Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Will's World, LLC	**MJ License #:**	12536		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Will's World				
Premises Address:	12151 E Palmer-Wasilla Hwy, Unit 1c				
City:	Palmer	**State:**	Alaska	**ZIP:**	99645

Intended Use: Smokable/ edible/topical/wholesale/etc.	Wholesale/Smokable		

AMCO Received 4/10/2020

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Ethanol Oil-filled vape cartridge, syringe/applicator, screw top glass or wholesale jar with a color ranging from clear/light yellow to a dark amber. Oil is viscous in nature. Ethanol Oil has a "free-form" shape that fits to container.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ethanol concentrate will be extracted from flower or trim using an Ethanol Extractor with the use of Ethanol. The solution is purged with the use of a vacuum oven and/or roto-evaporator under specified conditions to achieve desired consistency. Crude extract will be further purified through the process of distillation, resulting in distillate oil. Additional cannabis terpenes may be added to enhance the product. The mixture is then properly packaged in empty cartridges etc., and stored until testing and sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Ethanol Oil will be packaged two different ways:
1. In small, opaque, heat sealed and child-resistant mylar bags, blister packs or small silicone or glass containers for sale to retail stores. Bags/containers/packs will contain either .5, 1, 3, 5 or 7 grams of Ethanol Oil. Up to 1 pound of Ethanol Oil will be packaged in large, opaque mylar bags or glass jars with screw top lids for wholesale transaction. THC will range from 20% to 99%.

2. Half and one gram portions of Ethanol Oil will be packaged into vape cartridges. The total THC will range from 20-99% with the actual amount of THC content listed on the label per testing results. The filled vape cartridge will be placed into an opaque mylar child resistant bag. The mylar bad is then to be placed into a child-resistant exit bag by the retailer before the customer exits the retail store.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
