Time Remaining: 0 seconds

A marijuana cultivation facility shall use a marijuana inventory tracking system in compliance with 3 AAC 306.730 to ensure all marijuana propagated, grown, or cultivated on the marijuana cultivation facility's premises is identified and tracked from the time the marijuana is propagated through transfer to another licensed marijuana establishment or destruction.

The marijuana cultivation facility shall assign a tracking number to each plant over eight inches tall.

When harvested, bud and flowers, clones or cuttings, or leaves and trim may be combined in harvest batches of distinct strains, not exceeding five pounds.

Each harvest batch must be given an inventory tracking number.

Clones or cuttings must be limited to 50 or fewer plants and identified by a batch tracking number.

A marijuana cultivation facility shall record each sale and transport of each batch in its marijuana inventory tracking system, and shall generate a valid transport manifest to accompany each transported batch.

A marijuana cultivation facility shall record in its marijuana inventory tracking system all marijuana used to provide a sample authorized under 3 AAC 306.460 for the purpose of negotiating sales, including:

- the amount of each sample;
- the retail marijuana store or marijuana product manufacturing facility that received the sample; and
- the disposal of any expired or outdated promotional sample returned to the marijuana cultivation facility.
