Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	A marijuana concentrate that comes in a variety of colors and textures. depending on the starting material and filters used it can be very solid, dry, crumbly, putty-like, paste-like, or have a buttery or caviar-like texture. Colors can range from dark and light brown, to black, green, yellow and red. Generally the finished product will be white or white with an orange or yellow tint. Product may have additional labeling of "Full Melt" "Live" and/or "Full Spectrum"
Ingredients:	Marijuana Flower, kief, or Trim
Standard Production Procedure and Detailed Manufacturing Process:	Marijuana Flower, kief, or Trim is paced in a cold bath full of ice water and agitated. it is then poured through a series of filters of varying micron sizes. This process is repeated several times in order to filter out as much plant material and debris as possible. The product is then collected and and freeze dried for about 24 hours before it is graded, commercially tested, and packed either for resale or as an ingredient base for other products. left over plant material is either further processed or destroyed per AMCO regulations.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
