MEMORANDUM

TO: Chair and Members of the Board DATE: August 13, 2020

FROM: Glen Klinkhart, Interim Director
Marijuana Control Board

RE: Southeast Essentials #13222

ForgetMeNot Enterprises, Inc. DBA Southeast Essentials, a Marijuana Product Manufacturing Facility in the City and Borough of Juneau, submitted several new marijuana products for board consideration at the June 10-11, 2020 meeting.

The Standard Production Procedure and Detailed Manufacturing Process for three of the products (Dipped Joint, Dipped and Rolled Joint, and Solventless Alaskan Caviar) included the language "A random sample of each production lot of finished product will be sent to the testing lab, prior to labeling and packaging for sale to a licensed retailer", which was required to be removed as part of delegation. During consideration of these products, the board stated that products composed of multiple concentrates may not be equally dispersed, so the board has required that the label show the test results of each separate concentrate but not the overall testing results. However, testing of the finished product is required under 3 AAC 306.550. Licensing staff requests verification that this delegation is required. Attached are the MJ-16 forms that were brought to the board at the June 2020 meeting.

Licensing staff also requests clarification on how similar products composed of two or more approved concentrates are to be labeled. Do the test results for each concentrate need to be on the label for each individual product, or are they to be included on the labels of shipping containers?
