Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	YNY Investment LLC	**MJ License #:**		11304	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	HOLLYWEED 907				
Premises Address:	2429 E. 88th Ave				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99507

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	CO2 Wax		
Product Type:	Marijuana Concentrate - Intended for inhalation		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A

Received by AMCO 6/27/18

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Cannabis wax has the same consistency as warm candle wax. It is pliable and soft to the touch. The color ranges from a dark orange to a light amber color.
Ingredients: This box is not applicable to marijuana concentrates.	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Oil extracted from the Apecks 2000PSI-5LD will be placed in a vacuum oven and then whipped. After a set period of time in the oven, the material will appear brittle and will crumble. Materials will be placed in large silicone container to await packaging.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Received by AMCO 6/27/18

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

.3g, .5g or 1g will be packaged into small glass, plastic containers lined with silicone or silicone containers with a lid and then placed into heat-sealed, resealable, child-resistant and opaque mylar bags. The THC content will range from 40 - 90% THC with the actual THC content listed on the label per the testing results.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Alaska Marijuana Control Board

Form MJ-15d: Previously Approved Edible Product THC Limit Change

What is this form?

This form is required for all licensed marijuana manufacturers seeking to add the option of 10 milligrams (mg) per serving/100mg per package to their licensed manufacturing facility's currently approved products' THC content limit as described under 3 AAC 306.560, unless otherwise approved by the board.

The required $250 change fee may be made by check, cashier's check, or money order.

This form is the only required application to solely add the option of 10mg THC per serving/100mg THC per package (individual servings in a package may not be greater than 10 mg) to any of your current approved marijuana edible products. If any other changes are being requested, they must be requested on form MJ-15: Operating Plan Change.

This form must be completed and submitted to AMCO's main office prior to changing THC content in edibles. The licensed manufacturer's production of their currently approved edibles containing THC may not be altered unless and until the director has given approval.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	YNY Investment, LLC	**MJ License #:**	11304		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Hollyweed 907				
Premises Address:	2429 E. 88th Ave				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99507

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Peanut Butter Chocolate Squares		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3-6 months frozen
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Peanut Butter chocolate squares will be square shaped and 1.25 x 1.25 inches in size, with a chewy consistency, with an outside color ranging from brown to dark brown depending on marijuana strain used and cocoa. The inside (peanut butter filling) will be smooth consistency and a light brown color
Ingredients: This box is not applicable to marijuana concentrates.	Chocolate, peanut butter, coconut oil, CO2 marijuana concentrate
Standard Production Procedure and Detailed Manufacturing Process:	Temper chocolate in heated bath. Inject 1st layer of chocolate into mold and let cool completely. Infused peanut butter with coconut oil and marijuana concentrate and add to chilled layer of chocolate. Inject 2nd layer of chocolate into mold and let cool completely before removing from molds. Test batch and then package.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Alcohol/ Vegetable Glycerin Tincture
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Alcohol tincture is a dark green liquid that share the same consistency as water at room temperature. Vegetable Glycerin tincture is a viscus liquid at room temperature. It's color varies from a golden brown to a dark green.

Ingredients: This box is not applicable to marijuana concentrates	NA

Standard Production Procedure and Detailed Manufacturing Process:	Alcohol/ Vegetable Glycerin Extraction: Combining either high proof alcohol or vegetable glycerin and plant matter in a sealed container while being stored in a cold environment (under 0o C) the THC will bind with the liquid. Agitating it while under these conditions will help ensure maximum yield. After the process is complete the mixture will then be strained and bottled and kept in the same cold
