MEMORANDUM

TO: Marijuana Control Board

DATE: June 10, 2021

FROM: Jane P. Sawyer, Regulations Specialist

RE: Regulations Project – THC Content for Edibles

At the October 2020 meeting, the board opened a regulations project to increase the THC content limit on single servings and multiple-servings package(s), and sent out the initial draft for public comment. The draft was out for about 45 days. Many comments were received.

- 3 AAC 306.005(a)(1) and 3 AAC 306.300(a)(2)(A) are simply updating the range of applicable provisions under the subsections.

- 3 AAC 306.560 is amended to allow for a single serving to contain not more than 10 milligrams of THC, and for a single packaged unit to contain not more than 100 milligrams of THC. The packaged unit still may not exceed 10 servings, each serving may not exceed a certain amount of THC content.

- 3 AAC 306.645(b)(1)(B)(iii) simply updates the <u>example</u> provided of the 20 percent variance allowed for THC content in a single serving. The actual math needs to be done by the manufacturer based on manufacturer's target.

- 3 AAC 306.645(b)(1)(C)(i) is changed from 60 milligrams to 120 milligrams. 120 milligrams would be the maxed allowed THC content in an individually packaged edible marijuana product within a test lot based on the 20 percent variance.

Options for the board:

- Vote to adopt
- Amend and put out for public comment (if amendment warrants it)
- Send back to staff for revisions
- Close the project without action
