Recreational Marijuana Regulations 3AAC 306

Marijuana testing facility license required

Time Remaining: 0 seconds

A person may not offer or provide a marijuana testing service or test results unless the person has obtained a marijuana testing facility license from the board in compliance with this chapter, or is an employee or agent acting for a licensed marijuana testing facility.

A person seeking a marijuana testing facility license must:

- submit an application for a marijuana testing facility license on a form the board prescribes, including the information set out under 3 AAC 306.020 and 3 AAC 306.615; and;
- demonstrate to the board's satisfaction that the applicant:
  - will operate in compliance with each applicable provision of 3 AAC 306.600 - 3 AAC 306.675 and 3 AAC 306.700 - 3 AAC 06.755
  - will operate in compliance with each applicable public health, fire, safety, and tax code and ordinance of the state and the local government in which the applicant's proposed licensed premises are located
  - does not hold a marijuana establishment license in this state other than a marijuana testing facility license, or have a financial interest in common with a person who is a licensee of a marijuana establishment in this state other than a marijuana testing facility license
  - meets the board's standards for approval as set out in 3 AAC 306.620 - 3 AAC 306.625

A licensee of a marijuana testing facility, or an employee or agent of a licensed marijuana testing facility, may not have an ownership interest in or a direct or indirect financial interest in another licensed marijuana establishment.

Marijuana testing facilities: privileges and prohibitions

Time Remaining: 3 seconds

A licensed marijuana testing facility may have any amount of marijuana and marijuana products on its premises at any given time if the marijuana testing facility's marijuana inventory tracking system and other records document that all marijuana and marijuana products are on the premises only for the testing purposes described in 3 AAC 306.600 - 3 AAC 06.675.

A licensed marijuana testing facility may not:

- have a licensee, employee, or agent who holds a type of marijuana establishment license other than a marijuana testing facility license issued under this chapter
- sell, deliver, distribute, or transfer marijuana or a marijuana product to a consumer, with or without compensation
- allow a person to consume marijuana or a marijuana product on its licensed premises

Approval of testing facility

Time Remaining: 0 seconds

A person seeking a marijuana testing facility license must first obtain the approval of the board by showing competence to perform each test the licensee will offer as an independent third-party testing facility, including tests to identify:

- THC, THCA, CBD, CBDA and CBN potency
- harmful microbials including Escherichia coli (E. Coli) or salmonella
- residual solvents
- poisons or toxins
- harmful chemicals
- dangerous molds, mildew, or filth
- pesticides

In evaluating whether a person has shown competence in testing under this section, the board or the board's contractor may conduct an on-site inspection of the applicant's premises; require the applicant to demonstrate proficiency in testing; and examine compliance with any applicable requirement of 3 AAC 306.630 - 3 AAC 306.675, and 3 AAC 306.700 - 3 AAC 306.755, including:

- qualifications of personnel
- the standard operating procedure for each testing methodology the marijuana testing facility will use
- proficiency testing results
- quality control and quality assurance
- security
- chain of custody
- specimen retention
- space
- records
- reporting of results

RECEIVED
MAR 12 2018
ALCOHOL MARIJUANA CONTROL OFFICE
STATE OF ALASKA

The board will approve a marijuana testing facility license if, after the board or the board's contractor has examined the qualifications and procedures of the marijuana testing facility license applicant, the board finds them generally in compliance with good laboratory practices.

Nothing in AS 17.38 or this chapter constitutes a board guarantee that a licensed marijuana testing facility can or will protect the public from all potential hazards of marijuana including microbials, poisons or toxins, residual solvents, pesticides, or other contaminants.

Proficiency testing program

Time Remaining: 3 seconds

When an accredited proficiency testing program becomes available in the state, the board may require an applicant for a marijuana testing facility license to participate successfully in a proficiency testing program not earlier than 12 months before receiving a license.

The proficiency testing program must require an applicant for a marijuana testing facility license or a participating licensed marijuana testing facility to analyze test samples using the same procedures with the same number of replicate analyses, standards, testing analysts, and equipment that will be used for product testing.

Successful participation is the positive identification of 80 percent of the target analytes that the marijuana testing facility reports, and must include quantitative results when applicable. Any false positive results reported constitute an unsatisfactory score for the proficiency test.

Before renewing the license of a marijuana testing facility, the board may require the facility to participate in a proficiency testing program with documentation of continued performance satisfactory to the board. The license of a marijuana testing facility may be limited, suspended, or revoked if the facility fails to participate and receive a passing score in a proficiency testing program.

The scientific director employed under 3 AAC 306.630 and each testing analyst of an applicant for a marijuana testing facility license and a licensed marijuana testing facility that participated in a proficiency test shall sign a corresponding attestation statement. The scientific director shall review and evaluate each proficiency test result.

An applicant for a marijuana testing facility license, and a licensed marijuana testing facility participating in the proficiency testing program, shall take and document remedial action when the applicant or the facility meets the standards listed above, but scores less than 100 percent in a proficiency test.

To take and document remedial action, the marijuana testing facility's scientific director shall, at a minimum, review all samples tested and results reported after the date of the marijuana testing facility's last successful proficiency test.

Scientific Director

Time Remaining: 3 seconds

A marijuana testing facility shall employ a scientific director who must be responsible for:

- overseeing and directing the scientific methods of the laboratory within the marijuana testing facility;
- ensuring that the laboratory achieves and maintains quality standards of practice; and
- supervising all staff of the laboratory.

The scientific director of a marijuana testing facility must have:

- a doctorate degree in chemical or biological sciences from an accredited college or university and have at least two years of postdegree laboratory experience;
- a master's degree in chemical or biological sciences from an accredited college or university and have at least four years of postdegree laboratory experience; and
- a bachelor's degree in chemical or biological sciences from an accredited college or university and have at least six years of postdegree laboratory experience.

Testing methodologies

Time Remaining: 3 seconds

An applicant for a marijuana testing facility license and a licensed marijuana testing facility shall:

- use as guidelines or references for testing methodologies the American Herbal Pharmacopoeia's Cannabis Inflorescence: Standards of Identity, Analysis, and Quality Control, Revision 2014, adopted by reference; and the United Nations Office on Drugs and Crime's Recommended Methods for the Identification and Analysis of Cannabis and Cannabis Products: Manual for Use by National Drug Analysis Laboratories, dated 2009 and adopted by reference; and
- notify the board of any alternative scientifically valid testing methodology the marijuana testing facility proposes to use for any laboratory test it conducts; the board may require third-party validation of any monograph, peer-reviewed scientific journal article, or analytical method the marijuana testing facility proposes to follow to ensure the methodology produces comparable and accurate results.

An applicant for a marijuana testing facility license and the holder of a marijuana testing facility license shall observe good laboratory practices.

The board or the board's contractor may inspect the practices, procedures, and programs adopted, followed, and maintained by the applicant or the licensed marijuana testing facility and may examine all records of the applicant or the licensed marijuana testing facility that are related to the inspection.

The board may require an applicant or a licensed marijuana testing facility to have an independent third party inspect and monitor laboratory operations to assess testing competency and the marijuana testing facility's compliance with its quality program. The board may require random validation of a marijuana testing facility's execution of each testing methodology the facility uses.

The marijuana testing facility shall pay all costs of validation.

Standard operating procedure manual

Time Remaining: 2 seconds

An applicant for a marijuana testing facility license and a licensed marijuana testing facility shall have a written manual of standard operating procedures, with detailed instructions explaining how to perform each testing method the applicant or marijuana testing facility uses and minimum standards for each test.

The written manual of standard operating procedures must be available to each employee of the marijuana testing facility at all times. The written manual of standard operating procedures must cover at least:

- sample preparation for each matrix that will be tested
- reagent, solution, and reference standard preparation
- instrument setup, if applicable
- standardization of volumetric reagent solutions, if applicable
- data acquisition
- calculation of results
- identification criteria
- quality control frequency
- quality control acceptance criteria
- rective action protocol

The scientific director of a marijuana testing facility shall approve, sign, and date each standard operating procedure, and each revision to any standard operating procedure.

Laboratory testing of marijuana and marijuana products

Time Remaining: 3 seconds

A marijuana testing facility shall use the general body of required laboratory tests as set out in this section for marijuana plant material, an extract or concentrate of marijuana, and an edible marijuana product.

Required tests may include potency analysis, moisture content, foreign matter inspection, microbial screening, pesticide, other chemical residue, and metals screening, and residual solvents levels.

A marijuana testing facility shall establish a schedule of fees and sample size required for each test it offers.

Chain of custody

Time Remaining: 4 seconds

A marijuana testing facility shall establish an adequate chain of custody and sample requirement instructions that include:

- issuing instructions for the minimum sample requirements and storage requirements
- documenting the condition of the external package and integrity seals utilized to prevent contamination of or tampering with the sample
- documenting the condition and amount of sample provided at the time the sample is received at the marijuana testing facility
- documenting each person handling the original samples, aliquots, and extracts
- documenting any transfer of samples, aliquots, and extracts to another marijuana testing facility for additional testing or at the request of the marijuana cultivation facility or marijuana product manufacturing facility that provided the testing sample
- maintaining a current list of authorized persons and restricting entry to the marijuana testing facility to those authorized persons
- securing the marijuana testing facility during non-working hours
- securing short-term and long-term storage areas when not in use
- using a secured area to log in and aliquot samples
- ensuring samples are stored appropriately
- documenting the disposal of samples, aliquots, and extracts

Failed materials; retests

Time Remaining: 1 seconds

If a sample tested by a marijuana testing facility does not pass the required tests based on the standards set out in 3 AAC 306.645, the marijuana establishment that provided the sample shall dispose of the entire harvest batch or production lot from which the sample was taken; and document the disposal of the sample using the marijuana establishment's marijuana inventory tracking system.

If a sample of marijuana fails a required test, any marijuana plant trim, leaf, and other usable material from the same plants automatically fail the required test.

The board may approve a request to allow a batch of marijuana that fails a required test to be used to make a carbon dioxide- or solvent-based extract. After processing, the carbon dioxide- or solvent-based extract must pass all required tests.

If a marijuana cultivation facility or a marijuana product manufacturing facility petitions for a retest of marijuana or a marijuana product that failed a required test, the board may authorize a retest to validate the test results. The marijuana cultivation facility or a marijuana product manufacturing facility shall pay all costs of a retest.

Supplemental marijuana quality testing

Time Remaining: 1 seconds

The board or director may at any time determine that the interests of the public require random supplemental testing of marijuana or a marijuana product.

When the board or director requires random supplemental testing, the board will or director shall direct the marijuana cultivation facility that produced the marijuana, or the marijuana product manufacturing facility that manufactured the product, to submit a specified sample, batch, or packaged product to a designated marijuana testing facility.

The material must be packaged in a manner that ensures the marijuana testing facility will be able to confirm that it has received and is testing the correct supplemental sample.

When a marijuana testing facility receives a sample for random supplemental testing under this section, the marijuana testing facility shall:

- perform any required laboratory test the board or director requests; and
- report its results to the board or director; and the facility that provided the sample

A marijuana testing facility that conducts laboratory testing under this section shall bill all costs directly to the marijuana cultivation facility or the marijuana product manufacturing facility that provided the samples for testing.

Reporting; verification

Time Remaining: 0 seconds

A marijuana testing facility shall report the result of each required laboratory test directly into its marijuana inventory tracking system not later than 24 hours after the test is completed.

A marijuana testing facility shall provide the final report in a timely manner to the marijuana establishment that submitted the sample; and to the director not later than 72 hours after the marijuana testing facility determines that results of tested samples exceed allowable levels.

A marijuana testing facility shall establish procedures to ensure that reported results are accurate, precise, and scientifically valid.

To ensure reported results are valid, a marijuana testing facility shall include in a final report:

- the name and location of the marijuana testing facility
- the unique sample identifier assigned by the marijuana testing facility
- the marijuana establishment or other person that submitted the testing sample
- the sample identifier provided by the marijuana establishment or other person that submitted the testing
- the date the marijuana testing facility received the sample
- the chain of custody identifier
- the date of the report
- the type of marijuana or marijuana product tested
- the test results
- the units of measure
- any other information or qualifiers needed for interpretation of the test method and the results being reported, including any identified and documented discrepancy

A marijuana testing facility may amend a final report for clerical purposes except that test results may not be amended.

Question 7 of 10

Choose the option which best answers the question.

If a sample tested by a marijuana testing facility does not pass the required tests based on the standards set out in 3 AAC 306.645, the marijuana establishment that provided the sample shall:

1. Discount the remaining batch and let consumers know the batch failed the testing
2. Dispose of the entire harvest batch or production lot from which the sample was taken; and document the disposal of the sample using the marijuana establishment's marijuana inventory tracking system. ✔ Your answer is correct
3. Pull the remaining harvest batch or production lot and let employees take the product for personal use; and document using the marijuana establishment's marijuana inventory tracking system.
4. Dispose of the entire harvest batch or production lot from which the sample was taken; and document the disposal of the sample in the company's permanent records.

Alaska Marijuana Handler Permit Education

Recreational Marijuana Regulations 3AAC 306

Marijuana handler permit

Time Remaining: 0 seconds

A marijuana establishment and each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or a marijuana product, or who checks the identification of a consumer or visitor, must obtain a marijuana handler permit from the board before being licensed or beginning employment at a marijuana establishment.

To obtain a marijuana handler permit, a person must complete a marijuana handler permit education course approved by the board, pass a written test demonstrating an understanding of the course material, and obtain a certificate of course completion from the course provider. The topics that an approved marijuana handler permit education course covers must include:

- AS 17.37, AS 17.38, and 3 AAC 306 Regulations
- the effects of consumption of marijuana and marijuana products
- how to identify a person impaired by consumption of marijuana
- how to determine valid identification
- how to intervene to prevent unlawful marijuana consumption
- the penalty for an unlawful act by a licensee, an employee, or an agent of a marijuana establishment

To obtain a marijuana handler permit, a person who has completed the marijuana handler permit education course described above shall present the course completion certificate to the director. The director shall issue a marijuana handler permit card valid for three years from the date of issue. A person may renew a card issued under this section by passing a written test demonstrating an understanding of the course subjects.

A licensee, employee, or agent of a marijuana establishment shall keep the marijuana handler permit card, described above, in that person's immediate possession or a valid copy on file on the premises at all times when on the licensed premises of the marijuana establishment.
