Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	YNY INVESTMENT LLC	**License Number:**	11304		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	HOLLYWEED 907				
Premises Address:	2429 E. 88TH AVE				
City:	ANCHORAGE	**State:**	ALASKA	**ZIP:**	99507

Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	☒	☐
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	☒	☐

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	☒	☐
Closely resembles a familiar food or drink item including candy	☒	☐
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	☒	☐

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

i.2000-5LD extraction machine from Apeks Super Critical, which is an active closed loop extraction process using super critical CO2. High Proof Alcohol. Vegetable Glycerin. Natural Fats. Water and Ice.

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

CO2 Extraction:
Using the i.2000-5LD extraction machine from Apeks Super Critical, which is an active closed loop extraction process using super critical CO2.
Cold Water Extraction:
Using a series of screens along with water and ice we plan on agitating plant material until desired to extract concentrate and form into Bubble Hash which can be used in either edibles or sold direct to customers
*Natural Fat Extraction (Butter, Olive Oil, Vegetable Oil etc):
Using a natural fat along with water we plan on using heat to breakdown and bind THC with the oil to later be filtered and formed into bricks to be used in our manufacturing of edibles.
*Alcohol/ Vegetable Glycerin Extraction:
Combining either high proof alcohol or vegetable glycerin and plant matter in a sealed container while being stored in a cold environment (under 0o C) the THC will bind with the liquid. Agitating it while under these conditions will help ensure maximum yield. After the process is complete the mixture will then be strained and bottled and kept in the same cold environment.

*These recipes will require the plant matter to go through Decarboxylation. The process of switching the THC molecules into their active state THC-A

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

Any expired or outdated marijuana or marijuana product will be stored in designated waste receptacles. After giving notice to AMCO enforcement, the waste will be ground and mixed with non-marijuana solid wastes with the final mixture at least 50% non-marijuana waste. The final mixture will be picked up by the solid waste facility.

Approved at May 2017 MCB meeting.
