Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Last Frontier Joint Operations llc.	**MJ License #:**		11960	
License Type:	Product Manufacturer				
Doing Business As:	Last Frontier Joint Operations llc.				
Premises Address:	7180 Revilla rd. suite 100				
City:	Ketchikan	**State:**	Alaska	**ZIP:**	99901

Received by AMCO 04.19.18
Scanned by CamScanner

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

We intend on the majority of our cannabis to be sourced from the other license we operate. All product intended to transfer from license 11957 to 11960 will be tracked and approved by amco before processed or accepted. We will also offer other cultivation facilities the option to have raw material processed and all transfers will be tracked through metrc. We will process into oils or butter/ coconut oil these will be sent for testing and held in our secure storage untill approval for products to be made. Products ready to ship will be sent for testing and all batches will be held seperate until testing and approval for transfer.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

We will use Co2 for the bulk of our extraction needs. We will only use the eden labs 5L2K professional closed loop extraction system when using Co2. We also may use butter, olive oil and or coconut oil on a stove top or in a slow cooker to make infused oils. For hash we will use dry ice and a bubble machine hash extractor with cold water. Last we may use lab grade ethanol in a rotary evaporator such as Al p2s300 to make small batches of oil.

Received by AMCO 04.19.18

Scanned by CamScanner

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

We have contracted with Ketchikan Waste Facility for any marijuana biproduct deemed waste as long as it is mixed with our soil left overs, wood chips or any organic mixture available. Also if it is a waste that is biodegratable we have containers to create compost with our soil left overs to be reused or packaged for sale. All waste will be ground or broke down and mix at 50 percent with wood chips and or soil left overs to become unusable.

Our waste, while waiting for board approval to be disposed of, will be stored in either one of our secure cooler storages to ensure no molding or contamination inside of licensed area 11960 or stored in a rolling and sealable container near the only exterior door to licensed area 11960.

Received by AMCO 4.24.18

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	ULK

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 6.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

The testing procedures and protocols to be followed will include any batch of edibles or extract once finished will be randomly sampled by selecting a product from each production lot in an amount required by the marijuana testing facility, then designate an individual responsible for collecting each sample; that individual will prepare a signed statement showing that each sample has been randomly selected for testing. Then provide the signed statement to the marijuana testing facility and maintain a copy as a business record, then segregated until the marijuana testing facility reports the results from its tests. All batches will be stored in a cool dry secure storage until testing is passed. The marijuana product manufacturing facility shall maintain the testing results as part of its business records.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Canna Butter
Product Type:	Extract

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

This is to be used in our facility to create other edibles. The portions will be 1 cup and each will either be in a glass jar or a zipping plastic bag.

If intended for sale to other product manufacturers we will package in wholesale packages not exceeding 5 pounds. Included with a tracking label from the state tracking system metrc. This will be placed in a tamper evident container for shipping with the required labels. A manifest will be required to ship and a copy will remain with the product at all time during shipping and a copy will be given to an employee of the reciving licensed facility.
