuana in the shipment is properly identified with a label generated in the marijuana inventory tracking system of the facility that provided the marijuana and a valid transport manifest showing the source and destination of the marijuana is attached to the shipment.

In this section, "closely resemble" or "look like" means the product or its packaging has a shape, color, markings, or decorative patterns that are familiar to the public from a widely distributed branded food product, so that the marijuana product could reasonably be mistaken for that branded product, especially by children.

Application for marijuana product manufacturing facility license

Time Remaining: 0 seconds

An applicant for a marijuana product manufacturing facility license, including a marijuana concentrate manufacturing facility license, must file an application on a form the board prescribes, and provide the following information:

- a copy of a food safety permit (if required under 18 AAC 31.020) from the Department of Environmental Conservation or a municipality with authority delegated under AS 17.20.072 and 18 AAC 31.945
- a diagram of the proposed licensed premises identifying the area where in-house testing, if any, will occur; and marijuana and any marijuana product, including marijuana concentrate, will be stored
- in the applicant's operating plan required under 3 AAC 306.020(c), a description of:
  - the equipment and solvents, gases, chemicals, and other compounds used to create concentrates and the processes to be used;
  - each marijuana product the applicant intends to process at this location; the product description must include the color, shape, texture, ingredients and standard
  - production procedure to be used and the additional information required for product approval in 3 AAC 306.525
  - the packaging to be used for each type of product
  - sample labels showing how the labeling information required in 3 AAC 306.570 will be set out
  - the applicant's plan for disposal of waste

Marijuana inventory tracking system

Time Remaining: 3 seconds

A marijuana product manufacturing facility shall use a marijuana inventory tracking system to ensure that the marijuana product manufacturing facility identifies and tracks any marijuana or marijuana product from the time the marijuana or marijuana product is received, through:

- use of the marijuana or marijuana product in manufacturing any other marijuana product;
- sale or transfer of the marijuana or marijuana product originally received, or any marijuana product manufactured at that marijuana product manufacturing facility to another licensed marijuana establishment; and
- disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment.

When marijuana from a marijuana cultivation facility or a marijuana product from another marijuana product manufacturing facility is delivered or transported to the licensed premises of a marijuana product manufacturing facility, the marijuana product manufacturing facility shall immediately enter tracking information for that marijuana or marijuana product into the marijuana inventory tracking system.

A marijuana product manufacturing facility may not accept any marijuana or marijuana product that does not have a valid transport manifest generated from the marijuana inventory tracking system of the licensed marijuana establishment that supplies the marijuana or marijuana product.

A marijuana product manufacturing facility shall track any received marijuana or marijuana product to its use in a marijuana product, and shall reconcile each transaction to the marijuana product manufacturing facility's marijuana inventory tracking system at the close of business each day.

A marijuana product manufacturing facility shall account for any variance in the quantity of marijuana or marijuana product the facility received, and the quantity the facility sold, transferred, or disposed of.

Required laboratory testing

Time Remaining: 4 seconds

A marijuana product manufacturing facility shall provide a sample of each marijuana product manufactured at the facility to a licensed marijuana testing facility, and may not sell or transport a marijuana product until all laboratory testing has been completed.

To comply with this, a marijuana product manufacturing facility shall collect a random sample for testing by selecting a product from each production lot, in an amount required by the marijuana testing facility, designate an individual responsible for collecting each sample who must:

- prepare a signed statement showing that each sample has been randomly selected for testing;
- provide the signed statement to the marijuana testing facility; and
- maintain a copy as a business record under 3 AAC 306.755; and
- transport the sample to the marijuana testing facility in compliance with 3 AAC 306.750.

After collecting and transporting a sample for testing, a marijuana product manufacturing facility shall segregate the entire production lot from which the testing sample was selected until the marijuana testing facility reports the results from its tests.

During this period of segregation, the marijuana product manufacturing facility that provided the sample shall maintain the production lot in a secure, cool, and dry location to prevent the marijuana product from becoming contaminated or losing its efficacy.

The marijuana product manufacturing facility may not sell or transport any marijuana product from the segregated lot until the marijuana testing facility has completed its testing and analysis and provided those results, in writing, to the marijuana product manufacturing facility that provided the sample.

The marijuana product manufacturing facility shall maintain the testing results as part of its business records.

Production of marijuana concentrate

Time Remaining: 0 seconds

Before producing marijuana concentrate for sale, a marijuana product manufacturing facility shall develop standard operating procedures, good manufacturing practices, a safety plan, and a training plan for each individual employed in an extraction process.

A marijuana product manufacturing facility may create marijuana concentrates only as follows:

- water-based marijuana concentrate may be produced by extracting cannabinoids from marijuana by using only water, ice, or dry ice;
- food-based marijuana concentrate may be produced by extracting cannabinoids from marijuana through the use of propylene glycol, glycerin, butter, olive oil, or other typical cooking fats; infused dairy butter, oils, or fats derived from natural sources may be used to prepare infused edible products; infused dairy butter, oils, or fats may not be prepared as stand-alone edible products for sale;
- solvent-based marijuana concentrate may be produced using the hydrocarbons N-butane, isobutane, propane, or heptane or other solvents or gases the board approves that exhibit low to minimal potential human health-related toxicity; approved solvents must be of at least 99 percent purity and must be used in a professional grade closed-loop extraction system designed to recover the solvents; in an environment with proper ventilation; and with control of all sources of ignition if a flammable atmosphere is or may be present.

A marijuana product manufacturing facility using a professional grade closed-loop gas extraction system shall ensure that:

- each vessel is used in compliance with the manufacturer's stated pressure ratings
- any carbon dioxide used is of at least 99 percent purity
- a person using a solvent or gas to extract marijuana concentrate in the closed-loop system is fully trained on how to use the system, has direct access to applicable material safety data sheets, and handles and stores the solvent and gas safely
- a licensed engineer has certified that the professional grade closed-loop system was commercially manufactured, is safe for its intended use, and is built to codes of recognized and generally accepted engineering practices
- any professional grade closed-loop system, and other equipment and facilities used in the extraction process are approved for their use by the local fire code official and meet any applicable fire, safety, and building code requirements

A marijuana product manufacturing facility may use heat, screens, presses, steam distillation, ice water, and other methods without employing solvents or gases to create:

- kief
- hashish
- bubble hash
- infused dairy butter, oils, or fats derived from natural sources
- other extracts

A marijuana product manufacturing facility may use food-grade glycerin, ethanol, and propylene glycol solvents to create extracts. All ethanol must be removed from the extract in a manner to recapture the solvent and ensure that it is not vented into the atmosphere.

Packaging of marijuana products

Time Remaining: 0 seconds

A container or packaging for any edible marijuana product produced by a marijuana product manufacturing facility may not have any printed images, including cartoon characters, that specifically target individuals under 21 years of age.

In addition, the packaging must:

- protect the product from contamination and may not impart any toxic or damaging substance to the product
- if the marijuana product contains multiple servings, be designed so that the marijuana product itself has markings or demarcations clearly delineating each serving of the product; for liquid marijuana products with multiple servings, the packaging must indicate the number and size of individual servings

A licensed marijuana product manufacturing facility may transfer marijuana products that are not edible marijuana products to another licensed marijuana product manufacturing facility in wholesale packages not to exceed five pounds.

Each packaged marijuana product must be identified by a tracking label generated by the marijuana product manufacturing facility's marijuana inventory tracking system.

A licensed marijuana product manufacturing facility shall prepare marijuana products for transfer to another marijuana establishment by:

- placing marijuana products within a sealed, tamper-evident shipping container
- affixing a label that complies with 3 AAC 306.570(d) to the shipping container
- generating a transport manifest from the marijuana product manufacturing facility's marijuana inventory tracking system; the transport manifest must remain with the marijuana products at all times while being transported, and a copy must be given to the licensed marijuana establishment that receives the shipment

Labeling of marijuana products

Time Remaining: 0 seconds

With each production lot of marijuana product sold, a marijuana product manufacturing facility shall disclose in writing the name of the licensed marijuana testing facility that performed any required test and the results of each required test.

A marijuana product may not be labeled as organic.

To each package of marijuana product sold to a retail marijuana store for resale to a consumer, a marijuana product manufacturing facility shall affix a label setting out:

- the name and license number of the marijuana product manufacturing facility where the marijuana product was prepared;
- the production lot number assigned to the product in the package;
- the net weight of the product in the package, (A) not including weight of packaging; and (B) using a standard of measure compatible with the marijuana product manufacturing facility's marijuana inventory tracking system; and
- each of the following statements:

"Marijuana has intoxicating effects and may be habit forming and addictive"

"Marijuana impairs concentration, coordination, and judgment. Do not operate a vehicle or machinery under its influence"

"There are health risks associated with consumption of marijuana"

"For use only by adults twenty-one and older. Keep out of the reach of children."

"Marijuana should not be used by women who are pregnant or breast feeding."

A marijuana product manufacturing facility transporting a marijuana product to a retail marijuana store shall affix a label to the shipping container showing that a licensed marijuana testing facility has tested each lot of marijuana product in the shipment and giving the test results, including:

- a cannabinoid potency profile expressed as a range of percentages that extends from the lowest percentage to highest percentage of concentration for each cannabinoid listed from every test conducted on that production lot from the same marijuana product manufacturing facility within the last three months
- a statement listing the results of microbial testing required under 3 AAC 306.645(b)(2)
- a statement listing the results of residual solvent testing required under 3 AAC 306.645(b)(3), if applicable
- a statement listing any contaminants for which the product was tested in addition to contaminants for which 3 AAC 306.645(b) requires testing; any additional tested contaminants include molds, mildew, and filth; herbicides, pesticides, and fungicides; and harmful chemicals

If a marijuana product manufacturing facility ships wholesale marijuana product from a production lot of marijuana product that has not been tested for each contaminant listed above, the label for that lot must include a statement identifying each contaminant listed above for which that lot has not been tested.

Recreational Marijuana Regulations 3AAC 306

Applicability

Time Remaining: 4 seconds

The following provisions in this section (3 AAC 306.600 - 3 AAC 306.675) apply to a person offering a service testing, analyzing, or certifying potency, moisture content, pesticide or solvent residue, mold, mildew, bacteria, or other contaminants in marijuana or a marijuana product to another person including a marijuana establishment or a member of the public, whether for compensation or not, as a independent or third-party testing facility.

These do not apply to a licensed marijuana establishment that controls marijuana testing equipment used solely for its own in-house testing of its own cultivated crop, of products produced or manufactured at its own facility, or of retail products placed or offered for sale in its retail marijuana store.
